ADVERTISING AGENCIES

Presented in this report are summary statistics on advertising agencies in the United States for the year 1935. The data were collected in 1936 as a part of the Census of Business with funds provided by the Works Progress Administration. Information is shown on number of agencies, total revenue receipts, employment, pay roll, total operating expenses, and total billings to clients.

This report was prepared by James O. Reid, Technical Assistant, in charge of Advertising Agencies.

FOREWORD

Because of popular demand the Bureau of the Census has increased the scope of its work of periodically measuring the extent and character of American business. In 1930 the Bureau was charged with the responsibility of taking the first census of retail and wholesale trade covering the year 1929. A comparable census, expanded to include business service enterprises, was taken for 1933. Again in 1936, a census of distribution and service enterprises was taken covering the year 1935. In order that nearly every phase of the complex machinery of American business might be measured, the 1935 census added advertising agencies, banking and finance, motor transportation, warehousing, insurance, contract construction, and radio broadcasting to its former list of business fields included in its Census of Business.

ADVERTISING AGENCIES

Establishments covered in this report are limited to those that contract for space or other advertising media and place the advertising for the client on commission or fee basis. Establishments which write advertising copy, do commercial art work, etc., but do not place the advertising with media, are excluded from this report. They are included in the Census of Service Establishments as business services. This is the first census in which this restricted classification has been applied, therefore comparable statistics for other years are not available.

THE CANVASS.---To facilitate the canvass and cause the least inconvenience to the individual agency, an attempt was made to conduct the canvass by mail. With the assistance of the American Association of Advertising Agencies, the Bureau prepared a list of agencies to whom a blank form was mailed on January 7, 1936. A copy of the form used is shown at the end of this report. As the field canvass on the regular business census progressed, this list was supplemented from information furnished by the field enumerators. Although a request to prepare and return the report not later than February 1 accompanied the blank forms, slightly more than 10 percent of the returns had been received on that date. Reminder letters were sent to approximately 1200 delinquents on February 19, followed by approximately 900 second reminders

to establishments that had not reported on March 11. By the middle of April the delinquent list was reduced to about 600 firms and the field enumerators were then instructed to visit and obtain reports from these companies in an effort to obtain a reasonably complete canvass. When the field canvass closed the enumerators had been unable to obtain reports from a considerable number of agencies. After this continued effort to secure a complete canvass, 85 firms remained on the list at the end of the year from whom neither a report was received nor a definite reason given for not furnishing a report. An additional 47 agencies definitely refused to furnish a report. Available data indicate that practically all of these establishments are relatively small though a few of them probably do a substantial volume of business.

ESTABLISHMENTS.---For purposes of this report each branch office in addition to the home office is considered an establishment.

REVENUE.---Revenue receipts represent the earnings of the agency for rendering service and do not include the amount passed on to media owners and suppliers of materials.

PROPRIETORS.---Proprietors include all owners of unincorporated establishments who devote the major portion of their time to the business. Their number is not included in the number of employees but is shown separately in Tables 1 and 5.

UNITED STATES SUMMARY (TABLE).---Table 1 presents summary statistics for establishments divided into three groups based on (1) billings reported in detail, (2) billings reported in total only, and (3) no billings reported. Billings reported by group (1) are shown by type of media in Table 2.

TABLE 1.---SUMMARY FOR THE UNITED STATES

	Total	Agencies Reporting--		
		Billings in detail	Billings in total only	No billings
Number of establishments	1,212	918	174	120
Number of companies	1,089	820	158	111
Revenue receipts	$70,840,000	$60,801,000	$7,636,000	$2,403,000
Active proprietors	583	444	73	66
Employees (average)	13,039	10,947	1,564	528
Total pay roll	$41,186,000	$35,518,000	$4,403,000	$1,265,000
Full-time	$40,855,000	$35,251,000	$4,358,000	$1,246,000
Part-time	$331,000	$267,000	$45,000	$19,000
Total operating expenses (including pay roll)	$61,643,000	$52,818,000	$6,685,000	$2,140,000
Total billings	(1)	$405,888,000	$46,377,000	(2)

1/ Incomplete; see footnote 2. 2/ Not reported

OPERATING EXPENSES.---Pay roll amounted to $41,186,000 or 67 percent of the total operating expenses. The remaining 33 percent, or $20,457,000, represents other operating expenses, such as rent, insurance, light, heat, and other overhead charges.

BILLINGS.---Billings to clients by type of media were called for on the schedule in the detail shown in "Item" column of Table 2. It developed, however, that a large number of agencies were unable to furnish the data separately for each item and in many instances reported either in total only or for a combination of items.

After considerable correspondence it was found that agencies accounting for $405,888,000, or approximately 90 percent of the total billings reported, were able to furnish data for groups of items as shown in the table. Of this amount, newspapers accounted for $153,152,000, or 37.7 percent, and magazines, including agricultural and religious papers, $107,330,000, or 26.5 percent. Radio networks and radio talent not billed through broadcasting systems represent $63,307,000, or 15.6 percent of the total.

Slightly more than 54 percent of total billings for the entire country were reported by agencies located in New York City.

The addition of an estimated amount of billings, based on data available for the 132 firms listed from whom reports were not obtained and on revenue receipts for the 111 agencies shown in last column of Table 1, would indicate that the grand total of all billings to clients by advertising agencies amounted to slightly less than $500,000,000 for the year 1935. If a complete distribution of this total by type could be had, doubtless the percentages shown in Table 2 would be changed to some extent, but from all information available it is reasonably certain that none of the ratios would be materially affected.

TABLE 2.---BILLINGS TO CLIENTS, BY TYPE OF MEDIA

Item	Amount	Percent of Total
Total	$405,888,000	100.0
Daily newspapers at national rates	$153,152,000	37.7
Daily newspapers at local rates		
Foreign language papers		
Weekly newspapers		
General magazines	107,330,000	26.5
Agricultural papers		
Religious papers		
Trade and merchandising papers	15,758,000	3.9
Industrial papers		
Class and professional papers		
Radio networks	63,307,000	15.6
Radio spot broadcasting		
Radio talent		
Car cards	23,109,000	5.7
Outdoor advertising		
Window display (through window-display organizations)		
Other media billings		
Direct mail advertising	4,118,000	1.0
Art and mechanical charges	26,124,000	6.4
Promotional and merchandising material	12,990,000	3.2
Store display and point-of-purchase advertising materials		
Purchase of outside creative or technical services		
All other billings		

SIZE-GROUPS BY VOLUME OF BILLINGS.---In Table 3, all agencies that reported billings, either in detail or in total only, are grouped into five size-groups on the basis of total billings. For each group is shown the number of companies, percent of total revenue reported by the group, percent pay roll is of revenue, and percent revenue is of billings.

TABLE 3.---RATIO OF REVENUE REPORTED, PAY ROLL TO REVENUE, AND REVENUE TO BILLINGS, BY SIZE-GROUPS BASED ON BILLINGS

Size-Group	Number of Companies	Percent of Total Revenue	Percent Pay Roll is of Revenue	Percent Revenue is of Billings
United States	978	100.0	58.3	15.1
Billings--				
Over $5,000,000	15	44.2	55.0	14.1
$2,000,000 to $5,000,000	24	15.3	62.6	14.3
$1,000,000 to $2,000,000	31	9.8	64.5	15.1
$500,000 to $1,000,000	41	6.5	65.5	15.5
Under $500,000	867	24.2	57.2	18.4

The ratio of revenue to billings increased from 14.1 percent for the size-group over $5,000,000 to 18.4 percent for the size-group under $500,000, with the $1,000,000 to $2,000,000 group showing the same percentage as the total for the country as a whole, or 15.1 percent. The increase from one group to the next lower group ranged from two-tenths to eight-tenths of 1 percent, except for the smallest group which increased 2.9 percent. Pay roll amounted to 58.3 percent of total revenue receipts for the United States, with the largest and smallest size-groups showing ratios under that for the country as a whole.

EMPLOYEES.---Statistics on employees are shown in Tables 4, 5, and 6. A small number of agencies furnished only a consolidated report covering branch offices located in different States and in some cases different geographic divisions; therefore, data for the employees in these branches are included in the figures for the State in which the home office is located. However, no total is materially affected by this situation.

Table 4 shows for a representative week and by two functional groups the number of full-time employees and the amount of full-time pay roll for geographic divisions. In addition to the full-time employees shown in this table there were reported a total of 504 part-time employees with a total weekly pay roll of $7,797. Executives include such personnel as copy chiefs, research directors, production managers, heads of space departments, etc. Separate data were called for on the schedule for office and clerical employees but due to lack of uniformity in reporting it was necessary to combine the data with that for "Other employees."

The average weekly rate of pay reported for executives and salaried corporation officers was $147 for the country as a whole, with a range from $83 for the Mountain, East South Central, and West South Central divisions to $171 for the Middle Atlantic division. The average for the United States for "Other employees" was $42 per week, with a range from $23 for the East South Central division to $45 for the East North Central division.

Table 5 shows number of proprietors, number of full-time and part-time employees by sex, and amount of pay roll by States and

geographic divisions. The number of employees by months are shown in Table 6 by States and by geographic divisions. The number of employees shown in these tables and in Table 1 represents the average obtained by dividing by twelve the sum of the number reported for each of the twelve months.

TABLE 4.--FULL-TIME EMPLOYEES--NUMBER AND PAY ROLL FOR A REPRESENTATIVE WEEK, BY FUNCTIONAL GROUPS AND BY GEOGRAPHIC DIVISIONS.

(Data reported for week ending Oct. 26, 1935, when representative)

Division	Executives and Salaried Corporation Officers			Other Employees

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential*. Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only*.

DANIEL C. ROPER, *Secretary of Commerce.*

ADVERTISING AGENCY SCHEDULE

DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS
WASHINGTON

CENSUS OF BUSINESS: 1935

SUPERVISOR'S DISTRICT
No. ....
State ....
ENUMERATION DISTRICT
No. ....
County ....
CONSECUTIVE NUMBER OF REPORT
No. ....

A separate report should be prepared for each establishment. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form.

The report should cover, if possible, the full year's operation for the calendar year 1935, even if ownership has changed during the year. If more convenient, a twelve-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT ....

b. NAME OF OWNER ....

c. LOCATION OF ESTABLISHMENT
State .... County .... Township ....
Name of city, town, or village ....
Street and number ....
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or no*) ....

d. ADDRESS (HOME-OFFICE OR BUSINESS ADDRESS) OF OWNER ....

e. LEGAL FORM OF ORGANIZATION (Place check mark in proper square)
☐ Individual proprietorship. ☐ Corporation.
☐ Partnership. ☐ Other (*specify*) ....

f. WHEN WAS THIS AGENCY ORIGINALLY ESTABLISHED? ....
(Does not apply to branches)

g. WHEN WAS IT ACQUIRED BY PRESENT OWNER? ....
(Give both month and year if it came under present ownership since 1933; year only for preceding periods—Does not apply to branches)

h. NUMBER OF ESTABLISHMENTS IN SAME LINE OF BUSINESS OWNED BY THIS ORGANIZATION IN THE CONTINENTAL UNITED STATES (*including the establishment covered in this report*) ....

(1) ....
(2) ....
(3) ....
(4) ....
(5) ....
(6) ....
(CODE—Do not use)

2. REVENUE FROM ADVERTISING AGENCY OPERATIONS:

TOTAL revenue from advertising agency operations .... $..........
(Do not include that part of receipts from clients which is passed on to media and suppliers.)

3. OPERATING EXPENSES:

a. Total pay roll for the year 1935 for full-time and part-time employees (*salaries, wages, bonuses, and commissions*) .... $..........
(Do not include proprietor's or partners' compensation, but include that of officers of corporations.)

b. All other operating expenses, not including pay roll (*do not include cost of space, time, or other purchases made for and billed to clients*) .... $..........

c. Total operating expenses (*a plus b*) .... $..........

d. How much of the pay roll (*a, above*) was paid to part-time employees? .... $..........

4. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

a. Total number of proprietors and firm members (*including those reported under 4b below*) ....

b. Number of proprietors and firm members devoting major portion of their time to the business ....

32207

5. PAID EMPLOYEES AND WEEKLY PAY ROLLS:

(Do not include in this inquiry persons reported in Inquiry 4, above)

EMPLOYMENT AND PAY-ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY

(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season)

Week: From ...., 1935, to ...., 1935

	Full-time		Part-time	
	Number of paid full-time employees during the week	Pay roll for the week for full-time employees (*salaries, wages, bonuses, and commissions*)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (*salaries, wages, bonuses, and commissions*)
a. Executives and salaried corporation officers		$		$
b. Office and clerical employees		$		$
c. Other employees		$		$
d. TOTAL (*sum of a, b, and c*)		$		$

e. How many of the total number of employees shown above (*full-time and part-time combined*) are {Males .... Females ....

f. Total number of paid employees (*full-time and part-time combined*) working during the pay period ending nearest the 15th of each month of 1935:

MONTH, 1935	NUMBER	MONTH, 1935	NUMBER	MONTH, 1935	NUMBER
January		May		September	
February		June		October	
March		July		November	
April		August		December	
				(Do not use)	

6. SUPPLEMENTAL FACTS:

a. Total billings to clients, during the year 1935, for each type of medium listed below:

1. Daily newspapers at national rates	$
2. Daily newspapers at local rates	$
3. General magazines	$
4. Radio networks	$
5. Radio spot broadcasting	$
6. Trade and merchandising papers	$
7. Industrial papers	$
8. Class and professional papers	$
9. Agricultural papers	$
10. Religious papers	$
11. Foreign-language papers	$
12. Car cards	$
13. Weekly newspapers	$
14. Outdoor advertising	$
15. Window display (*through window-display organizations*)	$
16. Other mediums (*please specify*)	$
	$
17. TOTAL	$

b. Total billings to clients, during the year 1935, for direct-mail advertising (*excluding postage*) .... $

c. Total billings to clients (*not billed through broadcasting systems*) during the year 1935, for radio talent .... $

d. Total billings to clients, during the year 1935, for promotional and merchandising material (*including sales portfolios, literature for salesmen and for other forms of solicitation*) .... $

e. Total billings to clients, during the year 1935, for store display and point-of-purchase advertising materials (*dealer helps*) .... $

f. Total billings to clients, during the year 1935, for purchase of outside creative or technical services (*including outside art consultants, merchandising consultants, product and package designers, etc., but not including employees of this agency reported in Inquiry 5*) .... $

g. Total billings to clients during the year 1935 for art and mechanical charges .... $

h. TOTAL of all other billings to clients during the year 1935 .... $

i. TOTAL volume of billings to clients, during the year 1935 (*sum of a, b, c, d, e, f, g, and h*) .... $

REMARKS: ....

CERTIFICATE

RADIO BROADCASTING

Prepared under the Supervision of
Fred A. Gosnell
Chief Statistician, Census of Business

BY

C. H. SANDAGE

Chief, Division of Communications

FOREWORD

Because of popular demand the Bureau of the Census has increased the scope of its work of periodically measuring the extent and character of American business. In 1930 the Bureau was charged with the responsibility of taking the first census of retail and wholesale trade covering the year 1929. A comparable census, expanded to include business service enterprises, was taken for 1933. Again in 1936, a census of distribution and service enterprises was taken covering the year 1935. In order that nearly every phase of the complex machinery of American business might be measured, the 1935 census added banking and finance, motor transportation, warehousing, insurance, contract construction, advertising agencies, and radio broadcasting to its former list of business fields included in its Census of Business.

The entire 1935 Census of Business (a Works Progress Administration project) is under the supervision of Fred A. Gosnell, Chief Statistician for the Census of Business. This report was prepared by C. H. Sandage, Chief, Division of Communications.

This report deals with the radio broadcasting business for 1935. Data are classified and presented in a manner which should provide a basis for a detailed analysis of this important business enterprise.

Section 1

INTRODUCTION

In this volume are presented basic statistics on the radio broadcasting business of the United States for the year 1935. The data were collected in 1936 in connection with the Census of Radio Broadcasting, which was a part of the Census of Business.

Some of the material presented here was first published in semifinal form in a series of regional and State bulletins, supplemented by a summary bulletin for the United States. In addition to reproducing these previously published figures, there is presented in this volume a number of tables and summary information showing the business of broadcast stations under varying conditions. These data should provide a basis for making a critical analysis of the radio broadcasting business.

FIRST CENSUS OF RADIO BROADCASTING

The radio broadcasting industry is very young. However, it had grown to such proportions by 1935 that the Bureau of the Census included it as a separate part of the 1935 Census of Business in order that the character and extent of this business might be measured in its entirety. A number of statistical studies had previously been made by other agencies, but all such studies had been made on a sample basis. Thus, the data presented here represent the first complete measure of the extent and character of the radio broadcasting business in the United States.

SCOPE OF THE CENSUS OF RADIO BROADCASTING

Included in the Census of Radio Broadcasting are all radio stations and networks engaged in the sale of time to advertisers and to others who wish to use such facilities in broadcasting their messages to the public. There were eight regular radio networks in operation December 31, 1935. Data were collected from all of these networks.

As of December 31, 1935, there were 625 broadcast stations in the United States that had permits either to operate or construct stations. Of this total, 564 were commercial stations in that they sold time to advertisers. The remaining 61 had construction permits only, were inactive, or were non-commercial stations operated by churches, schools, or similar organizations. Of the 564 commercial stations, reports were received from 562. One of these reports was received too late to include in this publication. Reports were never received from two stations.

Thus, the data presented here represent the 1935 business of 561 of the 564 commercial broadcast stations in operation December 31, 1935. The three commercial stations not included were all small stations located in different geographical regions. One was located in Ohio, one in Louisiana, and one in Nebraska. Figures for these three small stations would not change totals to any important degree and they would have little or no effect on conclusions to be drawn from the data that are presented.

Four of the 561 stations included in this report operated on a long wave frequency and were classified as experimental stations doing some commercial business. Since the conditions surrounding them were different than those affecting regular commercial stations, they have not been included in the detailed data presented for broadcast stations. They have been included only in measuring the total radio broadcasting business for 1935.

Figures for radio networks have also been included in measuring the total 1935 broadcasting business, but have not been included in the detailed data. Thus, the analytical data included in this report apply only to regular commercial broadcast stations unless otherwise stated.

STATISTICAL TECHNIQUE USED IN THE BROADCASTING CENSUS

A uniform questionnaire, accompanied by a sheet of instructions and definitions, was mailed to every broadcast station licensed to operate or construct a station during 1935, with the request that the schedule be filled out and returned. Follow-up letters and personal enumerators were used to obtain reports from those stations not replying to the first request.

As the schedules were returned each one was carefully checked for completeness. In each case where a schedule was found to be incomplete in major details, correspondence was initiated to obtain complete data. As a result of this process, complete information was secured from all stations for such items as total revenue, network revenue, pay roll, and number of employees. Complete data on a breakdown of total revenue from the sale of non-network time between national and regional spot and local were obtained from 93.3 per cent of all stations. A further breakdown by type of rendition was obtained from about one-half of the stations.

Those stations giving a breakdown of non-network time sales between local and non-local advertisers did 96.4 per cent of total station business. Since the number of schedules that were incomplete in this respect were few in number and represented such a small percentage of the total business, figures were edited in for them. Due account was taken of such factors as power, amount of revenue, affiliation with networks, size of community, and location, in providing a breakdown for these few stations.

Thus the Census figures for total time sales represent the actual figures reported by all 561 stations. The Census breakdown between local and non-local spot business is made up from two sources (1) the actual figures or certified estimates by station officials from 93.3 per cent of all stations doing 96.4 per cent of the total business, and (2) Census estimates for 6.7 per cent of the stations doing 3.6 per cent of the total business. These estimates were based upon ratios established from figures reported by stations with similar power, affiliation, total revenue, size of community, and location.

Since the number of stations reporting a breakdown of revenue by type of rendition fell far short of the total, these data are presented as a sample only. No attempt has been made to extend these figures to represent all stations. The Bureau of the Census exercises extreme care in its attempt to obtain complete coverage in any Census project. Unless such coverage is obtained or closely approached, Census data are labeled as presenting a sample coverage.

EXPLANATION OF CLASSIFICATIONS AND TERMS

CLASSIFICATIONS

The radio broadcasting industry has certain very definite legal, social, and economic obligations. Increased knowledge and understanding of the problems and factors influencing the various aspects of this industry will help in meeting these obligations effectively. Considerable emphasis has been placed upon legal obligations and some attention has been paid to social responsibilities. Perhaps lesser thought has been given to the economic aspects of radio broadcasting.

It is felt that data presented in this report will be of distinct value in pointing out some of the economic factors influencing broadcasting and in prompting further research in this field. Three economic factors have been isolated and data presented separately for each. The three factors are (1) station power, (2) network affiliation, and (3) size of the community served. All important Census data are presented by these three classifications.

In making any comparative study, it is vital that the agencies or items to be prepared have common qualities in certain major respects. Radio networks and broadcast stations do not operate on the same plane and can be compared only in minor details. The problems confronting the four experimental stations are sufficiently different that comparisons of these two groups would produce little of value. Consequently, the classifications given here apply only to regular commercial broadcast stations.

POWER AND NETWORK AFFILIATION

The following classification has been used:

100 - watts and less
101 - 999 watts
1,000 - 4,999 watts
5,000 - 9,999 watts
10,000 - 49,999 watts
50,000 - and over

This classification provides a basis for making an analysis of local, regional, and clear channel stations in terms of the classification of the Federal Communications Commission. For the most part the first interval includes local stations, the second and third, regional stations, and the last three, high powered regional and clear channel stations.

A number of stations have one power for daytime operation and a different power for night-time operation. Such stations have been classified according to the minimum power used. It should also be observed that the power intervals used were established so that they would be all inclusive. Actually, the great bulk of broadcast stations operate in one of the following wattage groups: 100, 250, 500, 1,000, 5,000, 10,000, and 50,000. However, because there were a few stations operating with a different wattage such as 50, 2,000, 2,500, 7,500, 20,000, etc., the classification intervals were made to be all inclusive.

Broadcast stations have been further classified as (1) affiliated with radio networks, (2) not affiliated with radio networks. Both national and regional networks have been included, but no division made between the two. Both affiliated and non-affiliated stations have been separately classified by power.

SIZE OF COMMUNITY

The following classification of cities has been made to provide a measure of the significance of the size of a community on the economic position of broadcast stations:

SIZE OF CITY (Population)		
Under	-	25,000
25,000	-	49,999
50,000	-	99,999
100,000	-	399,999
400,000	-	and over

Data are presented separately for those stations located in each of these city size groups. Such stations have been further classified by power within each city size group. Because of this classification it is possible to correlate the business of stations located in these areas with other pertinent information such as number of radio homes and retail and wholesale sales in those same areas.

EXPLANATION OF TERMS

Terms have ways of holding a variety of meanings when used without explanation. In order that the terms used here might hold one meaning only, each one is defined and explained.

NUMBER OF STATIONS

This term covers those commercial broadcast stations that were in operation December 31, 1935. Non-commercial stations, or those that did not sell time, are not included in the number of stations reported.

REVENUE

This includes net revenue received during the year 1935 and includes revenue from (1) the sale of time, (2) the sale of the services of talent, and (3) "other" sources.

SALE OF TIME

Revenue from the sale of time represents net billings of radio networks and broadcast stations. Networks and stations were requested to deduct time and quantity discounts from their gross billings in obtaining the net time sales figures reported. Cash discounts and discounts to advertising agencies were not deducted from gross billings. Thus, net time sales represent gross billings after deducting time and quantity discounts, but before deducting cash and agency discounts.

Time sales are further divided into network, national and regional "spot" or non-network, and local.

Network.---Network time sales represent revenue received from the sale of time by national and regional radio networks. When network time sales are shown for networks they represent the total net revenue from such sales, but when shown for broadcast stations they represent the amount stations received for carrying the commercial programs of networks.

National and Regional Spot.---This includes revenue from the direct sale of time by broadcast stations to advertisers whose products or services are distributed on a national or regional basis. Such advertisers prefer to "spot" their advertising in particular areas and at particular times, hence they make their own selection of stations and purchase time directly from them.

The terms "national and regional non-network" and "national and regional spot" are used interchangeably.

Local.---Like the preceding classification, local represents the direct sale of time by broadcast stations to advertisers. The difference is in the extent of the territory served by the advertiser.

Respondents were requested to classify as local all time sales made to those advertisers who distributed their products or services largely in one trading area.

SALE OF TALENT

Included under this term is the revenue from the sale of the services of regular network or station talent. Some networks and some station operators have established artists bureaus or similar agencies as separate and distinct organizations for the promotion and sale of talent to advertisers. Where such organizations are incorporated as separate business enterprises their revenue figures are not included in the talent sales figures of networks or stations. The revenue from this source as recorded in this report does not represent all amounts paid by advertisers for radio talent. Most such talent is secured from sources other than radio networks and stations.

TYPE OF RENDITION

The radio message is rendered before the microphone either by mechanical means or by persons. The different methods are of sufficient importance that data have been presented to show the relative importance of each type.

Mechanical Rendition.---Two types of mechanical rendition are used by the industry, (1) electrical transcriptions, and (2) records. The former are recordings made especially for radio broadcasting. The latter are regular phonograph records.

Personal Rendition.---This applies to the transmission of the radio message by a person or persons directly into the microphone. Personal rendition has been classified as either programs or announcements. The former refers to a regular commercial program of at least several minutes in length and which provides talent in addition to the announcements made to advertise the sponsor's products or services. Announcements are short, often being sandwiched in between regular talent programs. There is no talent provided other than that for making the announcement or directly associated with the announcement.

EMPLOYEES

Under this designation are included all those persons employed and paid by radio networks and stations, among them being executives and salaried corporation officers, supervisors, electricians, engineers, salesmen, artists, announcers, and all office, clerical, and other employees. Proprietors and firm members are not included under number of employees, regardless of the manner in which they received their compensation, whether in salaries, drawing accounts, or in the form of net profits. In arriving at the number of employees, the number of full-time and part-time employees reported for the 15th of each month during the year 1935 were added and the sum divided by twelve.

Employment by Sex.---The distribution of paid employees by sex was reported by radio stations for all employees, full-time and part-time combined, working during a week representative of 1935 operations. For the most part the week ending October 26, 1935, was used.

Monthly Employment.---Employment is the only item in the radio broadcasting statistics which is presented on a monthly basis and then for broadcast stations only, network employment being shown only as an average for the year. The monthly figures represent the number of full-time and part-time employees combined.

Pay Roll.---The annual pay roll figure covers the total compensation --- salaries, wages, commissions, bonuses, etc.--- paid to all employees. The income derived by proprietors and firm members is not included in this figure. The annual pay roll is broken down between the amount paid to full-time employees and the amount paid to part-time employees.

Employment by Functional Groups.---Average annual earnings of all employees could be approximated by dividing the annual pay roll by the average number of employees. The resulting figure would be of little value, however, since it would represent an average of dissimilar groups. To obviate this difficulty, detailed employment and pay roll data for employees performing similar functions were obtained for one representative week. Data were obtained for the following groups: executives, supervisors, technicians, artists, announcers, office and clerical, and other employees. The number and pay roll of each group were reported separately for both full-time and part-time employees. Where an employee performed a variety of functions and could thus be classified in more than one group, he was reported on the basis of the function requiring the major portion of his time.

Employment data by functional groups were reported by commercial broadcast stations only, hence data for networks are not included.

Executives.---This group includes salaried corporation officers, such as president, vice-president, secretary, treasurer and other persons appointed by the board of directors. Paid employees of single proprietorships or partnerships working in the same capacity as corporation officers listed above are classified as executives.

Supervisors.---Here are included general managers, chief engineers, superintendents, sales managers, auditors and other responsible administrative employees not reported as executives. There is a close similarity between these two groups and some overlapping occurred in the reporting. A president of a radio station may also be general manager, or in some cases there may not have been a president, but the functions of president performed by a general manager appointed by the board of directors. In such cases he has been reported as an executive. Because of this overlapping, most data pertaining to executives and supervisors have been combined.

Office and Clerical Employees.---This group includes stenographers, office secretaries, bookkeepers, accountants, telephone operators, messenger boys, and other so-called "white-collar workers" not otherwise classified.

Technicians.---Included here are those employees engaged in the operation and maintenance of broadcasting equipment except those classified as supervisors.

Artists.---Singers, speakers, musicians, players, and others engaged in furnishing entertainment are classified as artists. Emphasis must be placed on the fact that only those employed by broadcast station are included. Artists employed directly by advertisers are not reported here. Well known examples of such artists would include members of symphony and other orchestras, comedians, stage and screen stars, conductors of amateur programs, news commentators, artists on programs for children, etc. Since most of such radio performers are not employed by stations, data pertaining to them are not included in this report.

Announcers.---This includes those station employees whose major time is devoted to the announcement of programs and the sponsor's advertising message. A number of station announcers are classified with some other group since a minor part of their time is devoted to making announcements. As in the case of artists, a number of announcers are employed directly by the advertiser. Announcers for baseball, football and other sports events as well as those announcing the advertiser's message on regular sponsored programs are often employed by the advertiser and hence not included here.

Other Employees.---All employees not otherwise classified are listed here. Since no special grouping was provided for salesmen they are included in this group.

FULL-TIME AND PART-TIME EMPLOYEES

In general, persons regularly engaged for work for four or more hours per day or for more than three full days per week are full-time employees and all other, part-time employees. In classifying artists a distinction between full-time and part-time was difficult to make by a number of stations. In general, artists that were subject to the call of a station for four or more hours per day or more than three full days per week were classified as full-time employees even though they were not actually at the studios for such length of time. Nevertheless, there is some overlapping between full-time and part-time employment as reported for artists.

GENERAL ANALYSIS OF BROADCASTING STATISTICS

Unlike most surveys and sample studies in the field of broadcasting, the Census data for 1935 represent complete coverage. In any study where complete coverage is attained the character of the data collected must be devoid of a great amount of detail. Consequently the material presented here represents, for the most part, basic and fundamental aspects of the broadcasting business. However, it is believed that sufficient cross classifications of broadcast station data are possible to provide a qualitative as well as a quantitative analysis of this important field of business. Material presented in Section 3 provides a quantitative picture while data in Section 4 provides a qualitative analysis of the broadcasting industry.

TOTAL BROADCASTING REVENUE

Total net revenue of broadcast stations and networks for 1935 amounted to $86,492,653. The major source of revenue was the sale of time, which accounted for $79,617,543, or 92.1 per cent of the total. The sum of $6,875,110 was received from the sale of talent and other sources.

Radio time is sold either through networks or directly through individual stations. Each of these two channels accounted for almost exactly one-half of total time sales. Network sales amounted to $39,737,867 and individual station sales were $39,879,676. Table A (page 16) and Chart 1 (page 17) show the total 1935 revenue for the broadcasting industry as well as the sources of such revenue.

TABLE A -- NET REVENUE OF NETWORKS AND STATIONS: 1935

Source	Total Revenue		Amount Received by		
	Amount	Percent	Networks	Stations	
				Amount	Percent
TOTAL	$86,492,653	100.00	$30,199,280	$56,293,373	100.00
Sale of Time - total	79,617,543	92.1	27,216,035	52,401,508	93.1
National and Regional Network	39,737,867	45.9	27,216,035	12,521,832	22.2
National and Regional Spot (non-network)	13,805,200	16.1	---	13,805,200	24.6
Local Advertising	26,074,476	30.1	---	26,074,476	46.3
Sale of Talent	6,875,110	7.9	2,983,245	2,597,708	4.6
Other Revenue	1/		1/	1,294,157	2.3

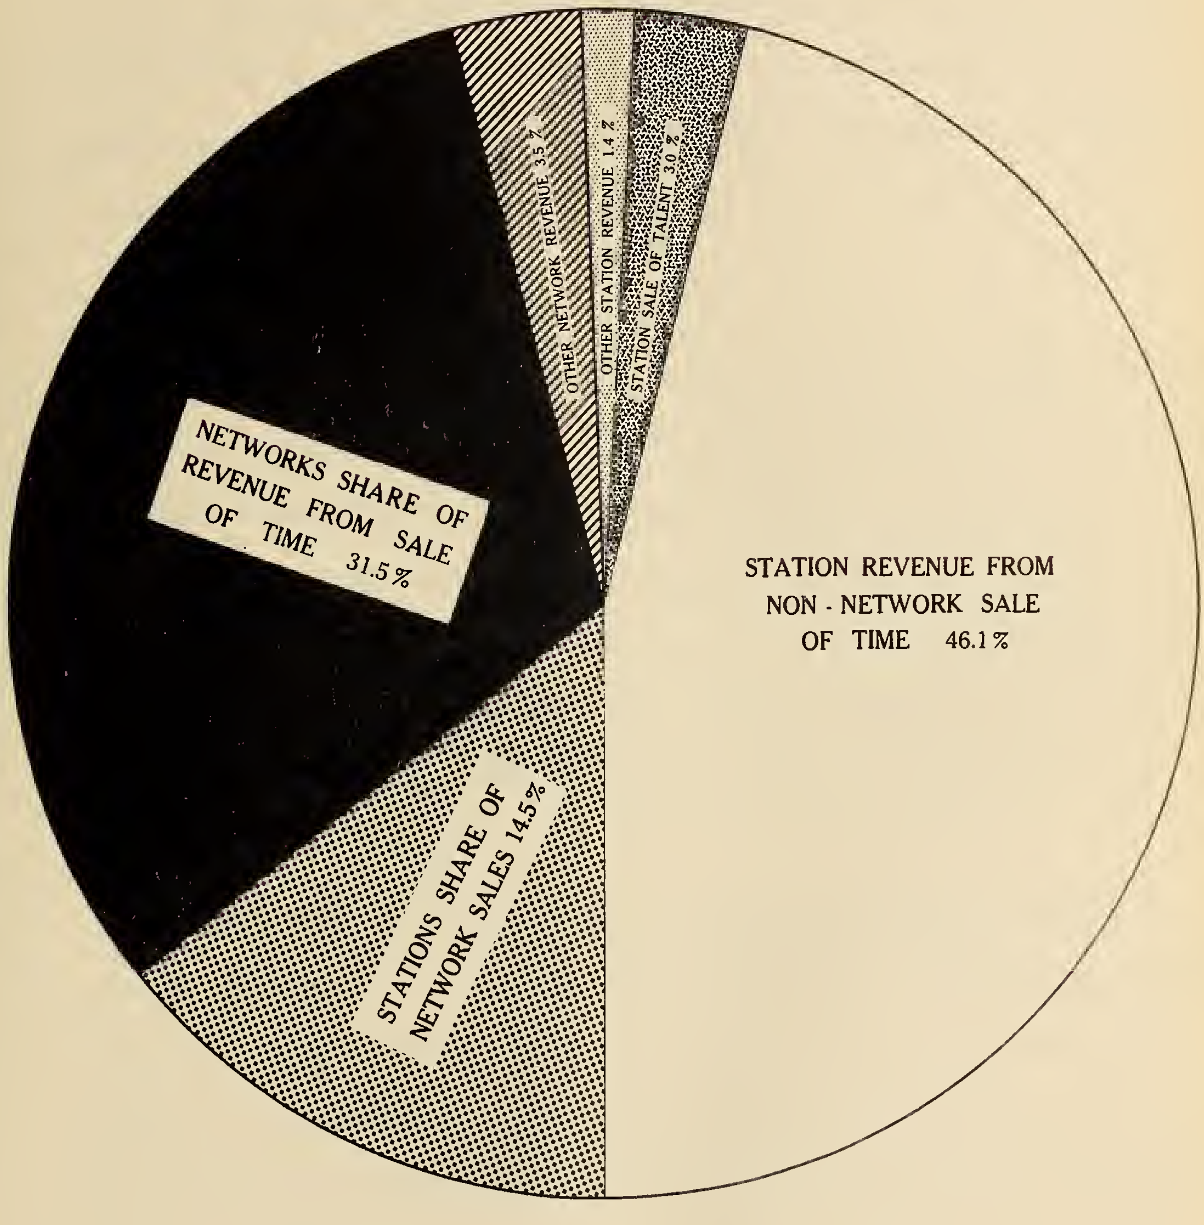
1/ Revenue from sale of talent and "other" revenue are combined for networks.

NETWORK REVENUE

All network sales reported here were made by eight national and regional networks. The $39,737,867 received by these eight organizations represent net billings, i.e. gross billings after time and other promotional discounts have been deducted. Agency and cash discounts, however have been considered as expenses and hence are included in the dollar figures given here.

The time sold by networks is time over individual broadcast stations with which networks have contractual agreements. The network provides a sales organization, connecting wire facilities, sustaining programs for developing listener interest, and other items of value to individual stations. In addition a portion of the revenue received from network advertisers is paid to the stations for carrying these commercial programs. In 1935, the sum of $12,521,832, or 31.5 per cent of total network net sales, was paid out to individual stations. All sales through networks were made to national or regional advertisers.

CHART I — RELATIVE IMPORTANCE OF SOURCES OF RADIO REVENUE, 1935



TOTAL 1935 REVENUE $86,492,653

Networks received $2,983,245 from the sale of talent and other sources in 1935. This represents only the amount received directly by networks. It does not include the sums received by artists' bureaus and other agencies set up as separate organizations even though such organizations worked in close harmony with particular networks. Many radio performers, representing advertisers over network hook-ups, are employed directly by the respective advertisers. Naturally, no part of the salaries of such performers is included in network revenue.

STATION REVENUE

Net revenue in 1935 of the 557 regular commercial broadcast stations and the four experimental stations reporting to the Bureau of the Census amounted to $56,293,373. Of this sum $39,879,676, or 71 per cent of the total, was received from the direct sale of time by individual stations. An additional $12,521,832 was received from radio networks as payment for carrying network commercial programs. The sum of $2,597,708 was received from the sale of the services of station talent, and $1,294,157 from other sources.

Revenue from the sale of time by individual stations was further divided between sales made to national and regional advertisers and local advertisers as defined in Section 2. Revenue from local advertisers amounted to $26,074,476 and that from national and regional advertisers $13,805,200. Thus the amount received from local advertisers was almost double the amount received from direct sales to national and regional advertisers. Detailed data for individual states and cities are to be found in Table 1 at the end of this report.

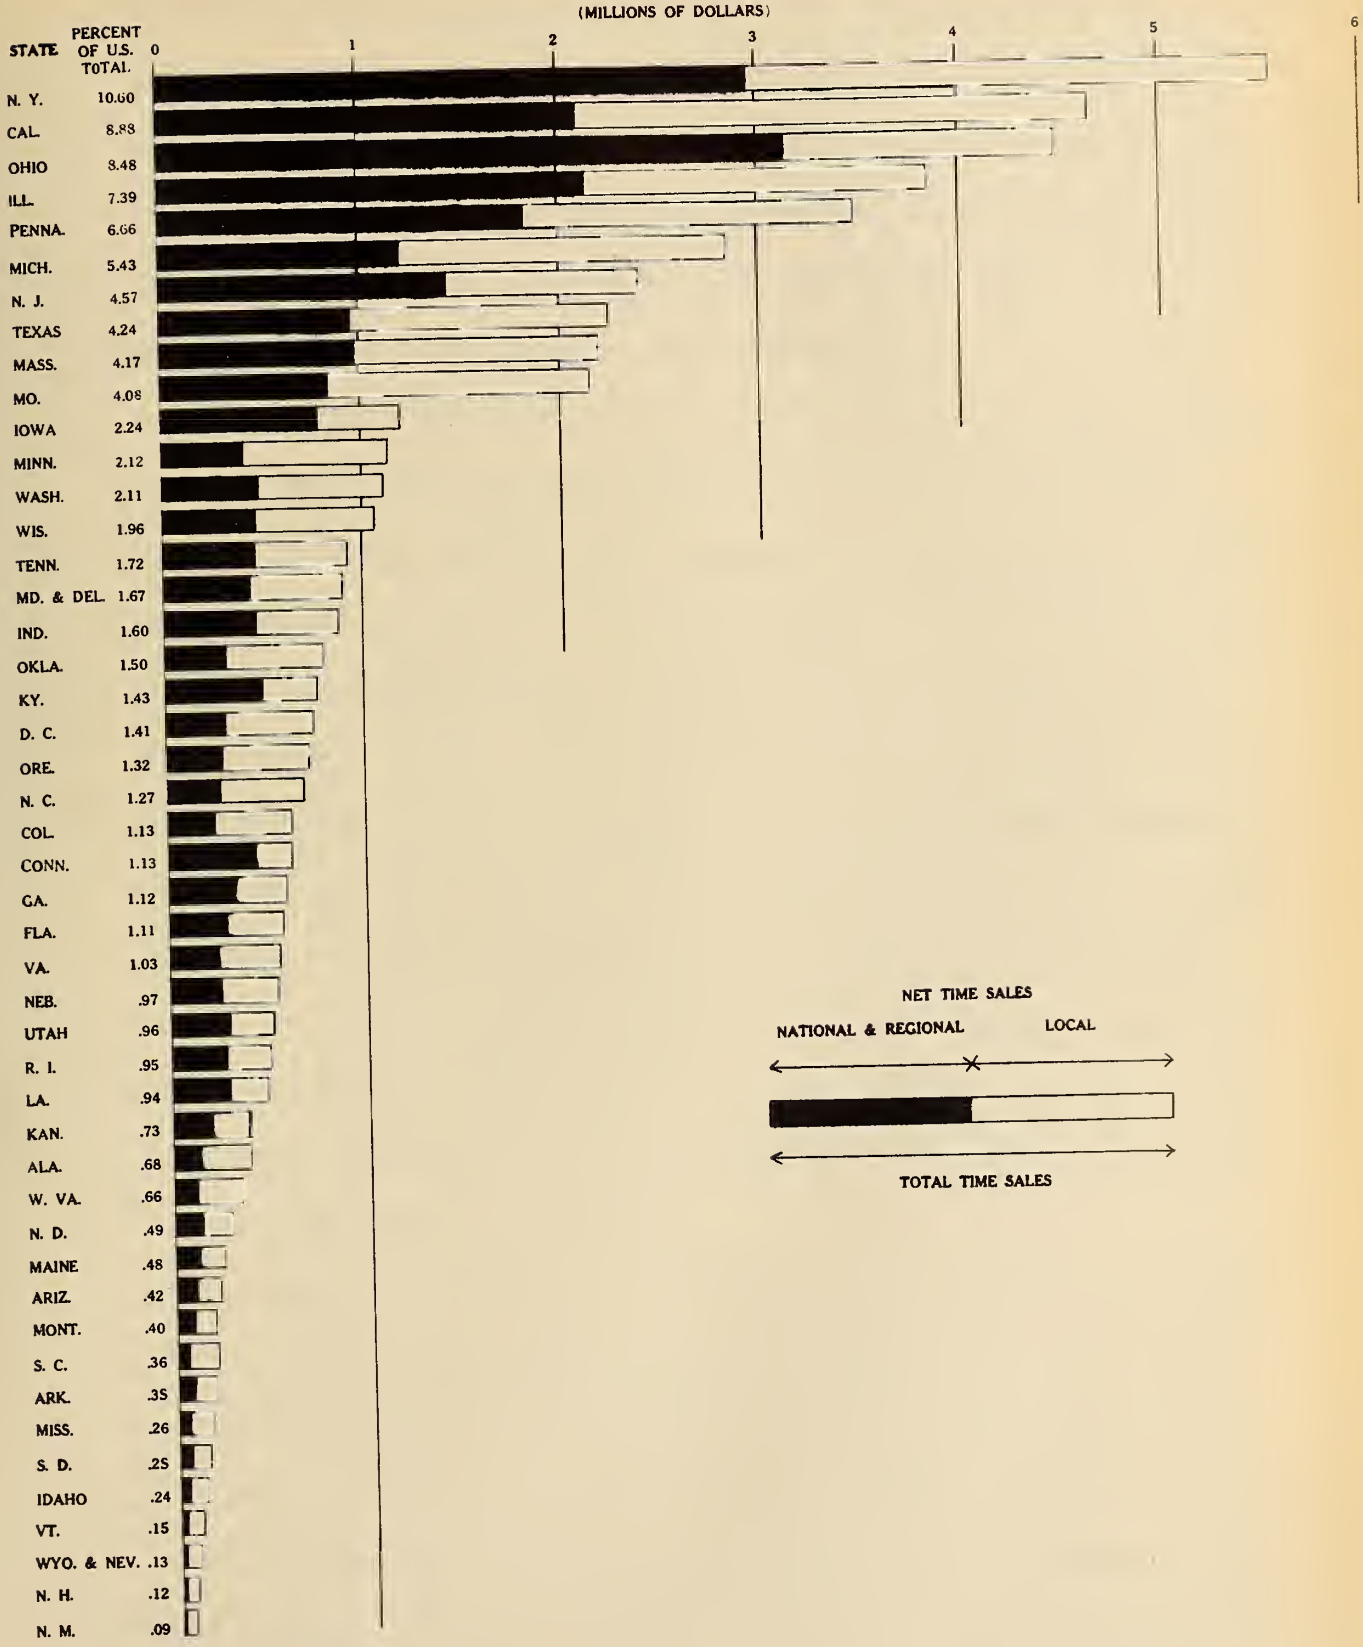
Position of States and Regions.---Broadcast stations located in New York State received $5,546,064 from the sale of time, or 10.6 per cent of the total. California stations stood second with 8.88 per cent of the total and Ohio third 8.48 per cent. In respect to revenue received from national and regional advertisers and from radio networks Ohio stations stood first with 12.3 per cent of total national and regional revenue. New York was second with 11.14 per cent, Illinois third with 8.04 per cent, and California with 7.82 per cent was fourth. Chart II (page 21) shows in graphic fashion the relative position of each State in total time sales as well as in national and regional revenue and local revenue.

The distribution of revenue by geographical areas shows a high degree of concentration in the East North Central and Middle Atlantic regions. The five states, Illinois, Indiana, Michigan, Ohio, and Wisconsin, comprising the East North Central region, accounted for almost one-fourth (24.86 per cent) of the time sales of all stations. These same stations did 28.34 per cent of the total national and regional business and 21.34 per cent of the local business. Of their own total business, 57.3 per cent was national and regional and 42.7 local.

The Middle Atlantic States of New Jersey, New York, and Pennsylvania, received more than one-fifth (21.83 per cent) of total revenue. Of this total revenue, 54.1 per cent represented national and regional business and 45.9 per cent local business. Almost one-fourth (23.48 per cent) of all national and regional business and 20.16 per cent of all local business was done in these three states. Together, the eight States in the East North Central and Middle Atlantic regions accounted for 46.69 per cent of total broadcast station revenue.

Division of Station Time Sales Between National and Regional Non-network and Local Advertising.---Individual States and regions vary considerably in the relative position of national and regional advertising and local advertising. Vermont, with 86.4 per cent of total revenue coming from local

CHART II - COMPARISON OF BROADCAST STATION NET TIME SALES, 1935



advertisers was first among all States in the proportion of local revenue to the total. Ohio stations with only 27 per cent of total revenue received from local advertisers held the lowest relative position in this respect. States receiving more than 70 per cent of their total revenue from local advertisers included Vermont, Wyoming and Nevada, Idaho, New Mexico, Alabama, South Carolina, and South Dakota.

The Mountain States as a group, with 61 per cent of total station revenue coming from local advertisers, stood first in this respect. Stations in the East North Central region received only 42.6 per cent of their time sales revenue from local advertisers. The low relative position of local advertising in the East North Central region is due almost entirely to Ohio stations with only 27 per cent of total time sales being made to local advertisers. Ohio has long been considered the typical American market by many national advertisers. As a result, that State has often been selected for test campaigns by large advertisers. In addition, the most powerful broadcast station in the United States is located in Ohio. These two factors perhaps are of major significance in accounting for the high relative position of national and regional advertising in this State.

In addition to the East North Central region, stations in the Middle Atlantic and East South Central States as a group received less from local than from non-local advertisers. The more populous areas seemed to attract a greater proportion of national and large regional advertisers.

The position of national and regional and local advertising for each region is given in Table B. Data for each State are given in Table 1 in the appendix. It is interesting to note that for the United States as a whole the national and regional business of stations, including their share of network business, was almost identical with the local business. National and regional advertising amounted to 50.3 per cent, and local 49.7 per cent of the total.

TABLE B -- COMPARISON OF NATIONAL AND REGIONAL ADVERTISING AND LOCAL ADVERTISING BY GEOGRAPHIC DIVISIONS
(In Thousands of Dollars)

Area	Net Revenue From Sale of Time		
	Total	National and Regional 1/	Local
UNITED STATES			
Total Time Sales	$52,325	$26,321	$26,004
Per cent of Total	100.0%	50.3%	49.7%
New England			
Total Time Sales	3,664	1,812	1,852
Per cent of Total	100.0	49.5	50.5
Middle Atlantic			
Total Time Sales	11,423	6,180	5,243
Per cent of Total	100.0	54.1	45.9
East North Central			
Total Time Sales	13,008	7,460	5,548
Per cent of Total	100.0	57.4	42.6
West North Central			
Total Time Sales	5,690	2,597	3,093
Per cent of Total	100.0	45.6	54.4
South Atlantic			
Total Time Sales	4,514	2,016	2,498

East South Central			
Total Time Sales	2,140	1,107	1,033
Per cent of Total	100.0	51.7	48.3
West South Central			
Total Time Sales	3,684	1,635	2,049
Per cent of Total	100.0	44.4	55.6
Mountain			
Total Time Sales	1,760	686	1,074
Per cent of Total	100.0	39.0	61.0
Pacific Coast			
Total Time Sales	6,442	2,828	3,614
Per cent of Total	100.0	43.9	56.1

1/ Represents time sales by stations plus the amounts received by stations for carrying the commercial programs of networks.

In comparing these two items it should be remembered that national and regional business represents not only the non-local station spot business, but also the amounts received from networks for carrying network commercial programs and that all revenue figures are in terms of net rather than gross billings. (See definition of terms, Section 11). Since time discounts are more common in national than in local advertising, gross billings figures would probably increase the relative position of national and regional business.

EMPLOYMENT AND PAY ROLL

Radio networks and stations together employed an average of 14,561 persons with an annual pay roll in 1935 of $26,911,392. Only five of the eight networks reported separate employment, the other three allocating their personnel to affiliated stations. The five networks making separate reports for personnel, employed 2001 persons with an annual pay roll of $5,420,279.

TABLE C -- SUMMARY OF EMPLOYMENT AND PAY ROLL

(Dollar figures expressed in thousands)

Source	No. of Employees	Pay Roll Total	Pay Roll Full-time	Pay Roll Part-time
UNITED STATES	14,561	$26,911	--	--
Networks	2,001	5,420	--	--
Regular Stations	12,484	21,410	$19,719	$1,691
Experimental Stations	76	81	68	13

The 561 broadcast stations employed an average of 12,560 persons with an annual pay roll of $21,491,113. Four of these stations were experimental and should not be compared with regular commercial stations. These four experimental stations employed an average of 76 persons, with a pay roll in 1935 of $80,754. About 92 per cent of the annual pay roll of all stations was paid to full-time employees.

In addition to the number of paid employees, station personnel was enhanced by 72 individual proprietors and 39 partners. Compensation for these was not included in the reported pay roll figures. In measuring total personnel of commercial broadcast stations the 111 proprietors and firm members should be added to the number of paid employees.

TABLE D -- COMPARISON OF STATION EMPLOYMENT, PAY ROLLS, AND TIME SALES BY REGIONS

Area	Per cent of U. S. Total		
	Avg. No. of Employees	Total Pay Roll	Time Sales
UNITED STATES	100.00%	100.00%	100.00%
New England	5.82	6.38	7.00
Middle Atlantic	19.35	21.27	21.83
East North Central	22.20	26.95	24.86
West North Central	12.76	10.06	10.88
South Atlantic	7.71	7.21	8.63
East South Central	4.95	4.04	4.09
West South Central	7.85	6.13	7.04
Mountain	3.49	2.96	3.36
Pacific Coast	15.87	15.00	12.31

Comparison of Employment, Pay Rolls, and Revenue.---Stations in the Pacific Coast States paid more for personnel per dollar of time sales than stations in any other region. The 1935 pay roll of Pacific Coast stations amounted to 15 per cent of the total pay roll of all stations while they received only 12.3 per cent of total time sales. The East North Central region stood second in this respect. The South Atlantic stations on the average paid their personnel less per dollar of time sales than stations in any other region. In general, however, a rather constant ratio existed between station pay roll and time sales in all regions. Data for each region are presented in Table D.

Employment by Months.---The number of employees of the 557 regular commercial broadcast stations ranged from a low of 11,743 in January, 1935, to a high of 13,367 in December. There was a small decline of employment in the months of June, July, and August, but aside from these months, employment figures show a steady increase from January to December. The gross increase amounted to 1,624 employees. There were 31 stations that started operations after January and these accounted for part of the increase in employment. These 31 stations, however, employed only 369 persons in December, 1935, and hence accounted for only a small part of the total increase in station personnel.

Employment figures for each month of 1935 were as follows:

Month	Avg. Number of Employees	Month	Avg. Number of Employees
January	11,743	July	12,166
February	12,041	August	12,175
March	12,307	September	12,483
April	12,369	October	13,138
May	12,372	November	13,275
June	12,364	December	13,367

Monthly employment data for each State and Geographical Division in the United States are given in Table 2 at the back of this report.

Weekly Employment By Functional Classes.---In order that an analysis of the number and average wage of employees might be made, broadcast stations were asked to report their actual employment and pay roll for one representative week. The week ending October 26, 1935 was suggested, although not all stations adhered to that period. Employment and pay roll data were reported separately for the following functional employees: executives, supervisors, office and clerical, technicians, artists, announcers, and "other". Unfortunately, no separate classification was provided for salesmen which necessitated the inclusion of employees primarily engaged in selling in with "other" employees.

As has been pointed out the classification of employees into different functional groups cannot be clear cut or absolute. Many workers perform a variety of functions. An employee of a small station may be technician, announcer, and salesman. However, he is classified in only one group--classification being based upon the function which demanded the major portion of his time. Under these circumstances, and also because individual proprietors and partners are not included in the functional breakdown given here, a number of stations report no executives and some report no supervisory officers.

In spite of the difficulties of obtaining absolute clarity in the functional classification of employees, the data presented here should provide a fairly accurate measure of the functional distribution of employees and the average weekly pay of each group. Averages should not be accepted as representing the position of individual employees or of individual stations. They do, however, give an indication of the position of functional groups within the industry and the position of the industry with other industries.

The actual number of full-time and part-time employees reported by the 557 stations for a representative week in 1935 amounted to 13,139 persons. Of this number, 10,335 (78.7 per cent) were men and 2,804 (21.3 per cent) were women. The 2,852 part-time employees accounted for 21.7 per cent of the total number, but received only 9.6 percent of the weekly pay roll. The total pay roll for the representative week, for both full-time and part-time employees, amounted to $429,401.

TABLE E -- ANALYSIS OF EMPLOYMENT AND PAY ROLLS - BROADCAST STATIONS ONLY
(Based on Representative Week) 1/

Classification	All Employees 2/ (One Week)		Full-time Employees			Part-time Employees		
	Number	Pay Roll	Number	Pay Roll		Number	Pay Roll	
				Total	Average		Total	Average
Total 557 Stations	13,139	$429,401	10,287	$388,068	$38	2,852	$41,333	$15
Executives	476	43,537	437	42,079	96	39	1,458	37
Supervisor	703	43,197	690	42,825	62	13	372	29
Office and Clerical	2,149	50,552	2,035	49,349	24	114	1,203	11
Station Technicians	2,451	84,803	2,360	83,609	35	91	1,194	13
Station Talent:								
Artists	4,169	114,270	1,999	82,026	41	2,170	32,244	15
Announcers	1,695	46,412	1,556	45,027	29	139	1,385	10
Other 3/	1,496	46,630	1,210	43,153	36	286	3,477	12

1/ Figures shown are for week ending October 26, 1935, except where such period was not representative. In such cases one week of representative employment is given.

2/ Does not include entertainers and other talent supplied by advertisers, nor employees of radio networks.

3/ "Other" includes employees not otherwise classified. Persons performing a variety of functions where no one function requires a major portion of the employee's time, and continuity writers, are included here. Salesmen are also listed as "other".

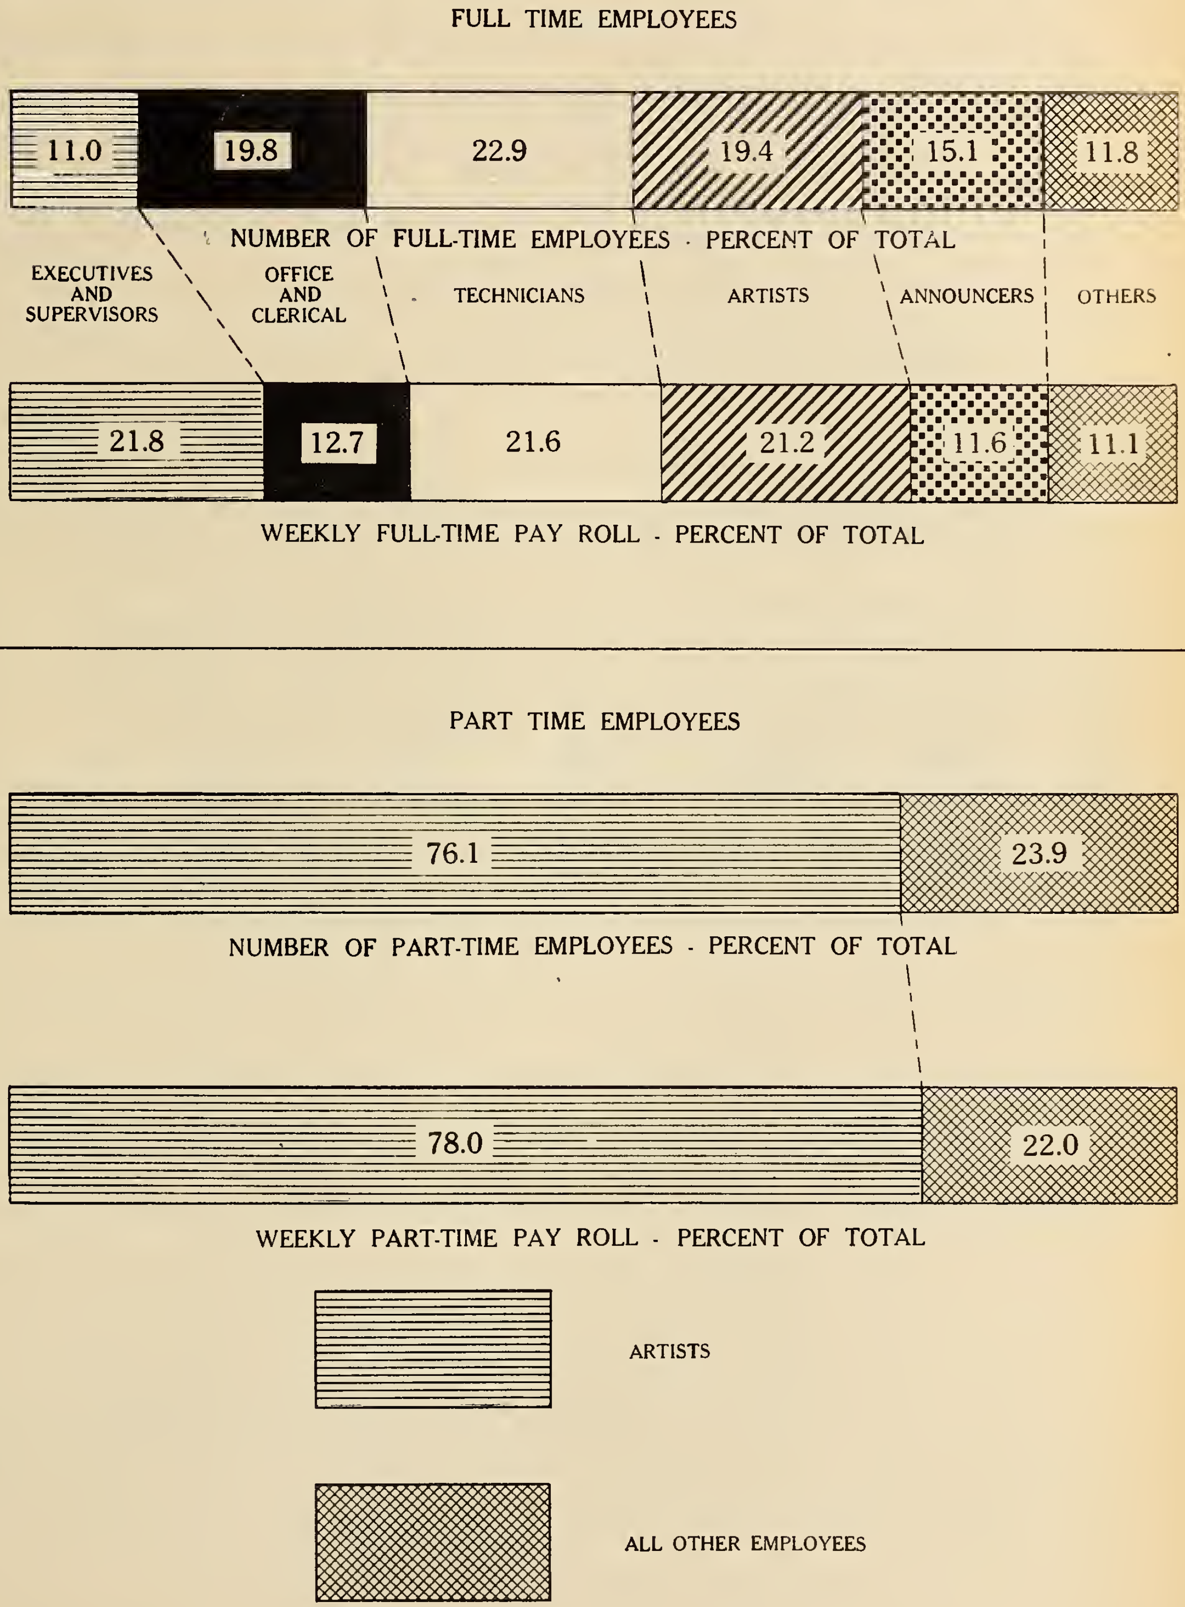
Functional employment data for the 557 regular commercial broadcast stations reported here are presented in Table E. Artists accounted for 31.7 per cent of the total number of employees and 26.6 per cent of the total weekly pay roll. This was greater, both in number and pay roll, than any other single group. Of the 4,169 artists, more than one-half (52 per cent) were employed on a part-time basis. They accounted for 76 per cent of all part-time employees and 78 per cent of the total weekly part-time pay roll. Thus, artists represented the major element in the part-time employment of broadcast stations.

The average weekly wage of artists was surpassed only by executives and supervisors. Full-time artists received an average wage of $41 per week and part-time artists $15 per week. It must be remembered that artists employed directly by advertisers or by radio networks are not included here. These data apply to station personnel only. If artists employed by networks were included the average wage would be still higher.

Station technicians accounted for the second largest group of employees both in number and weekly pay roll. Technicians on a full-time basis received more total pay than any other group of full-time employees although the average wage of $35 per week exceeds only the weekly average for office employees and announcers. More than 96 per cent of all technicians were on a full-time basis.

Executives received the highest average weekly wage and supervisors were second. In total weekly income, however, these two groups were at the bottom of the list. It should be remembered, that if the 111 individual proprietors and partners were included the relationships would be slightly changed.

CHART III - COMPARISONS OF NUMBER AND WEEKLY PAY OF DIFFERENT FUNCTIONAL EMPLOYEE GROUPS BROADCAST STATIONS, 1935



Office and clerical employees were third both in number and total weekly pay. However, their average weekly wage was less than that of any other group.

Chart III (Page 31) shows in graphic fashion the relative position of the full-time employees in each functional group in respect to both number and compensation. Similar data for each geographical division are presented in Table F. Persons familiar with the radio broadcasting industry will be able to account for most of the differences in average wages shown by regions.

TABLE F -- NUMBER AND AVERAGE WEEKLY WAGE OF FULL-TIME EMPLOYEES BY REGIONS

Area	Executives & Supervisors		Office & Clerical		Technicians		Artists		Announcers		Other	
	Number	Avg. Wage Per Week	Number	Avg. Wage Per Week	Number	Avg. Wage Per Week	Number	Avg. Wage Per Week	Number	Avg. Wage Per Week	Number	Avg. Wage Per Week
UNITED STATES	1,127	$75	2,035	$24	2,360	$35	1,999	$41	1,556	$29	1,210	$36
New England	70	98	149	24	170	34	58	59	113	26	90	40
Middle Atlantic	193	93	446	24	489	40	354	43	275	31	285	42
E.North Central	211	86	492	27	482	40	657	55	322	34	225	37
W.North Central	139	63	262	23	244	32	302	25	182	28	118	36
South Atlantic	126	59	178	24	254	35	75	22	168	26	100	27
E.South Central	60	80	60	21	108	31	42	24	83	26	72	20
W.South Central	103	52	125	20	205	29	122	22	166	24	104	33
Mountain	58	58	71	20	111	32	12	28	65	26	32	40
Pacific Coast	167	73	252	25	297	34	377	38	182	30	184	33

Unfortunately, the Census questionnaire did not include a separate classification for salesmen. Twenty-seven stations, however, reported the number and compensation of their salesmen. There were one or more stations in each power group that gave the separate report. They employed 87 salesmen with a total compensation for the representative week of $3,329 or an average per person of $38.26. The range in pay was from an average of 23 to 88 dollars per week.

Variation in average rates of pay by regions was quite marked for some functional groups, while lesser variation was evident for other groups.

Office and clerical employees, and announcers fared best in the East North Central region. Technicians in the East North Central and Middle Atlantic regions received the same average weekly rate of pay.

Functional employment information for each State and for homogeneous groups of stations is presented in tables in the appendix. A detailed analysis of employment can be made from such data by those interested in that type of information.

Section 4

INFLUENCE OF POWER, NETWORK AFFILIATION, SIZE OF COMMUNITY AND OTHER FACTORS ON BROADCAST STATION BUSINESS

Many people have assumed that wattage is the most important asset of a broadcast station. It has been felt that increased wattage would mean increased income and greater profits. However, station income is influenced by many factors, not the least of which are management, affiliation with networks, and the character of the market served.

So many elements are involved in management that no real measure of this factor has yet been devised. It is possible, however, to obtain some measure of the influence of other factors on broadcast station business. Census data have therefore been classified so that a careful analysis of various forces might be made. It is not our purpose to go deeply into the interpretation of these data, but rather to present them in such a fashion that interested persons can make their own analysis and interpretation.

In analyzing data presented on the basis of station power, relationship with networks, size of community served, etc., it must be remembered that these various forces overlap a great deal. Thus high power stations are located in the larger cities and are also usually affiliated with a network. It is therefore difficult to determine which of these forces is most significant. However, the classification of stations into these various groups is not without some value, hence space is given here to present such a breakdown.

POWER

REVENUE

It is natural that low power stations should constitute the bulk of broadcast stations in the United States. If this were not so under the present technical limitation of broadcasting, either the number of stations would of necessity be reduced or time on the air would be shared by a number of stations. Consequently the 238 stations operating with a minimum power of 100 watts or less constituted 42.8 per cent of all commercial broadcast stations. These did only 11.4 per cent of the total business. There were 37 stations in the 200 and 250 watt group. (Only two operated with 200 watts power). The number in this group represented 6.6 per cent of the total and did 2.7 per cent of all station business. In the next group, for the most part 500 watters, were 94 stations, or 16.9 per cent of the total number and they did 13.5 per cent of the total business. Thus the stations operating with a minimum power of less than 1,000 watts represented two-thirds (66.3 per cent) of all stations, but did only slightly more than one-fourth (27.6 per cent) of the total business.

There were 62 stations with power of 5,000 watts or more. These represented 11.1 per cent of all stations, but did 40.5 per cent of total station business. In this latter group, however, the 33 stations (5.9 per cent of the total number) operating with power of 50,000 watts or more did 32.4 per cent of all business. Revenue data for stations, grouped according to power, are given in Table G. Here, as in all other tables where not otherwise specified, national and regional revenue refers to the spot business of stations plus the amounts received for carrying the commercial programs of networks.

TABLE G -- BROADCAST STATION TIME SALES BY POWER GROUPS
(All dollar figures expressed in thousands)

	Number of Stations		Net Revenue From Sale Of Time					
Power in Watts	Total	% of Total	Total		National and Regional		Local	
			Amount	% of Total	Amount	% of Total	Amount	% of Total
UNITED STATES	557	100.00	$52,325	100.00	$26,321	100.00	$26,004	100.00
100 or less	238	42.8	5,986	11.44	758	2.87	5,228	20.10
101 - 250	37	6.6	1,431	2.74	283	1.08	1,148	4.41
251 - 999	94	16.9	7,035	13.44	2,454	9.32	4,581	17.62
1,000 - 4,999	126	22.6	16,702	31.92	7,788	29.59	8,914	34.28
5,000 - 9,999	16	2.9	1,902	3.63	837	3.18	1,065	4.10
10,000 - 49,999	13	2.3	2,298	4.39	1,415	5.38	883	3.40
50,000 and over	33	5.9	16,971	32.44	12,786	48.58	4,185	16.09

It is interesting to note that as power increases the relative importance of local advertising decreases. Stations with power of less than 1,000 watts accounted for only 27.6 per cent of total station time sales, but for 42.1 per cent of time sales to local advertisers. Stations with 50,000 watts or more accounted for only 16.1 per cent of the local business although they did 32.4 per cent of all business.

EMPLOYMENT

The number of persons employed and the average compensation per person increased with the power of the station. Just how much of this increase was due to station power and how much to other factors such as size of community, network affiliation, etc., is not apparent. Pay roll data for different power groups are presented in Tables 1-A and 3-A in the appendix.

The average weekly pay to persons who, for the most part, performed similar functions increased with the power of stations. Table H presents the average weekly wage of full-time employees by functional classes for each power group.

TABLE H -- NUMBER AND AVERAGE WEEKLY WAGE OF FULL-TIME EMPLOYEES BY POWER GROUPS

NETWORK AFFILIATION AND POWER

REVENUE

Only about one-third (34.8 per cent) of all commercial broadcast stations were affiliated with a regular network as of December 31, 1935. Yet these stations did 74.5 per cent of total 1935 station business. Of major significance, however, was the fact that most of the larger stations were network affiliates. Of the 62 stations operating wth power of 5,000 watts or more, 58 (or all but 4) were affiliated with a network. These 58 statons did more than half (52.3 per cent) of the business of all affiliated stations. Detailed revenue data, given separately for affiliated and non-affiliated stations are presented in Table I.

TABLE I -- BROADCAST STATION TIME SALES BY NETWORK AFFILIATION AND POWER
(All dollar figures expressed in thousands)

Affiliation and Power in Watts	No. of Stations	Net Revenue From Sale Of Time					
		Total		National and Regional		Local	
		Amount	% of Total	Network	Non-Network	Amount	% of Total
UNITED STATES	557	$52,325	100.00	$12,522	$13,799	$26,004	100.00

5,000 and over	62	21,171	40.46	6,691	8,347	6,133	23.59
Network Affiliation	194	38,999	74.53	12,522	11,893	14,584	56.08
100 or less	17	885	1.69	218	110	557	2.14
101 - 999	42	4,770	9.12	1,371	911	2,488	9.57
1,000 - 4,999	77	12,942	24.73	4,242	2,964	5,736	22.06
5,000 and over	58	20,402	38.99	6,691	7,908	5,803	22.31
No Network Affiliation	363	13,326	25.47		1,906	11,420	43.92
100 or less	221	5,101	9.75		430	4,671	17.96
101 - 999	89	3,696	7.06		455	3,241	12.47
1,000 - 4,999	49	3,760	7.19		582	3,178	12.22
5,000 and over	4	769	1.47		439	330	1.27

It is impossible to say whether network affiliates receive a greater income per station because they are affiliated with a network or whether they have been chosen by networks because they have already attracted a larger following. This can be answered by a study of case histories, but such studies do not come within the scope of the Census.

Local Advertising.---It is quite evident from Census data that non-affiliated stations in each power group receive a much greater proportion of their total revenue from local advertisers than is true of affiliated stations. The 100 watt group of non-affiliated stations received 91.5

per cent of their time sales revenue from local advertisers. The comparable figure for affiliated stations was only 62.9 per cent. Eliminating network revenue, the 100 watt affiliated stations received 83.5 per cent of their non-network time sales revenue from local advertisers.

With each increase in the power of stations the relative importance of local advertising diminished, but at a lesser rate for non-affiliated than for affiliated stations. Table J shows the relative importance of local advertising revenue from affiliated and non-affiliated stations in each power group.

TABLE J -- RELATIVE IMPORTANCE OF LOCAL ADVERTISING REVENUE OF AFFILIATED AND NON-AFFILIATED STATIONS

Local Advertising and Network Affiliation	All Stations	Power of Stations in Watts			
		100 & Under	101-999	1,000-4,999	5,000 & over
Local Advertising					
Per cent of Total Time Sales					
All Stations	49.7%	87.3%	67.7%	53.4%	28.9%
Network Affiliated	37.4	62.9	52.1	44.3	28.4
Non-Affiliated	85.7	91.5	87.7	84.5	42.9
Per cent of Non-network Time Sales					
All Stations	65.3	90.6	80.7	71.5	42.4
Network Affiliated	55.1	83.5	73.2	65.9	42.3
Non-Affiliated	85.7	91.5	87.7	84.5	42.9

The non-affiliated stations did only 25.5 per cent of all station business yet they accounted for 43.9 per cent of all local business. Affiliated stations, of course, were the only ones that received a share of network sales. They also received the bulk of the national and regional non-network business. More than 86 per cent of all such business was done by affiliated stations. Apparently affiliation with a network is helpful in attracting the spot business of national and regional advertisers.

TABLE K — BROADCAST STATION EMPLOYMENT AND PAY ROLL, BY AFFILIATION AND POWER

(All dollar figures expressed in thousands)

5,000 and over	4	132	347	1.62	344	1.74	3

EMPLOYMENT

Network affiliated stations employed more persons, had a higher annual pay roll, and paid higher average wages than non-affiliated stations. This was, at least in part, due to the presence of larger stations and their location in larger cities. Compared with revenue, however, affiliated stations received more income per person employed and per dollar pay roll than non-affiliated stations. The former employed 58.2 per cent of all station employees, paid out 67.2 per cent of total station pay roll, but received 74.5 per cent of total station time sales revenue.

Data showing employment, annual pay roll, and average weekly pay for different functional groups are given in Tables K and L.

TABLE L -- EMPLOYMENT AND WEEKLY PAY ROLL OF FUNCTIONAL GROUPS, BY NETWORK AFFILIATION

POWER AND SIZE OF COMMUNITY

REVENUE

More than one-fourth (27.6 per cent) of all commercial broadcast stations were located in communities with a population of less than 25,000, but they received only 5.6 per cent of all broadcast station revenue. The majority (66.2 per cent) of these stations operated with power of 100 watts or less. Only 13.6 per cent of the stations had a power of 1,000 watts or more.

The higher power stations were naturally concentrated in the larger cities. Two-thirds (20 stations) of the 50,000 or more watts stations were located in cities with 400,000 or more population and they received 24.9 per cent of all broadcast station revenue. Only two stations with 50,000 watts power were located in cities of under 100,000 population. Detailed revenue data for stations in different sized communities are shown in Table M.

It should be noted that the revenue per station increased with the size of the community. The 111 stations (19.7 per cent of total) located in the 17 cities of 400,000 population and over did over one-half (51.9 per cent) of all station business.

A fairer measure of the influence of the size of the community on revenue is to compare stations of like power located in different communities. Table N shows the correlation between revenue and size of community for two power groups.

TABLE M -- BROADCAST STATION TIME SALES BY SIZE OF COMMUNITY AND POWER

(All dollar figures expressed in thousands)

TABLE N -- CORRELATION OF SIZE OF COMMUNITY AND REVENUE

Revenue Frequency	No. of Stations	Number of Stations in Each Population Group (Population in thousands)				
		Under 25	25 - 49	50 - 99	100 - 399	400 & Over
100 Watt Stations United States	238	102	44	34	34	24
Less than $5,000	17	14	3	--	--	--
$5,000 - 9,999	48	36	7	2	1	2
10,000 - 24,999	86	41	15	10	13	7
25,000 - 49,999	56	11	16	13	13	3
50,000 - 99,999	25	--	3	9	5	8
100,000 and over	6	--	--	--	2	4
1,000 - 4,999 watts United States	126	18	15	17	42	34
Less than $5,000	--	--	--	--	--	--
$5,000 - 9,999	2	2	--	--	--	--
10,000 - 24,999	8	5	1	--	--	2
25,000 - 49,999	15	4	6	4	1	--
50,000 - 99,999	36	6	5	9	11	5
100,000 and over	65	1	3	4	30	27

It is interesting to note that for both power groups analyzed in Table N, 81.7 per cent of those stations located in the smallest community group did less than $25,000 of business per year while only 19.0 per cent of those stations in the largest community group did less than $25,000 of business in 1935.

Of the 100 watt stations in communities of under 25,000 population, 89.2 per cent did less han $25,000 business in 1935 while only 38.9 per cent of the 1,000 to 4,999 power group, located in the same size community classification, did less than $25,000 of business. It would seem, therefore, that both power and market influenced the amount of business done by a station.

Local Advertising.---The amount of local advertising done by broadcast stations is not influenced as much by the size of the community as by power and network affiliation. Table O shows the relative importance of local advertising of different power groups by size of community.

TABLE O -- RELATIVE IMPORTANCE OF LOCAL ADVERTISING REVENUE OF STATIONS BY SIZE OF COMMUNITY

Local Advertising and Size of Community	Power of Stations in Watts			
	100 & Under	101 - 999	1,000 - 4,999	5,000 & over
Local Advertising				
Per cent of Total Time Sales				
Under 25,000 (Population)	90.3%	83.1%	48.0%	1/
25,000 - 49,999	83.1	75.0	58.2	1/
50,000 - 99,999	81.3	71.0	52.5	45.5%
100,000 - 399,999	84.5	61.9	48.0	30.2
400,000 and over	96.1	69.1	57.2	26.8

1/ Combined with 1,000 - 4,999 power group to avoid disclosure of figures for individual stations.

It should be noted that the lower power stations obtain the bulk of their revenue from local advertisers regardless of the size of the community in which they operate. The relatively higher amount of local advertising of stations under 5,000 watts power operating in cities with a population of 400,000 or over is probably due to the fact that most of such stations were not affiliated with a network.

The figures for 101-999 watt stations in cities with population of 100,000 to 399,999, represented 22 affiliated and 21 non-affiliated stations. The 22 affiliated stations did 73.6 per cent of the business of the 43 stations. Local advertising of the 22 affiliated stations represented 51.7 per cent of their total business and 72.7 per cent of their non-network business. The 21 non-affiliated stations received 90.5 per cent of their total time sales revenue from local advertisers.

EMPLOYMENT

Both the number of employees and annual pay roll per station increased with the size of the community served. The pay per dollar of revenue, however, declined except for stations in the largest communities. In cities of under 25,000 population, stations received only 5.6 per cent of total station revenue and paid 6.4 per cent of total station annual pay roll. The percentage relationship was about the same in cities between 25,000 and 49,999 population. Stations in cities of over 400,000 population received 51.9 per cent of all revenue but paid 53.5 per cent of the annual pay roll. Detailed employment and pay roll data are given in Table P.

The average wage of persons performing similar functions increased without exception as the size of the community served increased. Detailed functional employment data by size of city and power groups are given in Table 3-B in the appendix.

SIZE OF STATIONS AS MEASURED BY REVENUE

More than one-half (55.5 per cent) of all radio stations did less than $50,000 of business each in 1935. These stations accounted for only 11.8 per cent of all 1935 stations business. Thirty of these stations, however, operated less than 12 months in 1935. Considering only those stations that operated during the entire year, 53 per cent received less than $50,000 annual revenue.

Stations with low revenue received most of their business from local advertisers. Those in the less than $50,000 group accounted for 20.3 per cent of all local advertising revenue. Of the total business of these stations, 85.1 per cent was from local advertisers.

TABLE Q -- CORRELATION OF POWER AND REVENUE

REVENUE GROUPS	No. of Stations	Number of Stations in Each Wattage Group					
		100 or less	101 - 999	1,000 - 4,999	5,000 - 9,999	10,000 - 49,999	50,000 & over
UNITED STATES TOTAL	557	238	131	126	16	13	33
Less than $5,000	21	17	4	--	--	--	--
$5,000 - 9,999	58	49	6	2	--	1	--
10,000 - 24,999	126	85	33	8	--	--	--
25,000 - 49,999	104	57	29	15	3	--	--
50,000 - 99,999	96	24	30	36	3	3	--
100,000 - 249,999	99	6	26	48	8	6	5
250,000 - 499,999	36	--	3	14	2	3	14
500,000 and over	17	--	--	3	--	--	14

Stations with low revenue were, in general, stations with low power. Thus, of the 309 stations with less than $50,000 revenue, 208 operated with 100 watts, 72 with 101 to 999 watts, 25 with 1,000 to 4,999 watts, and 4 with 5,000 watts or more. Only 25 of these stations were affiliated with a network. Table Q shows the correlation of power and revenue for all stations.

Detailed revenue, employment and pay roll data of stations in different revenue groups, are presented in Tables 1-B and 3-C in the appendix.

Section 5

TYPE OF RENDITION

The radio advertiser presents his program or his message either mechanically by the use of electrical transcriptions or records, or by the personal performance of his talent directly before the microphone.

The Bureau of the Census requested broadcast stations to break down both their national and regional non-network business and their local business in terms of the type of rendition used by advertisers. A large number of stations found it impossible to give complete answers to this request. Consequently the data presented here on type of rendition represent only a sample of all radio stations.

Little attempt is made to interpret the results of this sample. No extension of figures is made. The data given here include figures for only those stations that gave a breakdown. However, they are presented in such a manner that those interested in this phase of the broadcasting business can make a number of comparisons that may be of significance. Power, affiliation, size of community, and revenue groupings are given so that the sample can be weighted by comparison with the universe presented in Section 4.

LOCAL ADVERTISING

There were 289 broadcast stations, or 51.8 per cent of the total, that provided a breakdown of local advertising revenue by type of rendition. These stations did $13,393,000 of local business in 1935, or 51.5 per cent of all local business.

Mechanical rendition was not particularly popular with those local advertisers included in the above sample. Transcriptions accounted for only 11 per cent and records only 9.9 per cent of the total sample. Announcements, with 42.3 per cent, was first and programs, with 36.8 per cent, second.

TABLE R — LOCAL REVENUE DATA SHOWING TYPE OF RENDITION BY POWER AND NETWORK AFFILIATION GROUPS

Power and Affiliation	No. of Stations	Local Revenue in thousands				
		Total	Mechanical Rendition		Personal Rendition	
			Transcriptions	Records	Programs	Announcements
UNITED STATES TOTAL	289	$13,393	$1,467	$1,327	$4,930	$5,669
100 watts	133	2,836	241	524	752	1,319
101 - 999 watts	73	3,103	260	335	1,061	1,447
1,000 - 4,999 watts	57	4,048	488	316	1,501	1,743
5,000 - 49,999 watts	15	1,130	100	121	354	555
50,000 and over	11	2,276	378	31	1,262	605
Network Affiliated	83	6,810	805	292	2,711	3,002
100 watts	7	184	16	6	35	127
101 - 999 watts	20	1,123	155	58	333	577
1,000 - 4,999 watts	30	2,097	156	76	727	1,138
5,000 - 49,999 watts	15	1,130	100	121	354	555
50,000 and over	11	2,276	378	31	1,262	605
Non-network Affiliated	206	6,583	662	1,035	2,219	2,667
100 watts	126	2,652	225	518	717	1,192
101 - 999 watts	53	1,980	105	277	728	870
1,000 and over	27	1,951	332	240	774	605

The relative importance of different types of rendition varied with different power groups and with network affiliation. As power increased both programs and transcriptions tended to increase. Announcements were most popular on the lower powered stations, representing from 40 to 49 per cent of all local business done by the respondents. For those stations with the highest power rating, announcements constituted only 26.6 per cent of local business. The relative position of transcriptions increased and records decreased with power increase.

Table R gives the number of stations and type of rendition data of those stations in the sample that reported a breakdown of local revenue. It is interesting to note that network affiliation seemed to influence records more than any other type of rendition. Records constituted only 4.3 per cent of the local business of stations affiliated with networks while the comparable figure for the non-affiliated stations included in the sample was 15.7 per cent. Spot announcements seemed to be heaviest on affiliated stations.

TABLE S -- LOCAL REVENUE DATA SHOWING TYPE OF RENDITION BY SIZE OF COMMUNITY AND REVENUE GROUPS

Size of Community and Revenue	No. of Stations	Local Revenue in thousands				
		Total	Mechanical Rendition		Personal Rendition	
			Transcriptions	Records	Programs	Announcements
UNITED STATES TOTAL	289	$13,393	$1,467	$1,327	$4,930	$5,669
Size of Community						
Under 50,000 Population	129	2,066	265	280	429	1,092
50,000 - 99,999 (Pop.)	40	1,608	179	200	437	792
100,000 - 399,999 (Pop.)	60	2,781	293	245	939	1,304
400,000 and over (Pop.)	60	6,938	730	602	3,125	2,481
Revenue Grouping						
Less than $10,000	48	263	30	37	60	136
$10,000 - 24,999	67	972	84	225	209	454
25,000 - 49,999	59	1,741	198	239	405	899
50,000 - 99,999	46	2,355	238	330	682	1,105
100,000 - 249,999	45	3,238	257	322	1,217	1,442
250,000 - 499,999	17	2,531	347	174	1,086	924
500,000 and over	7	2,293	313	--	1,271	709

The size of the community served seemed to have a rather important influence on the relative position of programs, announcements and records. In the smaller communities, programs were relatively low and both announcements and records relatively high. As size of the community increased, programs represented a progressively greater proportion of total local business and announcements and records a progressively smaller proportion of local business. Transcription business did not change its relative importance appreciably. The same general trends held for stations classified by revenue groups. Table S presents the sample figures for both station groups.

NATIONAL AND REGIONAL SPOT ADVERTISING

There were 215 stations, or 38.6 per cent of the total, that provided a breakdown of national and regional non-network advertising revenue by type of rendition. These station did $4,971,000 of national and regional spot business in 1935, or 36 per cent of all such business. Thus, the sample presented here represents slightly more than one-third of both the number of stations and national and regional spot revenue.

Unlike local advertisers, national and regional advertisers favored mechanical rendition, slightly more than two-fifths (41 per cent) of all national and regional business being by means of transcriptions or records. Also unlike local advertisers, records were of little consequence, constituting only 1.3 per cent of all business. Because of this latter factor all data pertaining to records have been combined with transcriptions.

The influence of network affiliation did not seem to be as great here in influencing type of rendition as in the case of local advertising. Type of rendition sample data, for stations groups by power and affiliation, are given in Table T.

TABLE T -- NATIONAL AND REGIONAL SPOT REVENUE DATA SHOWING TYPE OF RENDITION BY POWER AND NETWORK AFFILIATION GROUPS

Power and Affiliation	No. of Stations	National and Regional Spot Revenue (In Thousands)			
		Total	Transcriptions	Programs	Announcements
UNITED STATES	215	$4,971	$2,043	$1,466	$1,462
100 watts	78	298	154	57	87
101 - 999 watts	56	729	293	163	273
1,000 - 4,999 watts	53	1,442	603	310	529
5,000 - 9,999 watts	10	252	149	35	68
10,000 - 49,999 watts	7	344	158	77	109
50,000 and over	11	1,906	686	824	396
Network Affiliated	87	4,132	1,683	1,242	1,207
100 watts	6	30	13	6	11
101 - 999 watts	23	417	196	58	163
1,000 - 4,999 watts	32	1,196	491	242	463
5,000 - 49,999 watts	15	583	297	112	174
50,000 and over	11	1,906	686	824	396
Non-network Affiliated	128	839	360	224	255
100 watts	72	268	141	51	76
101 - 999 watts	33	312	97	105	110
1,000 and over	23	259	122	68	69

The type of rendition varied materially with changes in the size of community served. Major change was in programs. In cities under 50,000 population 11.2 per cent of all national and regional spot business of those stations included in the sample, consisted of programs. The comparable figure for stations in cities of 400,000 population and over was 42.8 per cent. The same general situation existed for stations classified by revenue groups. Table U presents the sample figures for both station groups.

TABLE U -- NATIONAL AND REGIONAL REVENUE DATA SHOWING TYPE OF RENDITION BY SIZE OF COMMUNITY AND REVENUE GROUPS

Size of Community and Revenue	No. of Stations	National and Regional Spot Revenue (In Thousands)			
		Total	Transcriptions	Programs	Announcements
UNITED STATES	215	$4,971	$2,043	$1,466	$1,462
Size of Community					
Under 50,000 Population	96	447	224	50	173
50,000 - 99,999 (Pop.)	34	369	154	56	159
100,000 - 399,999 (Pop.)	53	1,528	775	235	518
400,000 and over (Pop.)	32	2,627	890	1,125	612
Revenue Grouping					
Less than $10,000	18	39	23	2	14
$10,000 - 24,999	45	150	79	23	48
25,000 - 49,999	45	206	101	26	79
50,000 - 99,999	43	470	192	108	170
100,000 - 249,999	43	1,433	716	220	497
250,000 - 499,999	15	1,247	474	391	382
500,000 and over	6	1,426	458	696	272

In analyzing the data presented here on type of rendition it must be remembered that they do not show totals for the industry, but represent a sample only. They must be treated as a sample study.

APPENDIX

* National and regional advertising represents the amount received by stations from networks as payment for network commercial programs carried by the stations as well as time sold directly by stations to national and regional advertisers. Network and non-network time sales are combined to avoid disclosure of individual figures.

** The average number of employees was arrived at by adding the number of full-time and part-time employees reported for the 15th of each month during the year 1935, and dividing by 12.

*** Data for the 2 stations in Delaware are combined with Maryland to avoid disclosure of individual figures.

**** Data for the 1 station in Nevada are combined with Wyoming to avoid disclosure of individual figures.

* National and regional advertising represents the amount received by stations from networks as payment for network commercial programs carried by the stations as well as time sold directly by stations to national and regional advertisers. Network and non-network time sales are combined to avoid disclosure of individual figures.

** The average number of employees was arrived at by adding the number of full-time and part-time employees reported for the 15th of each month during the year 1935, and dividing by 12.

1/Figures shown are for week ending October 26, 1935, except where such period was not representative. In such cases one week of representative employment is given.

2/Includes only the paid employees of commercial broadcast stations. Employees of radio networks are not included. Likewise, those employed by the advertiser, even though appearing on radio programs, are not included.

3/Data for District of Columbia and Maryland combined with Delaware.

4/Data for Nevada and Wyoming combined with Montana.

5/Data for Vermont combined with New Hampshire.

---

* Figures shown are for week ending October 26, 1935, except where such period was not representative. In such cases one week of representative employment is given.

** Includes only the paid employees of commercial broadcast stations. Employees of radio networks are not included. Likewise, those employed by the advertiser, even though appearing on radio programs, are not included.

RADIO BROADCASTING: 1935

CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician
William A. Ruff, Assistant

---0---

This is one of a series of reports presenting the findings of the 1935 Census of Business. Insurance statistics were compiled by the Bureau of the Census from information collected in 1936 in a combined field and mail canvass covering every State, city, and county, in the United States. Funds for the Census were provided by the Works Progress Administration.

This report was prepared under the supervision of Ralph C. Janoschka, Chief of the Insurance Division, and Milton W. Mays, Consultant on the Insurance Census, by Harper E. Carraine.

INTRODUCTION AND GENERAL EXPLANATIONS

SCOPE OF THE CENSUS.---This volume contains data relating exclusively to the business of Insurance, and represents the first publication of its kind to be presented in connection with a nation-wide Census of Business.

The report is divided into three sections, and presents employment and pay roll data separately for home offices of insurance carriers; branch, departmental, and managerial offices of insurance carriers; and insurance agencies and brokerage offices. Associations maintained by groups of carriers for various purposes other than for the assumption of risk are included along with trade associations in a separate Business Census report, and, similarly, rating bureaus and independent insurance adjusters are included in the Service, rather than in the Insurance phase of the Census.

Three separate schedule forms were used in connection with the Insurance Census. Copies of these three forms are appended to this volume. Forms 42 and 43 were used by carriers for reporting their home office operations, and their branch, departmental, and managerial office operations, respectively, while Form 44, "Insurance and Real Estate Schedule", was used by independent insurance and/or real estate agents and brokers for reporting separately their principal office and branch office operations. In several instances, arrangements were made whereby agency operations were reported from a carrier's home office.

Examination of the inquiries comprising the three schedule forms employed (see end of volume) indicates that it was intended originally to present considerably more statistical data for this phase of business than are included in the following tables. Irregularities and omissions in reporting premium income and operating expense data (other than pay roll) were so frequent, however, as to prevent correction and completion without considerable additional expense and inconvenience to many of the organizations filing reports. For this reason, and because much information concerning these two items already is available, it was considered advisable to omit premium income and operating expense data (other than pay roll) from the Census tabulations. Failure to furnish premium income data occurred most frequently in the case of agencies, many of which reported total commissions received rather than the amount of premium income represented thereby, while others omitted altogether the inquiry on premium income, merely reporting that their records of this item were incomplete.

While the exclusion of premium and total operating expense data is regrettable in view of the number of organizations furnishing this information exactly as requested, the data contained in the following tables have, it is believed, a definite value as an index of the substantial amount of employment and purchasing power provided annually by the insurance business.

Although the large number of agencies and brokerage offices conducting both an insurance and a real estate business necessitated one schedule form covering these two activities, data for real estate agents and brokers reporting no income from the sale of insurance are not included in this volume but are presented in a separate report. The information included in the third section of the Insurance volume, for establishments conducting both an insurance and a real estate business, is repeated in this separate report on real estate offices.

COMPLETENESS OF COVERAGE.---In drawing conclusions from the data presented for insurance agencies and brokerage offices, and for insurance and real estate offices, it should be borne in mind that there is definite knowledge of deficiencies in coverage, largely due to the fact that reporting on the Census form was entirely voluntary, and to the difficulty experienced by enumerators in identifying as insurance offices those establishments conducting an insurance business in connection with other business activities not covered by the Census of Business. For this reason, and since no previous Business Census data exist which could be used for determining the degree of incompleteness, statistics for insurance agencies and brokerage offices, and for insurance and real estate offices, are presented on a "number of establishments reporting basis" rather than on a Census basis. While certain estimates relative to the number of insurance agents and brokers already exist, the difficulty in checking with such approximations lies in the fact that the Census was taken on an establishment basis, which is usually at variance with the bases on which other lists are compiled. Some lists include individuals operating no establishments and the individual members of partnerships. Others, include establishments which carry on a nominal insurance business in addition to their other activities, and which are for the most part, engaged primarily in activities covered by other phases of the Business Census.

With the exception of employment and pay roll statistics for several carriers from which no reports could be secured, a careful check of available sources of insurance information discloses that the home office, and branch, departmental, and managerial office sections of the report represent virtually a complete coverage of both these fields. Study of the financial statements of the several carriers which submitted no reports indicates that, while unquestionably their omission has caused some understatement of home office and subsidiary office employment and pay roll, the extent of such understatement is not sufficient to affect seriously any of the State totals presented.

AREA AND PERIOD COVERED.---The canvass, conducted in connection with the Census of Business, covered the 48 States and the District of Columbia, and was made during the first eight months of 1936. The activities of establishments for the calendar year 1935 were reported, new businesses reporting for that part of the year during which they were in active operation.

SCOPE OF REPORT, BY SECTIONS

As stated above, this report is divided into three sections. The first covers the home offices of insurance carriers; the second, branch, departmental, and managerial offices of insurance carriers; and the third, independently operated insurance agencies and insurance brokerage offices.

CARRIERS.---All types of insurance coverage are included. However, companies reporting title insurance or the guarantee of mortgages as their principal insurance activity are included in the Service and Finance phases of the Business Census, respectively. Marine and other independently operated departments are included as separate carriers.

Stock, mutual, and participating stock companies; Lloyds Associations; and reciprocal exchanges are covered, as well as hospitalization societies, and burial societies maintaining business establishments and employing personnel (138 burial societies paying an average of 1,481 employees $1,843,553 during 1935). State Funds have been omitted from the Census tabulations for the reason that they are, in part at least, government rather than private enterprises.

HOME OFFICES.---Each carrier has been recognized as maintaining only one home office, the principal United States offices of foreign carriers being considered the home offices of such carriers for Census purposes. The count of home offices includes the home offices of carriers operating under management contracts and, consequently, reporting little or no home office employment. Personnel and pay roll of managing agencies for such carriers, and of attorneys-in-fact for reciprocal exchanges and Lloyds Associations are not included in this section of the report, but are included in the tabulations for insurance agencies and brokerage offices (Section 3). Also included as separate entities in the count of home offices are carriers for which consolidated reports were submitted by group managers. The home office employment and pay roll of these group members are, of course, included in this section on carrier home offices.

In each case, every effort was made to segregate home office operations from branch office operations. Where it appeared from examination of a carrier schedule (Form 42) that operations in addition to those of the home office were included, the carrier submitting such report was contacted a second time by mail and any necessary corrections were made before tabulation.

This section contains three tables. Table one shows number of home offices, and home office employment and pay roll, for the United States, and for each geographic division and State. Table two, restricted to a further analysis of employment, indicates the total number of employees working during the pay period ending nearest the 15th of each month; while table three presents, for a specific week, a distribution of employees by sex, and employment and pay roll statistics by occupational groups. As in table one, the data in tables two and three are presented in totals for each geographic division and State, as well as in totals for the United States.

BRANCH OFFICES.---Includes all offices (except branches of fraternal societies) considered branch, departmental, or managerial offices by the various carriers and accordingly reported on Form 43. Nursing offices, loan offices, real estate offices, etc., maintained and reported by carriers, are included in addition to insurance branch offices in the narrower sense of the term.

Considerable difficulty was encountered in obtaining reports for branch offices maintained by fraternal societies, and such reports as were received for this type of establishment accounted for little employment and pay roll. Consequently, the reports received for these offices were excluded from the Insurance Census.

Where there was some doubt as to whether offices were owned and maintained by a carrier, or whether they operated as independent agencies, the correct status of the offices was determined by correspondence direct with the carrier submitting the reports in question.

Branch offices located at the home offices of various carriers -- and for which reports were submitted on Form 43 -- are included as separate branch establishments. Offices operated at the same address by two or more carriers writing different lines of insurance are also considered separate entities in this report. However, branches reported as jointly operated by a group of carriers writing the same kind of insurance are included as single establishments. Field men are included in the schedules for the respective home offices or branch offices to which they report.

This section contains three tables similar in type of information presented to the three tables contained in Section 1. Table 1 presents the number and pay roll of employees, and the number and annual commissions of office solicitors, in branch, departmental, and managerial offices, for the United States, and for each geographic division and State. Table 2 analyzes further the average number of employees for the year, indicating the total number of employees working during the pay period ending nearest the 15th of each month. Table 3, as in Section 1, presents, in addition to a distribution of employees by sex, employment and pay roll statistics by occupational groups for a specific week. As in Table 1, the data in Tables 2 and 3 are presented for geographic divisions and States, and in totals for the United States.

INSURANCE AGENCIES AND BROKERAGE OFFICES.---Includes insurance agencies, sub-agencies, and brokerage offices identifiable as business establishments; managing agencies for one or more carriers; attorneys-in-fact for Lloyds Associations and for reciprocal exchanges; and underwriter agencies. Insurance agencies and brokerage offices reporting commissions and/or fees from real estate transactions are included, although data for such offices are shown separately from data for offices conducting an insurance business exclusively.

The first of the four tables contained in this section of the report presents basic personnel and pay roll data for insurance offices, and for insurance and real estate offices, for the United States, by geographic divisions and States. This same basic information is presented in Table 2 for insurance offices, and for insurance and real estate offices, for as many cities of 10,000 or more inhabitants as can be shown separately without disclosing the operations of individual organizations. Table 3 corresponds to Table 2 in Sections 1 and 2, presenting employment data by months for insurance offices, and for insurance and real estate offices, for the United States, by geographic divisions and States. Corresponding to Table 3, in Sections 1 and 2, Table 4 shows employees by sex, and employment and pay roll by occupational groups for a specific week, for insurance offices, and for insurance and real estate offices, for geographic divisions and States, and in totals for the United States.

EXPLANATION OF TERMS

EMPLOYEES.---The total number of employees working during the pay period ending nearest the 15th of the month was reported for each of the twelve months of 1935. The average number of employees for the year represents the sum of the reported employment for these twelve months divided by twelve.

Home office employees include home office personnel only, exclusive of subsidiary office employment and of agency and brokerage office personnel. Similarly, the employment tables in Sections 2 and 3 of the report refer only to employment in subsidiary offices and to employment in agency and brokerage offices, respectively.

Employees include salaried corporation officers, other executives, office and clerical employees, direct selling employees, and "other" employees.

FULL-TIME EMPLOYEES.---Persons regularly engaged for work for four or more hours per day or for more than three full days per week. Persons employed on a full-time basis for only part of the year are regarded as full-time employees for that part of the year.

PART-TIME EMPLOYEES.---Persons employed less than four hours a day or for less than three full days per week. (Indications are that this definition of part-time employees was not closely followed in a number of instances.)

TOTAL PAY ROLL FOR THE YEAR.---Includes salaries, wages, bonuses, and commissions paid full-time and part-time employees, exclusive of directors' fees and commissions and brokerage paid agents and brokers. Pay roll for home offices includes pay roll of home office employees, exclusive of compensation paid branch office employees; and, similarly, branch office pay roll includes compensation of branch office employees only. Compensation of proprietors is not included in the annual pay roll figures for insurance agencies and brokerage offices. It should be noted that, in some instances, the pay roll includes renewal commissions paid former selling employees who are not regarded as employees for the year 1935; such amounts are known to be too small to affect materially the comparison of the employment and pay roll figures.

EXECUTIVES AND SALARIED CORPORATION OFFICERS.---Includes all salaried corporation officers, and executives other than salaried corporation officers, reported by the various insurance organizations (chairmen of the board, presidents, vice presidents, United States managers of foreign carriers, treasurers, secretaries, assistant secretaries, etc.). The decision of the individual corporation was accepted as to whether employees such as comptrollers, actuaries, claim managers, etc., were properly classifiable as executives or as office and clerical employees, in those instances where such employees were not actually officers of the corporation in question.

OFFICE AND CLERICAL EMPLOYEES.---Includes stenographers, office secretaries, bookkeepers, auditors, accountants, clerks, etc., devoting the major portion of their time to clerical work, as distinguished from responsible administrative and supervisory duties.

DIRECT SELLING EMPLOYEES.---Employees performing principally a selling function within a carrier, branch, or agency establishment and usually paid on a commission, or salary and commission, basis.

OTHER EMPLOYEES.---Includes special agents (other than executive special agents), lawyers, nurses, building service employees, etc.

OFFICE SOLICITORS.---Includes persons frequently regarded as independent contractors who are soliciting insurance on a commission basis. They maintain no establishments of their own, but usually have desk space either in a branch office or in an insurance agency or brokerage office.

Although combined with selling employees on the insurance and real estate schedule (Form 44), office solicitors and their annual commissions were reported under a separate inquiry on the branch office report form (Form 43). All branch office schedules were carefully scrutinized to make certain that office solicitor data were included in this separate inquiry rather than in the branch office inquiries on employment and pay roll.

SPECIFIC WEEK.---Employment and pay roll data by occupational groups, and the distribution of employees by sex, were requested as of the week ending October 26, 1935 or other more representative weekly pay period. Most organizations reported this information as of the week suggested.

GENERAL ANALYSIS

Insurance tabulations for the United States include 4,428 carriers, 8,302 branch offices, and 56,624 agencies. These 69,354 insurance organizations employed an average of 389,511 persons during 1935 and paid $677,015,000 total pay roll, $9,574,000 of which was paid to part-time employees. In addition, branch offices reported 78,747 office solicitors receiving $87,190,000 commissions during 1935. As stated above, it is definitely known that the coverage of the Census is not as complete for insurance agencies and brokerage offices as for carrier home offices and carrier subsidiary offices.

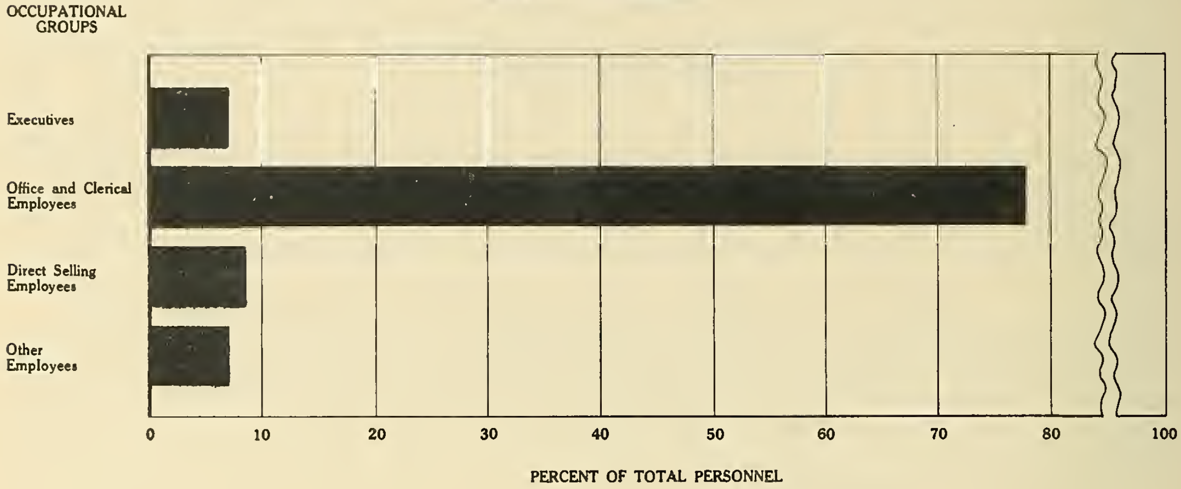
CARRIERS: HOME OFFICES

Geographic Concentration.---The home offices of 1,917, or 43%, of all carriers, are located within six States - Illinois, New York, Pennsylvania, Wisconsin, Ohio, and Texas. Home offices in these same six States likewise represent 48% of all home office employees (average for the year). It is significant to note, however, that the home offices of carriers domiciled in New York, while representing only 9.7% of the total number of offices, account for 28.4% of all home office employment. This is in contrast to the situation in Illinois, where 9.8% of the total number of home offices account for only 5.8% of the total number of home office employees. Connecticut and New Jersey compare with New York, in that, although together representing only 126 of the 4,428 home offices, they account for 29,634 of the 159,314 home office employees, an average of 235 employees per office.

Composition of Personnel.---Executives and salaried corporation officers, 11,032 in number, represent 6.9% of the total number of employees reported as of a specific week, 2,291 of these executives work on a part-time basis, representing for the most part officers of small fraternal orders and local farm and county mutuals; such part-time employees constitute an extremely low salaried group as compared with the 8,741 executives and corporation officers employed on a full-time basis. It is interesting to note in this connection that the ratio of executives to employees in the remaining occupational groups changes from approximately 1 to 14, for full-time and part-time employees combined, to one executive to every two other employees for part-time personnel only. Office and clerical employees, as is to be expected, comprise more than 77% of the total number of employees in the home offices of insurance carriers. The relative importance of the number of employees in the direct selling and "other" groups, as well as in the two occupational groups already discussed, is clearly indicated in the following chart:

CARRIERS: HOME OFFICES

COMPOSITION OF PERSONNEL



Personnel by Sex.---A distribution of employees according to sex (Table 3) shows that 82,806, or 52%, of the 160,245 home office employees reported as of a specific week are women - a considerably higher percentage of female employees than is indicated for carrier subsidiary offices or for agency and brokerage offices. It should be noted in this connection that the percentage of office and clerical employees to total personnel is substantially less for the latter two types of establishment than for carrier home offices.

Compensation of Personnel.---The average annual earnings of all home office employees during 1935 amount to $1,687. However, more detailed pay roll information is available from the employment and pay roll data reported by occupational groups for a specific week. The average weekly amounts received by full-time employees in the several occupational classes, as computed from these data, are as follows:

Executives	$123
Office and clerical employees	27
Direct Selling employees	25
Other employees	32

Part-time employees in all occupational classes combined received an average weekly compensation amounting to $9.

Earnings as reported for any one specific week cannot be considered completely representative because of such factors as bonuses paid on a yearly, quarterly, or monthly basis; variation in commissions paid selling employees, etc. It is significant to note, however, as a check upon the representativeness of the pay roll data presented in Table 3, that each of the total weekly pay roll figures (full-time and part-time combined) multiplied by fifty-two, approximates within 20%, the corresponding total pay roll figure reported for the year (Table 1). The compensation of office and clerical employees is, as of any one week, probably more representative than that of any other single group.

Classification by Kind of Insurance.---The following three tables present home office employment and pay roll data for carriers classified according to kind of insurance. Table a presents information of this type for all carriers combined; and Tables b and c, for carriers maintaining subsidiary offices and for carriers not maintaining subsidiary offices, respectively.

TABLE a.---CARRIERS: HOME OFFICES
Number of Offices, Employment, and Pay Roll,
By Kind of Insurance, For the United States

Kind of Insurance	Number of Offices	Percent of Total	Average Number of Employees	Percent of Total	Total Pay Roll (Add 000)	Percent of Total
United States Total	4,428	100.0	159,314	100.0	$268,770	100.0
Life	1,209 1/	27.3	93,514	58.7	153,014	56.9
Fire and Marine	2,620 2/	59.2	27,150	17.0	50,388	18.8
Casualty, Surety, and Miscellaneous	599	13.5	38,650	24.3	65,368	24.3

1/ Includes a number of fraternal orders reporting little or no employment

2/ Includes a number of local farm and county mutuals reporting little or no employment

TABLE b.---CARRIERS MAINTAINING SUBSIDIARY OFFICES: HOME OFFICES

Number of offices, Employment, and Pay Roll,
By Kind of Insurance, For the United States

Kind of Insurance	Number of Home Offices of Carriers Maintaining Subsidiary Offices 1/	Per Cent of Total	Average Number of Employees	Per Cent of Total	Total Pay Roll (Add 000)	Per Cent of Total
UNITED STATES TOTAL	572	100.0	118,643	100.0	$208,380	100.0
Life	227	39.7	72,130	60.8	122,765	58.9
Fire and Marine	198	34.6	16,242	13.7	33,862	16.3
Casualty, Surety and Miscellaneous	147	25.7	30,271	25.5	51,753	24.8

1/ Count does not include fraternal orders maintaining branch societies

TABLE c.---CARRIERS NOT MAINTAINING SUBSIDIARY OFFICES: HOME OFFICES

Number of offices, Employment, and Pay Roll,
By Kind of Insurance, For the United States

Kind of Insurance	Number of Home Offices of Carriers Not Maintaining Subsidiary Offices	Per Cent of Total	Average Number of Employees	Per Cent of Total	Total Pay Roll (Add 000)	Per Cent of Total
UNITED STATES TOTAL	3,856	100.0	40,671	100.0	$60,390	100.0
Life	982 1/	25.5	21,384	52.6	30,249	50.1
Fire and Marine	2,422 2/	62.8	10,908	26.8	16,526	27.4
Casualty, Surety and Miscellaneous	452	11.7	8,379	20.6	13,615	22.5

1/ Includes a number of fraternal orders reporting little or no employment
2/ Includes a number of local farm and county mutuals reporting little or no employment

Classification by kind of insurance is, in the case of multiple line companies submitting one consolidated report for all their departments, based entirely on the kind of insurance from which the major portion of the premium income was derived (see Item 2A, Form 42). Where the item requesting this information was unanswered, the proper classification was determined by inspecting the premium income information reported, as well as the carrier's 1935 financial statement. "Casualty, Surety and Miscellaneous" includes, in addition to carriers engaged primarily in writing liability lines of insurance, carriers specializing in accident and health insurance, plate glass insurance, live stock insurance, bonding, etc.

In order to give as nearly accurate a picture as possible of the relative importance of each of the three kind of insurance classifications from the standpoint of the amount of employment provided, it is essential that the home office employment and pay roll statistics for fire and marine and for casualty carriers, as presented in the above tables, be supplemented with the following home office employment and pay roll statistics for managing agencies and attorneys-in-fact for reciprocal exchanges and Lloyds Associations. Reports of managing agencies, reciprocal exchanges, and Lloyds Associations, are, as previously mentioned, included in the insurance agency tabulations. While the entire personnel of these managing agencies and attorneys-in-fact is not necessarily engaged in managing the affairs of the carriers under management contract, such is, nevertheless, sufficiently the case to render the table below a valuable adjunct for comparative purposes.

Home Office Employment and Pay Roll Reported by Managing Agencies
And Attorneys-in-Fact, by Kind of Insurance, For the United States

Kind of Insurance	Number of Managing Agencies and Attorneys-in-Fact Reporting	Number of Carriers Operated	Average Number of Employees	Total Pay Roll (Add 000)
Fire and Marine	63 1/	58	1,769	$4,246
Casualty, Surety, & Miscellaneous		41	1,983	3,610

1/ Combined to avoid duplication in the count of agencies managing both fire and casualty carriers.

In the few instances, where consolidated reports, or partially consolidated reports, were submitted for separate carriers writing different lines of insurance, it was necessary to resort to outside sources of insurance information in order to secure ratios which could be used as reasonably accurate bases for apportionment. The extent to which it was necessary to follow this procedure is indicated in the following three tables.

CARRIERS: HOME OFFICES
Extent of Arbitrary Apportionment, by Kind of Insurance

Kind of Insurance	Average Number of Employees	Percent of Total	Total Pay Roll	Percent of Total
All Kinds of Insurance	6,049	3.8	$8,743,142	3.3
Life	2,144	2.3	3,523,572	2.3
Fire and Marine	874	3.2	1,088,320	2.2
Casualty, Surety, and Miscellaneous	3,031	7.8	4,131,250	6.3

CARRIERS MAINTAINING SUBSIDIARY OFFICES: HOME OFFICES
Extent of Arbitrary Apportionment, by Kind of Insurance

Kind of Insurance	Average Number of Employees	Percent of Total	Total Pay Roll	Percent of Total
All Kinds of Insurance	5,510	4.6	$8,658,100	4.2
Life	2,093	2.9	3,438,572	2.8
Fire and Marine	792	4.9	1,088,320	3.2
Casualty, Surety, and Miscellaneous	2,625	8.7	4,131,208	8.0

CARRIERS NOT MAINTAINING SUBSIDIARY OFFICES: HOME OFFICES
Extent of Arbitrary Apportionment, by Kind of Insurance

Kind of Insurance	Average Number of Employees	Percent of Total	Total Pay Roll	Percent of Total
All Kinds of Insurance	539	1.3	$ 85,042	0.1
Life	51	0.2	85,000	0.3
Fire and Marine	82	0.8	- ---	0.0
Casualty, Surety, and Miscellaneous	406	4.8	42	0.3

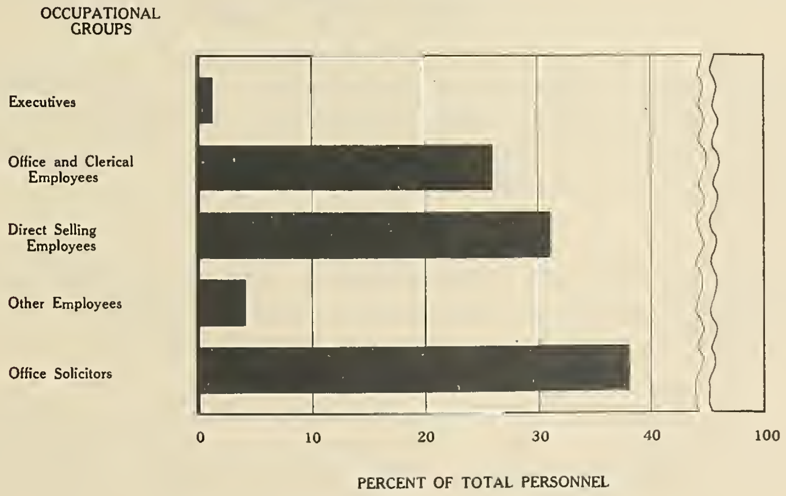
CARRIERS: BRANCH, DEPARTMENTAL, AND MANAGERIAL OFFICES

Geographic Concentration.---Six States - New York, Pennsylvania, Ohio, California, Illinois, and Texas - account for 39% of the total number of branch, departmental, and managerial office, and for 53% of the total number of subsidiary office employees (average for the year), reported. New York alone accounts for 733 of the 8,302 offices and for 23,763 of the 126,888 employees. The extent of variation in the size of individual establishments, although less than in the case of home offices, is still pronounced in subsidiary offices as is evidenced by the fact that the average number of employees per office varies from 15 employees for the country as a whole to 32 employees in New York, and to 2 in Iowa.

Composition of Personnel.---The personnel of branch, departmental, and managerial offices, as indicated in the following chart, is composed principally of office solicitors and direct selling employees, with office and clerical employees constituting the next most important occupational group. Executives as well as office and clerical employees are, as is to be expected, relatively far less numerous in subsidiary offices than in carrier home offices.

CARRIERS: BRANCH, DEPARTMENTAL AND MANAGERIAL OFFICES

COMPOSITION OF PERSONNEL



Personnel by Sex.---In contrast to the large percentage of female employees (52%) in home offices, only 37,051, or 29% of all subsidiary office employees (not including office solicitors) reported as of a specific week, are women, as compared with a total of 90,600, or 71%, men. This change in sex ratio is undoubtedly due to the relatively smaller group of clerical employees and to the considerably larger group of selling employees, domiciled in branch, departmental, and managerial offices.

Compensation of Personnel.---Full-time and part-time subsidiary office personnel, exclusive of office solicitors, received a combined average annual compensation amounting to $2,102. Annual commissions paid office solicitors average $1,107. It appears that because of the failure of the Form 43 to request specifically the average number of office solicitors for the year, occasionally, a specific and somewhat unrepresentative week was chosen for reporting this item. In such instances, the average annual compensation per solicitor is necessarily inaccurate to some extent.

Weekly full-time salaries (average per employee) by occupational classes, computed from the United States totals presented in Table 3, are as follows:

Executives and salaried corporation officers	$93
Office and clerical employees	26
Direct Selling employees	49
Other employees	39

Average weekly earnings of the 552 part-time employees reported amounted to $10.

Even more so than in the case of home office compensation, earnings reported as of a specific week can be considered only fairly representative because of variation in commissions paid selling employees and because of bonuses paid on other than a weekly basis.

Classification by Kind of Insurance.---The table which follows presents branch, departmental, and managerial office data classified according to the same three kinds of insurance for which home office data are presented in the preceding section.

TABLE 1.---CARRIERS: BRANCH, DEPARTMENTAL, AND MANAGERIAL OFFICES
Number of Offices, Employment, and Pay Roll,
By Kind of Insurance, For the United States

Kind of Insurance	Number of Offices	Percent of Total	Average Number of Employees	Percent of Total	Total Pay Roll (Add 000)	Percent of Total
United States Total	8,302	100.0	126,888	100.0	$266,776	100.0
Life	6,171	74.3	89,274	70.4	199,567	74.8
Fire and Marine	689	8.3	13,244	10.4	24,477	9.2
Casualty, Surety and Miscellaneous	1,442	17.4	24,370	19.2	42,732	16.0

The extent to which it was necessary to apportion, according to kind of insurance, consolidated subsidiary office reports for offices owned and maintained by two or more carriers writing different lines of insurance, is indicated in the following chart. Such apportionment is based on the data contained in the home office reports for the respective carriers, or, where home office reports likewise were consolidated, on ratios derived from the 1935 financial statements of the carriers in question.

CARRIERS: BRANCH, DEPARTMENTAL, AND MANAGERIAL OFFICES
Extent of Arbitrary Apportionment, by Kind of Insurance

Kind of Insurance	Average Number of Employees	Percent of Total	Total Pay Roll	Percent of Total
All Kinds of Insurance	7,965	6.3	$14,425,148	5.4
Life	2,170	2.4	4,083,565	2.0
Fire and Marine	1,281	9.7	2,094,738	8.6
Casualty, Surety, and Miscellaneous	4,514	18.5	8,246,845	19.3

INSURANCE AGENCIES AND BROKERAGE OFFICES

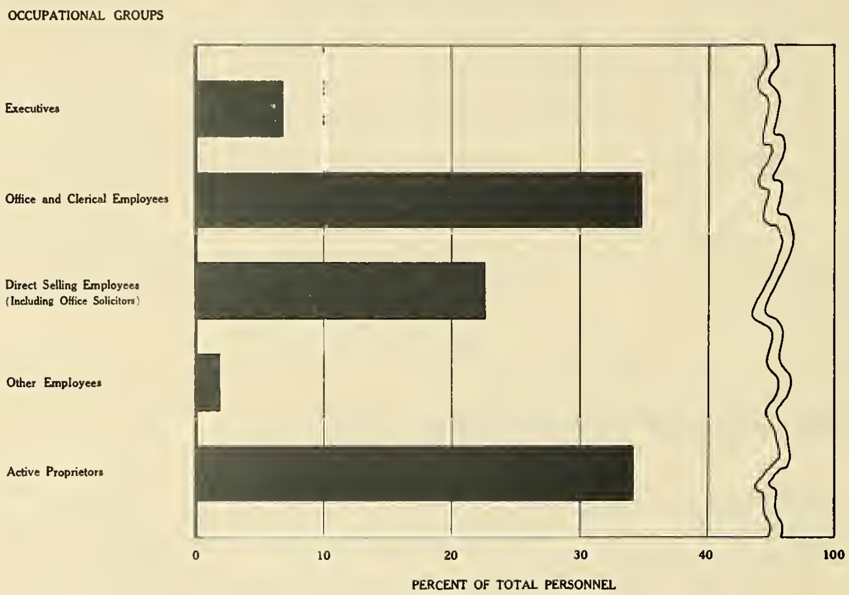
Geographic Concentration.---The same six States, (New York, Illinois, Pennsylvania, California, Ohio, and Texas), which account for 53% of the total number of employees (average for the year) in branch, departmental, and managerial offices also account for 52% of the 71,792 employees in insurance agencies and brokerage offices reporting no real estate activities during 1935, and for 47% of the 31,517 employees in offices doing a real estate as well as an insurance business. New York alone represents 10% of the total number of agencies and brokerage offices reporting, and accounts for 16% of the 103,309 employees, and for 21% of the $141,469,000 total pay roll. The concentration of large insurance agencies and brokerage offices in principal cities is indicated by the fact that the 9,023 offices in the 13 cities of 500,000 or more inhabitants, for which reports were received, while representing only 16% of the total number of offices, account for 36% of the total agency and brokerage office employment.

Composition of Personnel.---As in the case of carrier home offices, office and clerical employees are more numerous in insurance agencies and brokerage offices than any other occupational group. Of virtually the same importance, however, from the standpoint of number are the 55,070 active proprietors, many of whom reported no paid employment whatsoever, and many others of whom represent one-man establishments except for the services of a single clerical employee.

There are, of course, no proprietors in home offices or subsidiary offices of insurance carriers. There is reason to believe from the number of "selling employees (including office solicitors)" reported, that there may be some understatement in this occupational group due to the failure of a few offices to include solicitors under Item 7c (see Form 44 appended to volume). Such omissions are conceivably due to the consideration of office solicitors as independent contractors, not therefore to be confused with paid employees. The following chart is based on the United States totals presented in Tables 1 and 4.

AGENCIES AND BROKERAGE OFFICES
(56,624 INSURANCE AND INSURANCE AND REAL ESTATE OFFICES COMBINED)

Composition of Personnel



Executives and active proprietors in insurance and real estate offices constitute slightly more important groups in relationship to the total personnel than do executives and active proprietors in offices reporting no real estate operations. Office and clerical employees, however, bear virtually the same relationship to total personnel in both types of office, while direct selling employees, comprising only 15.5% of the total personnel in insurance and real estate offices, account for 26.2% of the total personnel of offices engaged in the insurance business exclusively.

Personnel by Sex.---61,545, or 58%, of the total personnel (for a specific week) of all insurance agencies and brokerage offices reporting, exclusive of active proprietors, are men. It will be recalled that male employees in carrier home offices constitute 48% of the total personnel in such offices and 71% of the total personnel (excluding office solicitors) in carrier-owned subsidiary offices. Considering insurance and real estate offices and insurance offices separately, men constitute 53% of the personnel in offices of the former type as against 60% in offices reporting no real estate activities.

Compensation of Personnel.---Excluding the compensation of active proprietors, average annual earnings of all agency and brokerage office personnel, full-time and part-time combined, amount to $1,369.

From the United States totals for full-time employees presented in Table 4, the following weekly earnings (average per employee) by occupational groups are obtained:

	All Offices	Insurance Offices	Insurance and Real Estate Offices
Executives	$ 70	$ 81	$ 56
Office and clerical employees	23	25	19
Direct Selling employees (including office solicitors)	30	31	25
Other employees	21	23	20

Average earnings of all part-time employees as of the specific week reported amount to $7 for insurance and insurance and real estate combined, and to $8 and $7 for insurance offices and insurance and real estate offices, respectively.

As in connection with the presentation of average home office and subsidiary office salaries for a specific week, it should be borne in mind in the case of agencies and brokerage offices that average earnings as of any one week cannot be considered completely representative because of annual, quarterly, or monthly bonus payments, and because of variation from week to week in the amounts paid selling employees.

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

CONSECUTIVE NUMBER OF REPORT
No. ....

CENSUS OF BUSINESS: 1935

A separate report should be prepared for each establishment. The report should cover only the central or home office; reports for each branch office will be made separately on Form 43.

The report should cover the full year's operation for 1935, even if ownership has changed during the year.

1. DESCRIPTION OF ESTABLISHMENT:

a. Name of establishment ....

b. Name of owner .... Race (*not for corporations*) .... (White, Negro, Oriental, other)

c. Location of establishment:
State .... County .... Township ....
Name of city, town, or village ....
Street and number ....
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or no*) ....

d. Legal form of organization (Place check mark in proper square)
☐ Individual proprietorship
☐ Partnership
☐ Corporation
☐ Other (*specify*) ....

e. Types of organization:
☐ Stock
☐ Mutual
☐ Participating stock
☐ Underwriter agency
☐ Burial society
☐ Fraternal
☐ Assessment
☐ Lloyds Association
☐ Reciprocal exchange
☐ State fund
☐ Other (*specify*) ....

f. How many out-zoned offices do you operate? ....

(1) ....
(2) ....
(3) ....
(4) ....
(5) ....
(CODE—Do not use)

2. KIND OF BUSINESS:

a. Give the kind of insurance from the sale of which the major part of the premium income is derived: .... (*Use classification given under 2 b.*)

b. Check other kinds of insurance sold:
☐ Life
☐ Fire and allied lines
☐ Marine
☐ Casualty, fidelity, and surety
☐ Personal accident and health

(6) ....
(7) ....
(CODE—Do not use)

3. PREMIUM INCOME (deduct returned premiums):

a. Total premium income for 1935 (*other than life companies*) .... $..........

Life companies

b. Total premiums for 1935 on new life business (*including annuities*) .... $..........

c. Total premiums for 1935 on renewal life business .... $..........

d. Other premiums for 1935 (*specify*) .... $..........

.... $..........

31546

4. OPERATING EXPENSES:

a. Total pay roll for the year 1935 for full-time and part-time employees (*salaries, wages, bonuses, and commissions*) $____________

(Do not include proprietor's or partners' compensation, but include that of officers of corporations)

b. All other operating expenses except payroll (*include overhead and claim-adjustment expenses exclusive of losses*) $____________

c. Total operating expenses (*a plus b*) $____________

d. How much of the total pay roll (*a, above*) was paid to part-time employees? $____________

5. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

Total number of proprietors and firm members____________

6. PAID EMPLOYEES AND WEEKLY PAY ROLLS:

(Do not include in this inquiry persons reported in Inquiry 5, above)

EMPLOYMENT AND PAY-ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY

(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season.)

Week covered: From____________, 1935, to____________, 1935

	Full-time		Part-time	
	Number of paid full-time employees during the week	Pay roll for the week for full-time employees (*salaries, wages, bonuses, and commissions*)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (*salaries, wages, bonuses, and commissions*)
a. Executives and salaried corporation officers				
b. Office and clerical employees (*not including selling employees*)				
c. Direct-selling employees (*not including branch office employees or agents*)				
d. Other employees				
e. TOTAL (*sum of a, b, c, and d*)				

f. How many of the total number of employees shown above (*full-time and part-time combined*) are Males________ Females________

g. How many of the total number of employees shown above (*full-time and part-time combined*) are Negroes?________

h. Total number of paid employees (*full-time and part-time combined*) working during the pay period ending nearest the 15th of each month of 1935:

MONTH, 1935	NUMBER	MONTH, 1935	NUMBER	MONTH, 1935	NUMBER
January		May		September	
February		June		October	
March		July		November	
April		August		December	

(Do not use)

7. SUPPLEMENTAL FACTS:

Total amount of policy dividends for the year 1935 $____________

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

CENSUS OF BUSINESS: 1935

A separate report should be prepared for each establishment. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form. Real estate offices which are managing nonresidential buildings in cities of 10,000 or more inhabitants will prepare a separate report for each such building or property on Form 47.

The report should cover, if possible, the full year's operation for 1935, even if ownership has changed during the year. If more convenient, a 12-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT ____________

b. NAME OF OWNER ____________ RACE (*not for corporations*) ____________ (White, Negro, Oriental, other)

c. LOCATION OF ESTABLISHMENT
State ____________ County ____________ Township ____________
Name of city, town, or village ____________
Street and number ____________
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or no*) ____________

d. ADDRESS (HOME OFFICE OR BUSINESS ADDRESS) OF OWNER ____________

e. LEGAL FORM OF ORGANIZATION (Place check mark in proper square)
☐ Individual proprietorship ☐ Corporation
☐ Partnership ☐ Other (*specify*) ____________

f. NUMBER OF INSURANCE AND REAL ESTATE ESTABLISHMENTS OWNED BY THIS ORGANIZATION IN THE CONTINENTAL UNITED STATES (*including the establishment covered in this report*) ____________

(1) ____________
(2) ____________
(3) ____________
(4) ____________
(5) ____________
(CODE—Do not use)

2. KIND OF BUSINESS:

a. Check the kind of business in which this establishment is primarily engaged. (Check one only. See instructions)
☐ Insurance agent and/or broker.
☐ Real estate dealer, broker, or agent.

b. Check the kind of insurance from the sale of which the major part of the premium income is derived.
☐ Life.
☐ Fire and allied lines.
☐ Marine.
☐ Casualty, fidelity, and surety.
☐ Personal accident and health.

c. List business activities other than insurance or real estate conducted by the owner from this establishment:

____

____

(6) ____________
(7) ____________
(CODE—Do not use)

3. COMMISSIONS AND FEES OTHER THAN FROM INSURANCE:

		Key
a. Commissions and fees from the sale of real estate	$	E-1
b. Commissions and fees from the rental of real estate and collection of rents	$	E-2
c. Commissions and fees from the management of real estate	$	E-3
d. Commissions and fees for appraisals	$	E-4
e. Commissions and fees for placing loans or mortgages	$	E-5
f. Fees for legal service	$	E-6
g. Other (*specify by kind*)	$	
h. TOTAL commissions and fees other than from insurance (*sum of a, b, c, d, e, f, and g*)	$	A-1

4. PREMIUMS RECEIVED FOR THE YEAR 1935 (deduct returned premiums):

		Key
a. Gross premiums received from the sale of insurance by kinds (*deduct returned premiums*):		
1. Life—new, renewal, and annuities	$	E–7
2. Fire and allied lines	$	E–8
3. Marine	$	E–9
4. Casualty, fidelity, and surety	$	E–10
5. Personal accident and health	$	E–11
b. Total Premiums Received (*sum of* 1, 2, 3, 4, *and* 5)	$	A–2

5. OPERATING EXPENSES:

		Key
a. Total pay roll for the year 1935 for full-time and part-time employees (*salaries, wages, bonuses, and commissions*) (Do not include proprietor's or partners' compensation, but include that of officers of corporations)	$	A–3
b. All other operating expenses (*rent, interest, traveling expenses, advertising, overhead, and all other expenses except pay roll*)	$	
c. Total operating expenses (*a plus b*)	$	B–1
d. How much of the total pay roll (*a, above*) was paid to part-time employees?	$	A–4

6. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

		Key
a. Total number of proprietors and firm members (*including those reported under* (6*b*) *below*)		B–2
b. Number of active proprietors and firm members devoting major portion of their time to the business		A–5 B–3

7. PAID EMPLOYEES AND WEEKLY PAY ROLLS:
(Do not include in this inquiry persons reported in inquiry 6, above)

EMPLOYMENT AND PAY-ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY
(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season)

Week covered: From ____________, 1935, to ____________, 1935.

This is one of a series of reports presenting the findings of the 1935 Census of Business. The statistics were compiled by the Bureau of the Census from information collected in 1936 in a field canvass of real estate agencies and brokerage offices in every State, city, and county in the United States. Funds for the Census were provided by the Works Progress Administration.

This report was prepared under the supervision of Ralph C. Janoschka, Chief of the Real Estate Division, by Harper E. Carraine.

Statistics for Establishments Excluded from the Census of Real Estate Agencies and Brokerage Offices, by Geographic Divisions and States

Form 44, "Insurance and Real Estate Schedule"

REAL ESTATE: 1935

--0--

GENERAL EXPLANATIONS

AREA AND PERIOD COVERED.---This report presents the findings of the Census of Real Estate Agencies and Brokerage Offices conducted in the first eight months of 1936. In the canvass, which covered the 48 States and the District of Columbia, reports were secured for the activities of real estate offices and insurance and real estate offices for the calendar year 1935. New establishments reported for that part of the year during which they were in active operation.

INCOMPLETENESS OF COVERAGE.---The field canvass of offices conducting a real estate business - the first canvass of this type of establishment to be undertaken in connection with a nation-wide Business Census - was made by enumerators who visited each office for the purpose of securing a report. It is definitely known, however, that in many localities the coverage secured is decidedly incomplete, due principally to the fact that reporting on the census forms was not mandatory as is the case during regular census years. Another reason for incompleteness is the difficulty experienced by enumerators in identifying as real estate offices those establishments conducting a real estate business in connection with other activities not covered by the Census of Business.

While certain estimates relative to the number of real estate agents and brokers already exist, the difficulty in checking with such approximations lies in the fact that the Census was taken on an establishment basis, which is usually at variance with the bases on which other lists are compiled. Some lists include individuals operating no establishments and the individual members of partnerships. Others include establishments which carry on a nominal real estate business in addition to their other principal activities, and which are, for the most part, engaged primarily in businesses covered by other phases of the Census.

SCOPE OF THE REPORT.---The tables contained in this report present a complete summary of the data furnished by real estate agencies and brokerage offices which reported to the Census. It will be found, however, that no data are presented on total operating expenses (see item 5c of appended report form), the irregularities in the reporting of expense information other than pay roll (Item 5b) having been so great as to impair the significance of such State and city totals as might have been obtained.

Although the large number of agencies and brokerage offices conducting both an insurance and a real estate business necessitated one report form covering these two activities (see Form 44, "Insurance and Real Estate Schedule", appended to volume), data for insurance offices reporting no income from real estate sources are not included in this volume but are presented in a separate Business Census report on Insurance (April, 1937). The employment and pay roll information for establishments conducting both an insurance and a real estate business is presented in the section of the Insurance report dealing with insurance agencies and and brokerage offices, as well as in this report on real estate agencies and brokerage offices.

Similarly, the report does not include premium income information (Inquiry 4) for insurance and real estate offices. The employment and pay roll figures presented, however, include the total number of employees and the total pay roll of all offices reporting, since it was not possible to single out, for inclusion only in the Census report on Insurance, those employees in insurance and real estate offices engaged primarily in the insurance rather than in the real estate phase of the business.

BASIC DATA.---Tables 1 and 2 present basic data for real estate agencies and brokerage offices, separately for States and for selected cities of 25,000 or more inhabitants, respectively. The basic data include number of offices reporting, total commissions and fees, number of active proprietors and firm members, average number of employees, and total pay roll for the year.

Statistics for cities for which no data are presented in Table 2 have been withheld to avoid disclosing the operations of individual organizations.

ANALYSIS OF COMMISSIONS AND FEES BY SOURCE.---An analysis of real estate commissions and fees by source is given in Tables 3 and 4, which present figures and percentages, respectively, for the 14,570 real estate offices and for the 21,567 insurance and real estate offices reporting to the Census. The data in these tables are presented for geographic divisions and States. It will be noted that statistics are shown separately for income from only six sources, instead of from the seven sources specified under Inquiry 3 (see end of volume). Fees for legal services were so negligible as to necessitate the inclusion of income from this item under commissions and fees from other sources (Item 3g).

EMPLOYMENT AND PAY ROLL.---Detailed data on employment are presented in Table 5, and on employment and compensation of employees in Table 6. Table 5 shows the number of employees (full-time and part-time combined) by months, while Table 6 summarizes the information on employees by sex and on employees and pay roll by occupational classes for the week ending October 26,1935 or other more representative weekly pay period. The statistics in Table 5 are presented for geographic divisions and States, and those in Table 6 for geographic divisions, and for States having a total of 500 or more employees (for the specific week reported) in real estate offices and in insurance and real estate offices, combined.

APPENDIX TABLE.---In order to complete the presentation of data secured as a result of the canvass of real estate agencies and brokerage offices, it was thought advisable to append to this volume a table showing the number of establishments, employment, and pay roll, of real estate operators other than agents or brokers. The information shown in this table is not a complete summary for dealers buying and selling real estate in their own name, etc. The table merely summarizes the data submitted to the Census on the real estate report form which, upon careful consideration, were eliminated from the real estate tabulations because the establishments could not be regarded as agencies or brokerage offices.

EXPLANATION OF TERMS

REAL ESTATE AGENCIES AND BROKERAGE OFFICES.---The Census covers only offices whose income from real estate sources consists principally of commissions and fees derived from such activities as real estate sales, real estate rentals, real estate management, appraisals, etc. Establishments engaged primarily in buying and selling real estate in their own name are not included. Similarly, the Census does not cover rental offices maintained in connection with properties which are owned by the interests maintaining such offices.

All agencies and brokerage offices reporting both a real estate and an insurance activity are covered in this report under the designation, "Insurance and Real Estate Offices", regardless of whether or not insurance commissions received were in excess of commissions and fees from real estate sources.

Where a real estate agency engaged in the management of real estate, it was requested to exclude from its real estate report those employees directly engaged in the operation of the buildings which it managed (janitors, firemen, elevator operators, etc.). For non-residential buildings in cities of 10,000 population and over, such operating employees were reported on a separate schedule, and are included only in the report on Non Profit Organizations, Office Buildings, and Miscellaneous. For non-residential buildings in other cities, and for residential buildings, the operating personnel was in general excluded from the Census of Business. Certain real estate agencies, however, evidently included operating personnel in their real estate reports. In such cases, an effort was made by the Census to omit such operating personnel from the tables on Real Estate Agencies and Brokerage Offices.

COMMISSIONS AND FEES.---The total income figures presented for real estate agencies and brokerage offices includes commissions and fees derived from all sources other than from the sale of insurance. With the possible exception of management commissions and fees, the sources of income specified under Inquiry 3 (see appended report form) are self-explanatory. Item 3c, "Commissions and Fees from the management of Real Estate", refers to income accruing to agencies as a result of management agreements under which the agencies in question secure tenants, collect rents, attend to repairs, etc., the number of functions performed depending upon the terms of the management contract. since the preponderance of income reported from this source actually represents commissions and fees derived from rentals and collections, management commissions and fees should be considered along with commissions and fees from rentals and collections in comparing the percentage of agency and brokerage office income derived from this latter source with the percentage derived from real estate sales.

EMPLOYEES.---The total number of employees working during the pay period ending nearest the 15th of the month was reported for each of the twelve months of 1935. The average number of employees for the year represents the sum of the reported employment for these twelve months divided by twelve.

Employees include salaried corporation officers, other executives, office and clerical employees, direct selling employees, and "other" employees.

FULL-TIME EMPLOYEES.---Persons regularly engaged for work for four or more hours per day or for more than three full days per week. Persons employed on a full-time basis for only part of the year are regarded as full-time employees for that part of the year.

PART-TIME EMPLOYEES.---Persons employed less than four hours a day or for less than three full days per week. (Indications are that this definition of part-time employees was not closely followed in a number of instances.)

TOTAL PAY ROLL FOR THE YEAR.---Includes salaries, wages, bonuses, and commissions paid full-time and part-time employees (including executives and salaried corporation officers) during the year. The pay roll figure does not include compensation of proprietors or firm members.

EXECUTIVES AND SALARIED CORPORATION OFFICERS.---This classification includes two types of employees: (a) salaried corporation officers, such as the president, vice president, secretary, and treasurer of the corporation, the general auditor and other persons appointed by the Board of Directors; (b) other hired executives such as the office manager, sales manager, credit manager, and others who devote the major portion of their time to responsible administrative and supervisory duties.

OFFICE AND CLERICAL EMPLOYEES.---Includes stenographers, office secretaries, bookkeepers, accountants, clerks, and other employees devoting the major portion of their time to clerical rather than to administrative duties.

DIRECT SELLING EMPLOYEES.---Includes employees performing principally a selling function and usually paid on a commission or salary and commission basis.

SPECIFIC WEEK.---Employment and pay roll data by occupational groups and distribution of employees by sex, were requested for the week ending October 26, 1935 or other more representative weekly pay period. Most organizations reported this information as of the week suggested.

GENERAL ANALYSIS

The 14,570 real estate agencies and brokerage offices engaged exclusively in the real estate business show an average income for the year amounting to $3,971. Considerably less than this amount is the average income from real estate sources for the 21,567 insurance and real estate offices for which reports were received ($2,781). By dividing the total commissions and fees received by real estate offices reporting no insurance business ($57,858,000), by the total personnel of such offices (13,903 active proprietors and 16,173 employees), an average of $1,924 income is obtained for each person actively engaged in the business carried on by these 14,570 establishments. The corresponding average for insurance and real estate offices lacks significance since, as previously explained, statistics relating to the income derived from the sale of insurance by this type of office are not presented in this report. The average annual compensation of employees in all offices reporting is $1,244, this average being virtually the same for the employees of insurance and real estate offices ($1,224) and for the employees of offices reporting only a real estate activity ($1,283).

GEOGRAPHIC DISTRIBUTION.---Of the 36,137 real estate agencies and brokerage offices reporting, 17,748, or 49.1%, are located within six States - California, New York, New Jersey, Pennsylvania, Illinois, and Ohio. Establishments in these same six States account for 54.8% of the total amount of income and for 52.8% of the total amount of employment reported. Considering real estate offices and insurance and real estate offices separately, 7,034, or 48.3%, of the establishments engaged in the real estate business exclusively are located within the six States mentioned, as against 10,714, or 49.7%, of the offices reporting an insurance as well as a real estate activity.

The concentration of large agencies and brokerage offices in principal cities is indicated by the fact that the 7,818 offices located in the 13 cities of 500,000 or more inhabitants, and reporting to the Census, while representing only 21.6% of the total number of offices reporting, account for 40.5% of the total agency and brokerage office income and for 35.7% of the total employment.

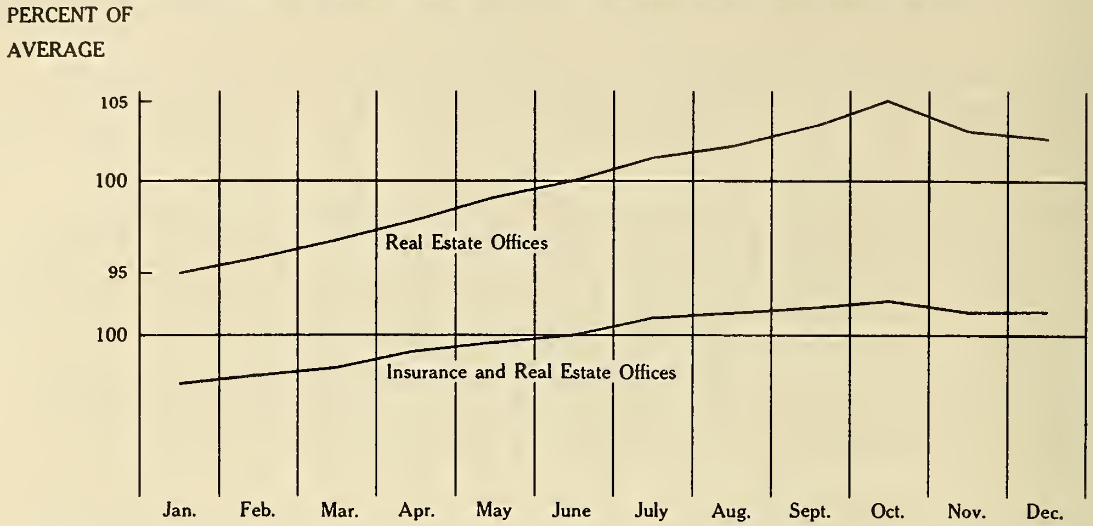
ANALYSIS OF RECEIPTS BY SOURCE.---More than two-thirds (69.4%), of the $117,844,000 total commissions and fees reported by real estate offices and insurance and real estate offices represent commissions from real estate sales and rentals, commissions from the sale of real estate alone accounting for 42.2% of the total income. Management of real estate, the third most important source of revenue, accounts for 17.3% of all commissions and fees as against 5.8% and 2.6% for placing loans and mortgages and for appraisals, respectively. The relative importance of each of these sources of income is illustrated in the chart immediately preceding Table 1.

EMPLOYMENT.---The number of employees, both in real estate offices and in insurance and real estate offices, increased steadily from January to October, and then declined somewhat during the last two months of 1935.

The extent of this month-to-month variation in the number of employees is indicated in the following graph which is based on the United States totals presented in Table 5.

VARIATION OF EMPLOYMENT IN REAL ESTATE AGENCIES AND BROKERAGE OFFICES: 1935

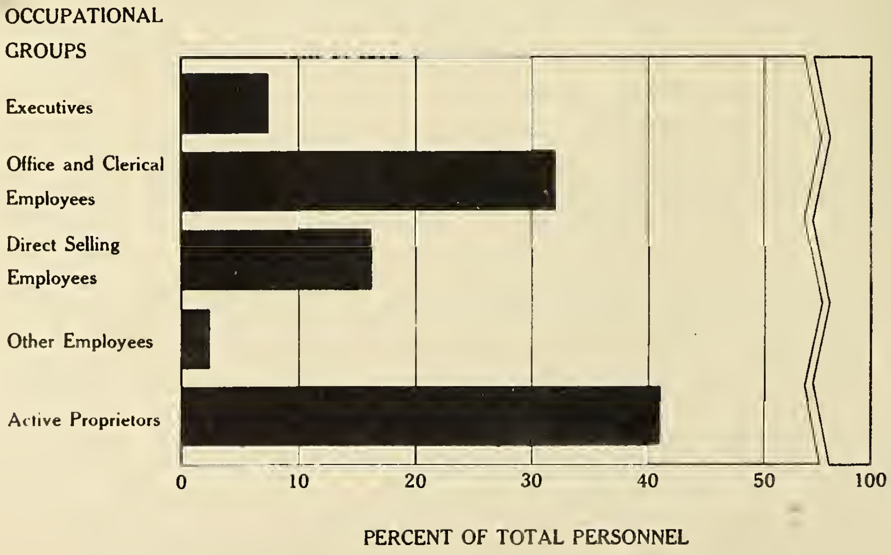
(For 14,570 Real Estate Offices and 21,567 Insurance and Real Estate Offices)



COMPOSITION OF PERSONNEL.---Active proprietors constitute a greater percentage (40.8%) of the total personnel of real estate agencies and brokerage offices than do office and clerical employees 32.6%), the largest single employee-group. Many proprietors reported no paid employees whatsoever, and many others represent one-man establishments except for the services of a single clerical employee. The chart which follows has been constructed from the United States totals presented in Tables 1 and 5.

REAL ESTATE AGENCIES AND BROKERAGE OFFICES: 1935

COMPOSITION OF PERSONNEL



It is interesting to note from the statistics presented in Tables 1 and 5 that, relatively, there is little difference in the composition of the personnel of insurance and real estate offices and in that of offices conducting a real estate business exclusively.

EMPLOYEES BY SEX.---28,184, or 56%,of the total number of employees (for a specific week) of all real estate agencies and brokerage offices reporting, are men. Considering real estate offices and insurance and real estate offices separately, men constitute 61% of the employment in offices of the former type as against 53% in offices reporting an insurance as well as a real estate activity.

COMPENSATION OF EMPLOYEES.---From the United States totals for full-time employees presented in Table 5, the following weekly earnings (average per employee) by occupational groups are obtained.

	All Offices	Real Estate Offices	Insurance and Real Estate Offices
Executives	$58	$62	$56
Office and Clerical Employees	20	22	19
Direct Selling Employees	24	23	25
Other Employees	18	16	20

Average earnings of all part-time employees as of the specific week reported amount to $7 for insurance and real estate offices combined and to $8 and $7 for real estate offices and insurance and real estate offices, respectively.

It should be borne in mind that earnings as reported for any one specific week cannot be considered entirely representative because of such factors as bonuses paid on a yearly, quarterly, or monthly basis; variations in commissions paid selling employees, etc. The compensation of office and clerical employees is, as of any one week, probably more representative than that of any other single occupational group.

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

No. ____________
County ____________
CONSECUTIVE NUMBER OF REPORT
No. ____________

CENSUS OF BUSINESS: 1935

A separate report should be prepared for each establishment. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form. Real estate offices which are managing nonresidential buildings in cities of 10,000 or more inhabitants will prepare a separate report for each such building or property on Form 47.

The report should cover, if possible, the full year's operation for 1935, even if ownership has changed during the year. If more convenient, a 12-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT ____________

b. NAME OF OWNER ____________ RACE (*not for corporations*) ____________
(White, Negro, Oriental, other)

c. LOCATION OF ESTABLISHMENT
State ____________ County ____________ Township ____________
Name of city, town, or village ____________
Street and number ____________
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or no*) ____________

d. ADDRESS (HOME OFFICE OR BUSINESS ADDRESS) OF OWNER ____________

e. LEGAL FORM OF ORGANIZATION (Place check mark in proper square)
☐ Individual proprietorship ☐ Corporation
☐ Partnership ☐ Other (*specify*) ____________

f. NUMBER OF INSURANCE AND REAL ESTATE ESTABLISHMENTS OWNED BY THIS ORGANIZATION IN THE CONTINENTAL UNITED STATES (*including the establishment covered in this report*) ____________

(1) ____________
(2) ____________
(3) ____________
(4) ____________
(5) ____________
(CODE—Do not use)

2. KIND OF BUSINESS:

a. Check the kind of business in which this establishment is primarily engaged.
(Check one only. See instructions)
☐ Insurance agent and/or broker.
☐ Real estate dealer, broker, or agent.

b. Check the kind of insurance from the sale of which the major part of the premium income is derived.
☐ Life. ☐ Casualty, fidelity, and surety.
☐ Fire and allied lines. ☐ Personal accident and health.
☐ Marine.

c. List business activities other than insurance or real estate conducted by the owner from this establishment:

____

____

(6) ____________
(7) ____________
(CODE—Do not use)

3. COMMISSIONS AND FEES OTHER THAN FROM INSURANCE:

			Key
a.	Commissions and fees from the sale of real estate	$	E–1
b.	Commissions and fees from the rental of real estate and collection of rents	$	E–2
c.	Commissions and fees from the management of real estate	$	E–3
d.	Commissions and fees for appraisals	$	E–4
e.	Commissions and fees for placing loans or mortgages	$	E–5
f.	Fees for legal service	$	E–6
g.	Other (*specify by kind*) ____________	$	
h.	TOTAL commissions and fees other than from insurance (*sum of a, b, c, d, e, f, and g*)	$	A–1

31547

4. PREMIUMS RECEIVED FOR THE YEAR 1935 (deduct returned premiums):

		Key
a. Gross premiums received from the sale of insurance by kinds (*deduct returned premiums*):		
1. Life—new, renewal, and annuities	$	E–7
2. Fire and allied lines	$	E–8
3. Marine	$	E–9
4. Casualty, fidelity, and surety	$	E–10
5. Personal accident and health	$	E–11
b. TOTAL PREMIUMS RECEIVED (*sum of* 1, 2, 3, 4, *and* 5)	$	A–2

5. OPERATING EXPENSES:

		Key
a. Total pay roll for the year 1935 for full-time and part-time employees (*salaries, wages, bonuses, and commissions*) (Do not include proprietor's or partners' compensation, but include that of officers of corporations)	$	A–3
b. All other operating expenses (*rent, interest, traveling expenses, advertising, overhead, and all other expenses except pay roll*)	$	
c. TOTAL OPERATING EXPENSES (*a plus b*)	$	B–1
d. How much of the total pay roll (*a, above*) was paid to part-time employees?	$	A–4

6. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

		Key
a. Total number of proprietors and firm members (*including those reported under* (6*b*) *below*)		B–2
b. Number of active proprietors and firm members devoting major portion of their time to the business		A–5 B–3

7. PAID EMPLOYEES AND WEEKLY PAY ROLLS:
(Do not include in this inquiry persons reported in inquiry 6, above)

EMPLOYMENT AND PAY-ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY
(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season)

Week covered: From ______, 1935, to ______, 1935.

		Full-time		Part-time	
		Number of paid full-time employees during the week	Pay roll for the week for full-time employees (*salaries, wages, bonuses, and commissions*)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (*salaries, wages, bonuses, and commissions*)
	ITEM	Field 1	Field 2	Field 3	Field 4
a. Executives and salaried corporation officers	C–1		$		$
b. Office and clerical employees (*not including selling employees*)	C–2		$		$
c. Selling employees (*including office solicitors*)	C–3		$		$
d. Other employees	C–4		$		$
e. TOTAL (*sum of a, b, c, and d*)	C–5		$		$

William L. Austin, Director

CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician

This final summary of banks in the United States in 1935 presents in convenient form the data contained in a series of nine reports for geographic divisions and States, published between July 14, 1936 and September 29, 1936, supplemented by more detailed data not heretofore published.

These statistics are based on information collected in 1936 by the Federal Reserve Board, the Comptroller of the Currency, and the Federal Deposit Insurance Corporation, as well as on information collected in a field canvass, with funds provided by the Works Progress Administration.

Reports on banks are prepared under the supervision of Ralph C. Janoschka, Chief of the Banking and Finance Division, by Joseph R. Murphy, Assistant Chief.

Census of Business Form 45 - Banking and Finance Schedule

BANKS: 1935

--o--

UNITED STATES SUMMARY

This report contains summary tables for the United States, by geographic divisions and States, presenting the results of the first nation-wide Census of Banks, taken as a part of the 1935 Census of Business. The information presented is confined to number of banks, number of executives and their annual pay roll, and number of other employees and their annual pay roll. These data are classified according to kind of bank (national, State, mutual saving, etc.), as well as on the basis of whether or not the bank's deposits are insured by the Federal Deposit Insurance Corporation, and membership in the Federal Reserve System. The data are further classified on the basis of branch and unit banks.

SCOPE OF THE CENSUS.---All banks actively engaged in the banking business during 1935, with the exception of twenty banks and three foreign bank agencies, from which reports could not be obtained, are included in this report.

AREA AND PERIOD COVERED.---The Census, covering the forty-eight States and the District of Columbia, was conducted during the early part of 1936. The employment and pay roll of banks for the calendar year 1935 were reported. New banks and those which ceased operation during 1935, reported for that portion of the year during which they were in active operation.

EXPLANATION OF TERMS

BANKS.---For the purpose of this Census only the following kinds of Financial institutions are classified as banks: national banks, State banks, private banks, mutual savings banks, industrial banks (including Morris Plan), Federal Reserve Banks, Joint Stock Land Banks, and foreign banking agencies.

EXECUTIVES.---Executives include presidents, vice presidents, cashiers, assistant cashiers, (in trust companies secretaries, treasurers, assistant secretaries, and assistant treasurers). In cases where the chairman of the board of directors is actively engaged in the banking business on a salary basis, he is also classified as an executive.

OTHER EMPLOYEES.---Includes all employees (part-time as well as full-time), other than executives.

PAY ROLL.---Total pay roll represents the salaries, wages, bonuses, and commissions, paid full-time and part-time employees (including executives) during the period January 1, 1935 to December 31, 1935, except for those banks which were not in operation during the entire year. For such banks, the pay roll is included only for that portion of the year during which they were in operation.

DEFINITIONS OF CLASSIFICATIONS

UNIT BANKS.--A unit bank is an independently-owned organization with but one banking office. Individual banks operating under holding-company ownerships are also classified as unit banks. The twelve Federal Reserve Banks and their branches and agencies, and agencies of foreign banking institutions located in the United States are, for the purpose of this Census, classified as unit banks.

BRANCH BANKS.---A branch bank is one of the banking offices of an organization operating one or more banks or banking agencies in addition to the parent bank or main office. Branches may be located in the same city, another city, or both, and in some instances are not in the same State in which the parent bank is located.

NATIONAL BANKS.---This classification covers all national banks and branches of national banks. All such banks are under the supervision of the Comptroller of the Currency.

STATE BANKS.---All banks under the supervision of the banking departments of the various States, except those classified as mutual savings banks, private banks, and industrial banks, are included in this classification.

PRIVATE BANKS.---Banks operated as partnerships or individual proprietorships are included in this classification. In most States private banks are under the supervision of the State banking department.

MUTUAL SAVINGS BANKS.---Cooperative savings banks (operated on a mutual basis) are included in this classification. The majority of such institutions are located in the New England States, particularly in Massachusetts, where this type of bank found its origin.

INDUSTRIAL BANKS.---Banks engaged in making loans with co-maker endorsements (usually small loans, non-collateral, to individuals), and providing a certificate plan of saving are included in this classification. Morris Plan Banks constitute the majority of the industrial banks.

FOREIGN BANK AGENCIES.---Offices of foreign banks located in the United States are included in this classification, and for the purpose of this Census are classified as unit banks. The majority of such agencies are located in New York City.

INSURED BANKS.---Includes all banks whose deposits (up to $5,000 for any depositor) were insured by the Federal Deposit Insurance Corporation as of December 31, 1935.

UNINSURED BANKS.---Banks that are not classified as "Insured Banks" are included in this classification, with the exception of the twelve Federal Reserve Banks and their branches and agencies, and agencies of foreign banks located in the United States, and Joint Stock Land Banks, all of which are not eligible for insurance.

FEDERAL RESERVE MEMBER BANKS.---All banks having membership in the Federal Reserve System as of December 31, 1935 are included in this classification.

NON-MEMBER BANKS.---All banks not classified as "Federal Reserve Member Banks" are included in this classification, with the exception of agencies of foreign banks located in the United States and Joint Stock Land Banks. Obviously, the twelve Federal Reserve District Banks and their branches and agencies are also excluded.

GENERAL ANALYSIS

Nineteen thousand, six hundred and four banks were in operation in the United States on December 31, 1935. Of this number, 19,581 or 99.9% are included in this report. The remaining twenty-three banking institutions, from which reports could not be obtained, are classified as follows: four State banks; four private banks; twelve mutual savings banks; and three foreign bank agencies.

The 19,581 banks included in this report employed a total of 266,458 persons during 1935, of which 58,482 are executives and 207,976 are other employees. The total pay roll of these banks for 1935 amounts to $487,694,572 of which $197,316,221 was paid to executives and $290,378,351 to other employees.

UNIT BANKS AND BRANCH BANKS.---Four thousand, two hundred and twenty-two or 21.6% of the total number of banks included in this report are branch banks. These consist of 890 main offices (representing as many branch banking systems) and 3,332 branches. The following table shows the number of unit banks and the number of branch banks in each geographic division as well as the percentage distribution. Of particular interest is the fact that in the Pacific Coast States 65.4% of all banking institutions are branch banks, as against 5.1% for the West South-Central States and 6.7% for the West North-Central States.

	Total Number of Banks	Unit Banks	Per Cent Unit Banks	Branch Banks	Per Cent Branch Banks
United States	1/ 19,581	15,359	78.4	4,222	21.6
New England	1,245	857	68.8	388	31.2
Middle Atlantic	3,412	2,307	67.6	1,105	32.4
East North-Central	3,785	3,136	82.9	649	17.1
West North-Central	3,820	3,563	93.3	257	6.7
South Atlantic	2,038	1,562	76.6	476	23.4
East South-Central	1,372	1,168	85.1	204	14.9
West South-Central	1,825	1,732	94.9	93	5.1
Mountain	614	525	85.5	89	14.5
Pacific	1,470	509	34.6	961	65.4

1/ Twenty State banks and three foreign bank agencies, from which reports could not be obtained, are not included.

Branch banks, which represent 21.6% of the total number of banks, employed 107,775 persons or 40.4% of the total number of employees of all banks, whose compensation amounted to $218,448,566 or 44.8% of the total compensation of all bank employees.

In branch banks, 11.3% of all employees are executives. In unit banks, executives constitute 29.2% of all employees. If the number of employees reported as of the close of the year may be considered as representative of employment throughout the year, the average annual salaries paid to executives in branch banks was $5,995 as against $2,682 for unit banks. For other employees, average annual salaries amounted to $1,520 for branch banks and $1,291 for unit banks. For all employees (executives and other employees combined), average salary amounted to $2,027 for branch banks and $1,697 for unit banks.

The following table shows for the United States the distribution of unit and branch banks for each of six types of banks.

	Total Number of Banks	Unit Banks	Per Cent Unit Banks	Branch Banks	Per Cent Branch Banks
United States	19,581	15,359	78.4	4,222	21.6
National Banks	6,725	5,226	77.7	1,499	22.3
State Banks	11,574	9,143	79.0	2,431	21.0
Private Banks	253	236	93.3	17	6.7
Mutual Savings Banks	673	492	73.1	181	26.9
Industrial and Morris Plan Banks	249	155	62.2	94	37.8
Federal Reserve and Joint Stock Land Banks	1/ 107	107	100.0	----	----

GEOGRAPHIC CONCENTRATION OF BANKS.---While the largest number of banks (3,820) are in the West North-Central States, the Middle Atlantic States (New York, Pennsylvania, and New Jersey), which account for only 3,412 banks or 17.4% of the total number of banks in the United States, employed 35.4 of all banking personnel

---

1/ Federal Reserve Banks, branches, and agencies; Joint Stock Land Banks; and foreign bank agencies are considered unit banks in this report.

whose pay roll amounts to $197,366,776 or 40.4% of the total compensation of all bank employees in the country.

The following table shows the concentration of banks, bank employees, and pay roll by geographic divisions.

	Number of Banks	Per Cent of Total	Number of Employees	Per Cent of Total	Annual Pay Roll	Per Cent of Total
United States 1/	19,581	100.0	266,458	100.0	$487,694,572	100.0
New England	1,245	6.4	21,099	7.9	41,325,311	8.5
Middle Atlantic	3,412	17.4	94,419	35.4	197,366,776	40.4
East North-Central	3,785	19.3	48,330	18.1	80,573,475	16.5
West North-Central	3,820	19.5	26,413	9.9	39,471,541	8.1
South Atlantic	2,038	10.4	19,891	7.5	32,437,183	6.7
East South-Central	1,372	7.0	10,089	3.8	14,833,488	3.0
West South-Central	1,825	9.3	16,131	6.1	25,209,838	5.2
Mountain	614	3.2	5,567	2.1	9,342,535	1.9
Pacific	1,470	7.5	24,519	9.2	47,134,425	9.7

KINDS OF BANKS.---Of the 19,581 banks covered in this report, 11,574 or 59.1% are State banks, and 6,725 or 34.4% are national banks. State banks account for 44.8% of the total number of employees and 43.3% of the total pay roll. National banks account for 42.8% of the total number of employees and 43.5% of the total pay roll. The relative importance of the five kinds of banks as measured by number of institutions, number of employees, and total pay roll, is presented in the following table.

	Number of Banks	Per Cent of Total	Number of Employees	Per Cent of Total	Annual Pay Roll	Per Cent of Total
United States 1/	19,581	100.0	266,458	100.0	$487,694,572	100.0
National Banks	6,725	34.4	114,102	42.8	211,944,367	43.5
State Banks	11,574	59.1	119,663	44.8	210,999,185	43.3
Private Banks	253	1.3	2,589	1.0	4,971,902	1.0
Mutual Savings Banks	673	3.4	13,997	5.3	31,369,123	6.4
Industrial and Morris Plan Banks	249	1.3	2,350	.9	3,981,891	.8
Federal Reserve and Joint Stock Land Banks	107	.5	13,757	5.2	24,428,104	5.0

1/ Twenty State banks and three foreign bank agencies, from which reports could not be obtained, are not included.

INSURED BANKS.---As of December 31, 1935, there were 17,307 banks in the United States (main offices and branches combined) or 88.4% of all banks, whose deposits were insured by the Federal Deposit Insurance Corporation, up to $5,000 per customer. Tables 10 to 15 of this report contain detailed data for insured and uninsured banks on employment and pay roll for geographic divisions and States.

FEDERAL RESERVE MEMBERSHIP.---There were 8,681 banks in the United States (main offices and branches combined) or 44.3% of all banks which were members of the Federal Reserve System (as of December 31, 1935). Tables 16 to 21 of this report contain detailed data for Federal Reserve member and non-member banks on employment and pay roll for geographic divisions and States.

3/ Pay roll combined to avoid disclosing confidential information.

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

CENSUS OF BUSINESS: 1935

A separate report should be prepared for each establishment. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form.

The report should cover, if possible, the full year's operation for 1935, even if ownership has changed during the year.

1. DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT ____

b. NAME OF OWNER ____ Race (*not for corporations*) ____
(White, Negro, Oriental, other)

c. LOCATION OF ESTABLISHMENT
State ____ County ____ Township ____
Name of city, town, or village ____
Street and number ____
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or No*) ____

d. ADDRESS (HOME-OFFICE OR BUSINESS ADDRESS) OF OWNER ____
____

e. LEGAL FORM OF ORGANIZATION (Place check mark in proper square)
☐ Individual proprietorship.
☐ Partnership.
☐ Corporation.
☐ Other (*specify*) ____
____

f. GIVE NUMBER OF ESTABLISHMENTS ~~OF BUSINESS~~ OWNED BY THIS ORGANIZATION IN THE CONTINENTAL UNITED STATES (*including the establishment covered in this report*) ____

(1) ____

CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician
William A. Ruff, Assistant

This is one of a series of reports presenting the findings of the 1935 Census of Business. The statistics are based on information collected during 1936 in a field canvass, with funds provided by the Works Progress Administration. Supplementary data on building and loan associations were supplied by the Federal Home Loan Bank Board and the Department of Banking of the State of Pennsylvania.

Reports on banking and finance are prepared under the supervision of Ralph C. Janoschka, Chief of the Banking and Finance Division, by Joseph R. Murphy, Assistant Chief, and George A. Baumann.

FINANCIAL INSTITUTIONS OTHER THAN BANKS: 1935

--o--

UNITED STATES SUMMARY

SCOPE OF THE REPORT.---This report presents for the United States and by geographic divisions and States data relating to financial institutions other than banks. The institutions covered include security brokers and dealers; building and loan associations; mortgage and farm mortgage companies; installment finance companies; personal finance companies; and a miscellaneous group, a detailed description of which is presented below. Statistics for banks, including national, State, mutual savings, industrial and private banks as well as the Federal Reserve and Joint Stock Land Banks, are presented in a separate Census of Business report entitled "United States Summary of Banks" (November 1936).

The information in the tables is confined to number of establishments, number and annual compensation of executives, and number and annual compensation of employees other than executives. These statistics are supplemented by proprietorship information for those kinds of business in which individual proprietorships and partnerships are sufficiently numerous to justify the presentation of such additional data.

AREA AND PERIOD COVERED.---The tables summarize information obtained by a field canvass covering the forty-eight States and the District of Columbia. A copy of the schedule used in the canvass is appended at the end of this report. The information was requested from establishments which were in operation during the early part of 1936, when the canvass was conducted, for the year 1935. Employment was reported for the pay period ending nearest December 15, 1935, while the amount of pay roll covers the entire operating period of the calendar year 1935.

INCOMPLETENESS OF COVERAGE.---The information presented in this report is not the result of a complete enumeration of establishments falling within the scope of the survey. It should be recognized that for various reasons--the absence of legislation which during regular census years makes reporting mandatory, the difficulty experienced by enumerators in identifying establishments subject to canvass, and other obstacles usually encountered in a first survey--the count of financial institutions other than banks is incomplete.

The extent of the deficiency in coverage cannot be readily ascertained. There are no previous census studies of this field which might be used for control purposes. An accurate check with lists of financial institutions available from other sources is virtually impossible. These lists are neither complete nor as a rule compiled on the basis of establishment which forms the unit for census enumeration. Differences in the principles of classification make the comparison even more difficult.

For the same reasons it is impossible to determine accurately whether the coverage is comparable by States or types of institutions. It is believed nevertheless that certain classes of financial institutions have been enumerated more effectively than others. The groups with the better coverage are presented in separate classifications. The descriptions of these classifications include certain supplementary information which throws some light on the extent of deficiency in coverage.

The figures contained in this report must, therefore, be regarded as applying only to those establishments from which reports were secured. They are only a partial summary of the contribution by the non-banking financial institutions to the employment given and pay rolls distributed by the business system of the country. With qualifications arising from incompleteness and unevenness of coverage, these figures can also be used in establishing relationships between the number of establishments, the personnel engaged as classified into proprietors, executives and other employees, and the amount of pay roll, for each type of financial institution and for each State.

DEFINITIONS OF CLASSIFICATIONS

The classification of returns from financial institutions other than banks is based, in the great majority of cases, on statements made by the reporting establishment regarding the principal kind of financial business in which it is engaged. Since the other inquiries on the schedule form (a copy of it is appended at the end of this report) were confined to personnel and pay roll, it was not practicable to test these statements in the light of such information as the nature of receipts or operating revenue, the relation of operating expenses to revenue, etc. In the absence of internal checks of this type it is possible that in a few cases the allocation of a reporting establishment to a particular classification has been erroneous.

SECURITY BROKERS AND DEALERS.---Includes establishments engaged primarily in the flotation, purchase, sale, and/or brokerage of stocks and bonds. As stated above, the figures given in the tables for this classification are known to represent an incomplete count of establishments operated in 1935.

Of 7,224 establishments reporting to the Census of Business, 6,220 were operated by 4,445 security brokers and/or dealers which were registered with the Securities and Exchange Commission on January 1, 1936. Since the total number of registrants within the United States with the Commission was 5,303 on January 1, 1936, this survey appears to be short 858 registered security brokers and/or dealers. It should be noted, however, that the Commission's list of registrants includes some firms and individuals who do not qualify as separate establishments for Census purposes, as well as some firms which were inactive during 1935.

FEDERAL SAVINGS AND LOAN ASSOCIATIONS.---Includes only those associations under Federal supervision that maintain identifiable places of business.

According to the report of the Federal Savings and Loan Division of the

Federal Home Loan Bank Board, there were 1,022 Federal savings and loan associations in operation in the United States at the close of 1935. This Census report contains data for 896 of these associations. The remaining 126 submitted reports, but are not included because of the fact that practically all of them were chartered during 1935 and reported no paid employment, being operated by officers receiving no remuneration.

STATE BUILDING AND LOAN ASSOCIATIONS.---Includes only those associations under State supervision maintaining identifiable places of business.

Data for building and loan associations in the State of Pennsylvania, for which reports were not obtained by field canvass, were secured from the State Department of Banking. Inasmuch as the information available from the State records was not classified separately for executives and other employees, it was not possible to present this detail of employment and pay roll data in this report

The reports of State regulatory agencies for building and loan associations show a total of 9,450* associations in operation at the close of 1935. This number includes associations that have no identifiable places of business as well as those that have no paid employment. This survey covers 7,222 associations. The difference of 2,228 associations that are not covered in this report represents, therefore, associations that have no readily recognizable place of business, those that have no paid employment, and a number from whom reports were not secured due to the fact that reporting was not mandatory.

INSTALLMENT FINANCE COMPANIES.---Includes, in addition to companies financing the sale of articles on the installment plan, a number of smaller establishments engaged primarily in making loans to individuals secured by chattel mortgages. Branches of finance companies are considered separate establishments for purposes of this report.

*In the absence of accurate data on the number of building and loan associations in the State of Maryland, the best available estimates were used.

While lists and directories of finance companies have been compiled by associations and commercial agencies, the number of establishments covered in this report exceeds in practically all States the number shown in such lists. Although this difference is probably due largely to the fact that, for census purposes, branch offices are counted as separate establishments, many such lists have been found to be decidedly incomplete. Furthermore, there is definite knowledge that some of the large installment finance companies are not included in this report, and there is every reason to believe that a number of the smaller companies have not reported, although the extent of deficiency in coverage cannot be definitely determined.

PERSONAL FINANCE COMPANIES.---Included in this classification are companies engaged in making small loans to individuals, usually secured by chattel mortgages, endorsed notes, wage assignments or other similar type of consideration. A number of establishments reported activity in both the personal and installment finance fields. In such cases, every effort was made to ascertain which was the primary activity and to classify the reporting establishment accordingly.

As in the case of installment finance companies, check with available lists discloses that Census of Business reports were received for establishments in excess of the number included in any such list. Nevertheless, it has been definitely determined that our coverage is incomplete, particularly in the States of Illinois, Indiana, Michigan, Ohio, and Pennsylvania, although the degree of such incompleteness cannot be stated with any certainty.

MORTGAGE AND FARM MORTGAGE COMPANIES.---This classification is limited to organizations engaged in making and/or negotiating loans secured by mortgages on urban and farm properties. Establishments engaged in urban and farm mortgage business have been combined into a single classification since many are active in both fields. Although the coverage of establishments in this classification is definitely known to be incomplete, a check of reports received by the Census of Business against available lists reveals that the number of establishments included in such lists falls short in every case of the number of establishments included in this report.

MISCELLANEOUS.---Includes reports from certain types of financial institutions not classified separately because of extreme incompletenesses in coverage. The institutions included are as follows:

- Bank clearing houses
- Bondholder protective committees
- Commercial paper houses
- Commodity exchange brokers (only those engaged primarily in the brokerage of future contracts through the various commodity exchanges; commodity brokers deriving the major portion of their business from spot transactions are included in the Census of Wholesale Trade)
- Commodity exchanges
- Discount houses
- Escrow companies
- Factors
- Foreign exchange brokers
- Fund management companies
- Investment and annuity contract companies
- Investment trusts
- Liquidating companies
- Live stock loan companies
- Money exchanges, and money order companies
- Nominee partnerships
- Oil and mining royalty companies
- Patent buying and licensing companies
- Pawn shops (only those having no sales department; pawn shops selling merchandise at retail are included in the Census of Retail Trade)
- Purchasing account companies
- Real estate investment and holding companies
- Security exchanges

No data are included in this classification or any part of this report for credit unions and cooperative credit associations because of the small amount of employment and pay roll represented by such organizations.

EXPLANATION OF TERMS

ESTABLISHMENTS.---Only readily identifiable places of business engaged primarily in activities of a financial nature are considered establishments for purposes of this report. Individuals maintaining no separate places of business of their own are not included, nor are financial departments of organizations other than those included in this report (trust departments of banks, etc.). Each unit of a branch system is considered a separate establishment.

SINGLE-UNIT ORGANIZATIONS.---A single-unit organization is a company or unincorporated firm with but one establishment. It should be noted that single-unit organizations may be operated as a group or chain under a holding company arrangement.

MULTI-UNIT ORGANIZATIONS.---A multi-unit organization is a company or unincorporated firm with two or more establishments. Each place of business of a multi-unit organization, including the main office, is considered a separate establishment for purposes of this report. The establishments of a multi-unit organization may or may not be located in a single city, or State.

EXECUTIVES.---Includes presidents, vice presidents, and other officials, both full-time and part-time, responsible for the management of the business. In many cases unincorporated firms did not report executives because in them proprietors or firm members functioned in the same capacity as salaried officials of corporations.

OTHER EMPLOYEES.---Includes all employees (full-time and part-time) other than executives.

PROPRIETORS.---Only those proprietors and firm members devoting the major portion of their time to the business are included. The inquiry on proprietors does not, of course, apply to incorporated businesses.

PAY ROLL.---Total pay roll represents the salaries, wages, bonuses, and commissions, paid full-time and part-time employees (including executives) for the calendar year 1935. For institutions which began operations after January 1, 1935, pay roll is included only for that portion of the year during which they were in operation. Total pay roll does not include compensation of proprietors or firm members of unincorporated organizations.

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

No. ....
County ....
CONSECUTIVE NUMBER OF REPORT
No. ....

CENSUS OF BUSINESS: 1935

A separate report should be prepared for each establishment. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form.

The report should cover, if possible, the full year's operation for 1935, even if ownership has changed during the year.

1. DESCRIPTION OF ESTABLISHMENT:

a. Name of establishment ....

b. Name of owner .... Race (*not for corporations*) ....
(White, Negro, Oriental, other)

c. Location of establishment
State .... County .... Township ....
Name of city, town, or village ....
Street and number ....
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or No*) ....

d. Address (home-office or business address) of owner ....
....

e. Legal form of organization (Place check mark in proper square)
☐ Individual proprietorship. ☐ Corporation.
☐ Partnership. ☐ Other (*specify*) ....

f. Give number of establishments owned by this organization in the continental United States (*including the establishment covered in this report*) ....

(1) ....
(2) ....
(3) ....
(4) ....
(CODE—Do not use)

2. KIND OF BUSINESS:

a. Check the principal kind of financial business in which this establishment is engaged:
(Check one only.)

(5) ....
(CODE—Do not use)

- ☐ Commercial paper house and acceptance dealer
- ☐ Discount house.
- ☐ Livestock loan company.
- ☐ Industrial bank (*Morris Plan Company and other types*).
- ☐ Investment contract company.
- ☐ Investment trust.
- ☐ Mortgage company.
- ☐ Farm mortgage company.
- ☐ Building and loan association.
- ☐ Federal savings and loan association.
- ☐ Personal finance company (*including benevolent and remedial loan society and small loan company or broker*).
- ☐ Installment finance company.
- ☐ Credit union.
- ☐ Commodity exchange.
- ☐ Commodity exchange broker.
- ☐ Security broker or dealer.
- ☐ Security exchange.
- ☐ Clearing house.
- ☐ Other (*please specify*) ....

b. List other business activities conducted by the owner or owners from this establishment:

....
....
....

32205

3. PROPRIETORS AND FIRM MEMBERS:
(Does not apply to corporations.)

		Field
a. Total number of proprietors and firm members (*including those reported under b below*)		1
b. Number of proprietors and firm members devoting major portion of their time to the business		2

4. PAID EMPLOYEES AND PAY ROLLS:
(Do not include persons reported under Inquiry 3 on this form.)

	Total number of paid employees (*full-time and part-time*) during the pay period ending nearest December 15, 1935	Field	Pay roll for the year 1935 (*salaries, wages, bonuses, and commissions*)	Field
a. Executives and salaried corporation officers		3	$	4
b. Other employees		5	$	6
c. TOTAL (*sum of a and b*)		7	$	8

This is one of a series of reports presenting the findings of the 1935 Census of Business. The statistics were compiled by the Bureau of the Census from information collected in 1936 in a field canvass of hotels in every State, city, and county, in the United States. Funds for the Census were provided by the Works Progress Administration.

Hotel reports are prepared under the supervision of Ralph C. Janoschka, Chief of the Hotel Division, by Harper E. Carraine.

Hotel Schedule
Statistics for Establishments Excluded From the Census of Hotels, by Geographic Divisions and States.
Statistics for Establishments Excluded From the Census of Hotels, by Type of Establishment, for the United States.

HOTELS: 1935

---0---

GENERAL EXPLANATIONS

AREA AND PERIOD COVERED.---This report presents the findings of the canvass of hotels conducted in the first eight months of 1936. In the canvass, which covered the forty-eight States and the District of Columbia, reports were secured for the activities of hotels for the calender year 1935. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation. Some seasonal hotels operating during the winter season reported their activities for the 1934-35 season rather than for the calender year 1935.

COMPLETENESS OF COVERAGE.---The canvass was made by enumerators who visited each place of business for the purpose of securing a report. Reports for the individual units of chain organizations were secured either from the units themselves or from their respective chain headquarters. It is believed, however, that the coverage of hotels, particularly those which are normally operated for only a part of the year, was somewhat incomplete. Many seasonal hotels were not operating at the time the field canvass was made, and for this reason enumerators were, in some instances, unable to secure reports. Absence of legislation, which during regular Census years makes reporting mandatory, is another reason for incompleteness in coverage of both year-round and seasonal hotels in certain localities. A check of the Census data with current hotel directories and other sources cannot be entirely conclusive because of local differences in the meaning of the designation "hotel". Such a check suggests, nevertheless, that the business represented by hotels from which no reports were obtained, constitutes only a very small proportion of the total amount of hotel business for the country as a whole.

SCOPE OF THE REPORT.---The tables contained in this report present a complete summary of the data furnished by hotels which reported to the Census. It will be found, however, that some items on which information was requested (see schedule Form 41 appended to volume), such as operating expenses, the separation of employees into full-time and part-time, and the members of proprietors' families working regularly in the business, were omitted from the tabulations. The irregularity in the reporting of these items was so great as to impair the significance of such totals as might have been obtained. Even for some of the items for which results are shown, such as number of employees and pay roll by occupational classes, and the percentage of occupancy, it was necessary to restrict tabulations to those reports for the larger hotels in which information furnished on these items was not obviously erroneous.

BASIC DATA.---Tables 1, 2, 3, and 4 present basic data for hotels, separately for States, counties, and selected cities of 10,000 or more inhabitants. The basic data include number of hotels, total number of guest rooms, amount of receipts, number of active proprietors and firm members, average number of employees, and total pay roll for the year. In the tables for States, these data are shown separately for year-round and seasonal hotels.

Table 3 presents statistics for a substantial number of the counties within each State. Data for each county not shown separately are either combined with data for an adjacent county or are included under "Remainder of State". Counties not shown separately have been combined either to prevent disclosure of the operations of individual hotels or single chain organizations; or, occasionally, to obviate the understatement of the hotel facilities and hotel business in individual counties in which some incompleteness in coverage is definitely known to exist.

Similarly, data are presented separately in Table 4 for cities of 10,000 or more inhabitants which justify separate presentation from the standpoint of the amount of hotel business represented, which can be shown individually without disclosing the operations of individual hotels or single chain organizations, and which are believed to be free from serious incompleteness in coverage.

ANALYSIS OF RECEIPTS BY SOURCE.---An analysis of hotel receipts by source is given in Tables 6 and 7, which present figures for year-round and seasonal hotels combined, and for year-round hotels separately, for each State and city of 500,000 or more inhabitants. Data are presented in Table 6 for all but 851, or 2.9%, of the total number of hotels reporting, these 851 establishments having failed to furnish any breakdown of total receipts. Table 7, however, is limited to those hotels reporting separately both receipts from rooms and receipts from the sale of meals, and, consequently, does not include many American plan hotels and some European plan hotels which did not make this further segregation.

EMPLOYMENT AND PAY ROLL.---Detailed data on employment and compensation of employees are presented in Tables 5, 10, and 11. Figures on the number of employees by months, for States and cities of 500,000 or more inhabitants, are shown in Table 5. For States, these figures are also given separately for year-round and for seasonal hotels.

Tables 10 and 11 summarize the information on employees by sex, on employees and pay roll by occupational classes, and on the number of employees receiving gratis meals and/or quarters for the week ending October 26, 1935 or for a more representative pay period. The data are shown only for year-round hotels of 25 or more guest rooms, for States and cities of 500,000 or more inhabitants. A considerable number of hotels meeting these minimum requirements failed to furnish the weekly employment and pay roll information requested. Moreover, a small number of reports, were eliminated from the weekly employment and pay roll tabulations because the figures given were obviously erroneous. It is believed, nevertheless, that the results presented in Tables 10 and 11 are fairly representative of all year-round hotels having 25 or more guest rooms.

SIZE GROUPS.---Tables 8 and 9 present a study of the basic data on receipts, personnel, and pay roll for hotels arranged by size groups based on total number of guest rooms. In these tables information is shown separately for States and cities of 500,000 or more inhabitants.

TRANSIENT AND RESIDENTIAL GUEST ROOMS.---Size groups identical with those in Tables 8 and 9 are used in Table 12 for the presentation of information on the number of guest rooms, separately for transient guests and for residential guests, in year-round hotels of 25 or more guest rooms (see "Rooms for transient and permanent guests" under Explanation of Terms, Page vi). This table is shown for States and cities of 500,000 or more inhabitants.

PERCENTAGE OF OCCUPANCY.---A distribution of year-round hotels of 25 or more guest rooms by percentage of occupancy is shown for States and cities of 500,000 or more inhabitants in Table 13. Because of the complex nature of the inquiry, and the failure of a number of hotels to calculate the percentage in conformity with the instructions given, each figure reported under Inquiry 9 (see Schedule Form) was submitted to a careful scrutiny. For this reason, Table 13 summarizes only those reports for year-round hotels with 25 or more guest rooms in which the information furnished was not obviously inaccurate.

COMPARATIVE TABLES.---Comparison of the basic data for year-round hotels of 25 or more guest rooms for 1929, 1933, and 1935 is presented in Table 14 for States and cities of 250,000 or more inhabitants. However no data for 1933 and 1929 are presented for the State of California and its three cities of 250,000 population, because of lack of comparability with the figures for 1935. This incomparability is due to the inclusion in the 1935 tabulations of a large number of apartment hotels in California which, because of less specific information on type of occupancy, could not be distinguished from apartment houses in 1933 and 1929. No comparative data are presented for seasonal hotels because of differences in coverage arising from the difficulties encountered in connection with each of the three Censuses in canvassing this type of establishment (see "Completeness of Coverage", Page i).

APPENDIX TABLES.---In order to complete the presentation of data for hotels, it was thought advisable to append to this volume tables by area and type of establishment for places of business such as rooming houses, year-round boarding houses, seasonal boarding houses, resorts, transient dormitories, residential hotels, and apartment houses. The information shown in these tables is not a complete summary for places of business which might properly be designated as rooming houses, apartment houses, resorts, etc. The tables merely summarize the data submitted to the Census on the report form for hotels which, upon careful consideration, were eliminated from the hotel tabulations because the establishments could not be regarded as hotels for Census purposes.

EXPLANATION OF TERMS

HOTELS.---The Census includes, principally, establishments designating themselves as hotels and providing hotel accommodations as their major business activity. Establishments reporting a total of less than six guest rooms, or receipts from room rentals amounting to less than $500 for a full year's operation, are excluded from the present Census. Apartment hotels were canvassed and classified as hotels, provided a substantial portion of their receipts was derived from the accommodation of transient guests. Apartment houses, residential hotels catering exclusively to permanent guests, boarding houses, lodging houses, tourist homes or camps, resorts, Y.M.C.A.'s, Y.W.C.A.'s, dude ranches, club dormitories, and other similar establishments furnishing lodging and/or meals to guests are not considered hotels for Census purposes.

In a number of borderline cases, the proprietor's or management's own designation was requested by mail and used as a basis for omitting or including in the hotel tabulations each of the reports in question. Except for a few localities having no hotel licensing laws, information as to the nature of the license under which the place was operated was also requested, and was considered in determining whether or not a particular establishment was actually conducting a hotel business. Hotels having six or more guest rooms, but failing to report separately the amount of income from room rentals, were not omitted unless total receipts amounted to less than $500.

The activities of restaurants and other eating and drinking places operated on the hotel premises by the hotel are included in the hotel reports. On the other hand, similar activities operated as concessions are excluded except for concession rentals, which form a part of the hotel receipts.

YEAR-ROUND HOTELS.---All hotels which are normally in operation at least nine months of the year are considered year-round hotels.

SEASONAL HOTELS.---Hotels which normally operate less than nine months of the year are considered seasonal hotels.

RECEIPTS.---Receipts represent total revenue of the establishment. In addition to receipts from room rentals, the revenue of hotels may include receipts from the sale of meals, receipts from the sale of beverages, receipts from the sale of merchandise (such as gasoline and oil, cigarettes, cigars, etc.), and receipts from other sources - including those for laundering, storage, repairs, rentals for concessions, rental from the lease of space not generally used by hotel guests, etc.

PROPRIETORS.---Only those individual owners and members of partnerships devoting the major portion of their time to the operation of their respective hotels are included. There are, of course, no proprietors in the accurate sense of the term in incorporated businesses. Similarly, no proprietorship information is included for approximately six hundred estates, trusteeships, and receiverships. Members of a proprietor's family are not included as proprietors unless, in addition to devoting the major portion of their time to the operation of the hotel in question, they actually own an interest therein. Those family members (other than proprietors) receiving a stated wage for their hotel services are considered employees.

EMPLOYEES.---Only employees receiving cash wages are covered in the tabulations. Hotel employees include the following: salaried officers of corporations; other executives; office and clerical employees; waiters and waitresses; other dining room, lunch room, bar, and kitchen employees; housekeeping employees; and "all other" employees. The classification, housekeeping employees, for purposes of this report, refers to all persons engaged in the care of rooms and halls, such as chambermaids, housemen, etc. Employees catering to the individual needs of guests, such as doormen, bell boys, and valets, are included under "all other" employees.

AVERAGE NUMBER OF EMPLOYEES.---The total number of paid employees (full-time and part-time combined) working during the pay period ending nearest the fifteenth of the month was reported for each of the twelve months of 1935. The average number of employees for the year, both for year-round and seasonal hotels, represents the sum of the reported employment for each of the months divided by twelve. The average number of employees shown in tables presenting comparisons with 1933 and 1929 differs somewhat in method of computation from the method just explained. In these tables, averages comparable with those presented in the hotel report for 1929 were secured by dividing by four the sum of the number of employees reported for pay periods ending nearest the fifteenth day of April, July, October, and December.

PAY ROLL.---Includes salaries, wages, bonuses, and commissions, paid full-time and part-time employees (including executives and salaried corporation officers) during the year. Hotels were requested to report the pay roll figure prior to any deductions for meals, quarters, uniforms, etc. On the other hand, the pay roll figure is limited to cash compensation only; it does not include the cash value of meals, quarters, uniforms, or other facilities furnished employees free of charge as part of their compensation. The pay roll figure does not include compensation of proprietors or firm members, nor does it take into account amounts received by hotel employees in the form of tips.

EMPLOYEES RECEIVING GRATIS MEALS AND QUARTERS.---Information pertaining to number of employees receiving meals and/or quarters in addition to cash wages was requested for the week ending October 26, 1935 or other more representative pay period. The count of employees receiving one meal daily includes those employees receiving a single meal only, and does not include those employees receiving two or three meals daily. Similarly, the number of employees reported as receiving two meals daily is exclusive of the number receiving a total of three meals per day. The count of employees receiving quarters is independent of the count of employees receiving meals; that is, some of the employees receiving quarters may also receive meals.

ROOMS FOR TRANSIENT AND PERMANENT GUESTS.---Classification of guest rooms according to type of occupancy (Table 12) is based primarily on the decision of each hotel as to the total number of its guest rooms usually available for transient guests and the number usually occupied by or available for residential guests (see Appendix, Form 41, Inquiry 8). Where definition of the terms "transient" and "permanent" was requested, enumerators were instructed to define as permanent guests only those persons seeking lodging for a period of time usually more than a month and receiving as a rule reductions from the full daily or weekly rates.

PERCENTAGE OF OCCUPANCY.---All field enumerators were given the following formula for use in computing the percentage of occupancy:

$$\text{Percentage of Occupancy} = \frac{\text{Total number of occupied room-days for 1935 multiplied by 100}}{\text{Total number of guest rooms multiplied by 365}}$$

To compute number of occupied room-days for 1935, take total number of rooms occupied each day (or part of day) in the year and add these 365 totals. This addition will give the number of occupied room-days for the year.

There is reason to believe that, in many instances, especially in the case of the smaller hotels, the figure supplied represents an estimated percentage rather than a percentage calculated in accordance with the above formula.

GENERAL ANALYSIS

The 28,822 hotels which made returns show an average of $504 total receipts for each of the 1,428,646 guest rooms reported. Restricted, however, to the 3,370 hotels operating less than nine months of the year, total receipts per guest room average only $300, as compared with a corresponding average of $528 for all year-round hotels. An average of one employee for every $2,473 total receipts is obtained by dividing the $720,145,000 total income for all hotels by the 291,165 hotel employees. Adding to the total number of employees the 24,573 active hotel proprietors, this average receipt figure becomes $2,281 for each person (except members of proprietors' families) actively engaged in the hotel business. All employees combined received an average compensation for the year amounting to $659. The average annual cash earnings of seasonal hotel employees ($583) are only slightly less than those of year-round hotel employees ($663), and the total personnel requirements of the two types of hotel appear to be virtually the same, although proprietors constitute a relatively more important group in the case of seasonal hotels.

GEOGRAPHIC DISTRIBUTION.---The distribution of the hotel business by States and geographic divisions is shown in the map immediately preceding Table 1. Three States, New York, Illinois, and California, as indicated in this map, reported $266,283,000, or 37%, of the total amount of hotel business. It is interesting to note in this connection that these same three States represented approximately 21% of the total population of the country as estimated for July, 1936. The three Middle Atlantic States, together accounting for 59% more receipts than any other single geographic division, represent 30% of the entire amount of hotel business; New York alone, with 2,207 hotels, reporting $146,261,000, or 20%, of the total amount of hotel receipts, and 188,303, or 13%, of the total number of guest rooms. Seasonal hotels (see definition, Page iv) are concentrated in Florida, New York, New Jersey, Maine, and California, these five States together accounting for 67% of the total receipts, and for 63% of the total number of guest rooms, reported by this type of establishment.

EMPLOYMENT.---The total number of employees in hotels in 1935 ranged from a minimum of 279,159 in January to a maximum of 320,045, in August. For year-round hotels, January was the month of minimum employment and October the maximum; and, for seasonal hotels, November was the minimum and August was the maximum. The considerable amount of variation from month to month remaining in the table for year-round hotels is due largely to the influence of varying employment in hotels which, while actually in operation more than nine months of the year - and therefore classifiable as year-round hotels for purposes of this report - nevertheless have definite peak seasons.

HOTELS CLASSIFIED BY SIZE.---The pronounced concentration of the hotel business in the larger hotels of 300 or more guest rooms is indicated in Table 8. Hotels of this size although representing only 1.8% of the total number of hotels, reported 39.7% of all hotel receipts. Hotels of from 50 to 299 guest rooms representing 23.8% of the total number of hotels account for 43% of the total business for the year; while hotels of from 6 to 49 guest rooms, comprising 74.4% of the total number, account for only 17.3% of all receipts. It is interesting to note that hotels in this last size group account for 20,653, or 84% of the total number of active hotel proprietors as well as for 18.2% of the total number of paid employees.

HOTELS IN MAJOR CITIES, CLASSIFIED BY SIZE.---8.9% of the total number of hotels, 71.5% of the total amount of hotel business, and 69.6% of all hotel employment, in cities of 500,000 or more inhabitants, is accounted for by hotels reporting a total of 300 or more guest rooms. Hotels of from 50 to 299 guest rooms in cities of this size represent 47.5% of the total number, and 25.6% of the total amount of receipts; while hotels having less than 50 guest rooms, in contrast to the situation for the country as a whole, comprise only 43.6% of the total number of hotels, 2.9% of the total income, and 2.8% of the total amount of hotel employment, within these thirteen principal cities.

ANALYSIS OF RECEIPTS BY SOURCE.---The 27,971 hotels reporting a breakdown of total operating receipts indicate that 81.1% of their $695,210,000 total receipts during 1935 was derived from the two principal sources of hotel income - receipts from room rentals and receipts from the sale of meals. The remaining 18.9% represents receipts from the sale of beverages (10.4%), receipts from the sale of merchandise (1.7%), and receipts from other sources (6.8%). Only 9,029 of the 28,822 hotels reported separately both receipts from room rentals and receipts from the sale of meals. In the case of these 9,029 establishments, receipts from room rentals and receipts from the sale of meals account for 58.8% and 41.2%, respectively, of the $393,890,000 income from rooms and meals combined, this combined figure in turn accounting for 77.9% of receipts from all sources.

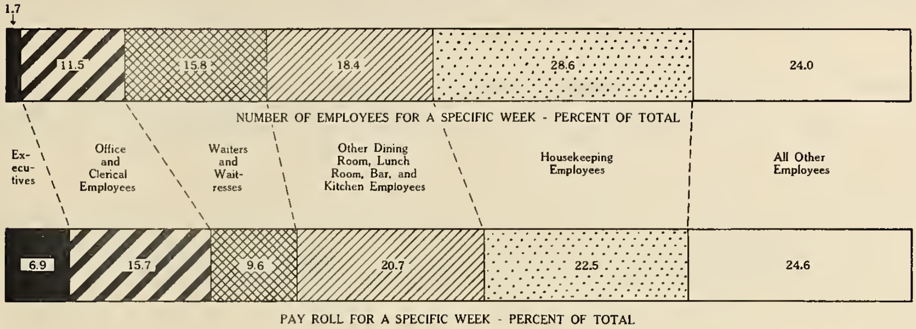
EMPLOYMENT AND PAY ROLL FOR A SPECIFIC WEEK.---The week ending October 26, 1935 was suggested for reporting employment and pay roll information for a specific week, and was used by most of the 9,140 hotels furnishing this type of information. In a few individual instances, however, data in answer to the specific week inquiry were reported as of another more representative week. 106,521, or 57%, of the 186,756 employees classified according to character of work performed are men, while 80,235, or 43%, are women. Average cash earnings of employees in each of the various occupational classes, for this same specific week, are presented below. It must be borne in mind that these average earnings are for full-time and part-time employees combined, and that they do not take into account either earnings in the form of tips (waiters and waitresses, housekeeping employees, etc.) or earnings in the form of annual, quarterly, or monthly bonus payments (executives, etc.). Also, of course, it should be remembered that such cash earnings do not reflect compensation in the form of gratis meals and/or quarters (see Table 11).

Executives	$55
Office and clerical employees	18
Waiters and waitresses	8
Other dining room, bar, and kitchen employees	15
Housekeeping employees	11
All other employees	14

The following chart is based on the United States totals presented in Table 10.

EMPLOYMENT AND PAY ROLL BY OCCUPATIONAL GROUPS: 1935

(For 9,140 Year-round Hotels in the United States Having 25 or More Guest Rooms)

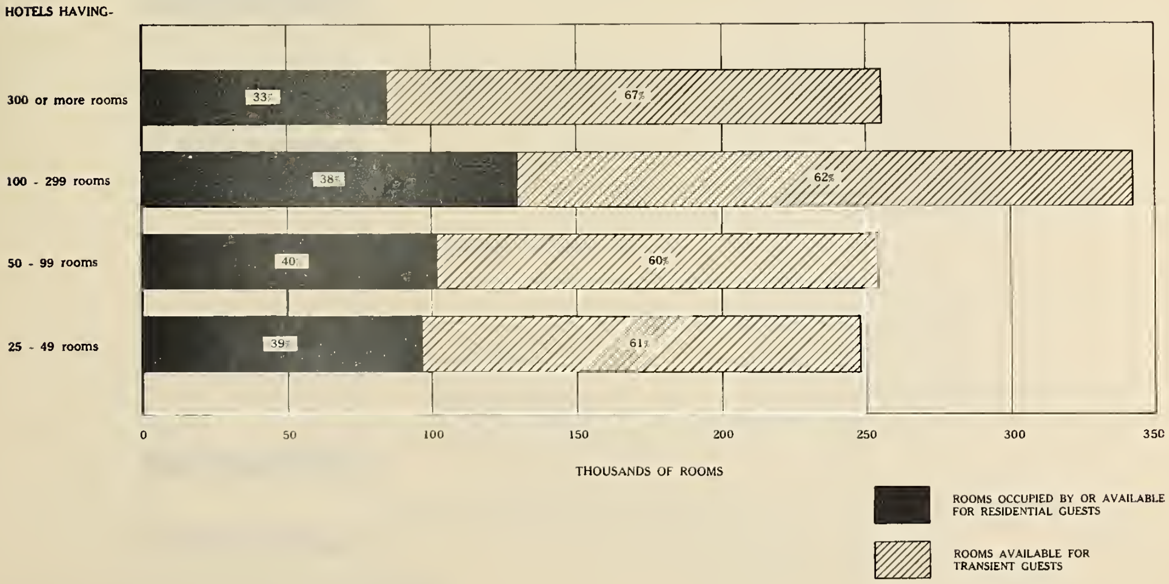


TOTAL NUMBER OF EMPLOYEES - 186,756
TOTAL PAY ROLL - $2,525,262

TYPE OF OCCUPANCY.---Year-round hotels having 25 or more guest rooms reported 687,042, or 62%, of their total number of guest rooms as usually occupied by or available for transient guests (see Explanation of Terms, Page vi). The inclusion in hotel tabulations of reports for apartment hotels catering principally to residential guests, but deriving a substantial portion of their income from the accommodation of transients, is largely responsible for the seemingly high percentage of hotel rooms (38%) shown as usually occupied by or available for permanent guests. The following chart is constructed from the type of occupancy statistics for the United States presented in Table 11.

TOTAL NUMBER OF GUEST ROOMS AND TYPE OF OCCUPANCY: 1935

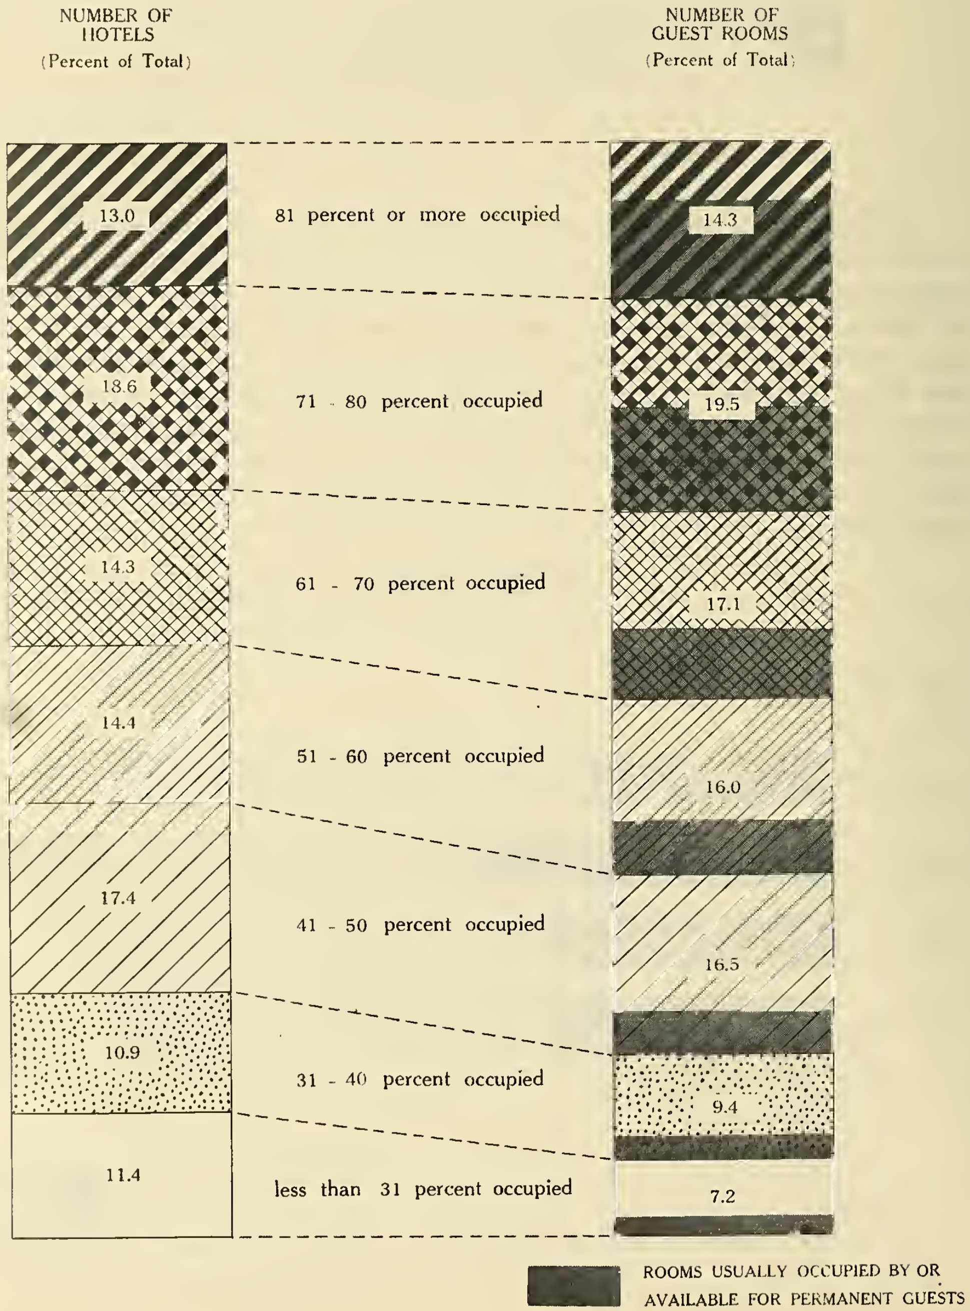
ALL YEAR ROUND HOTELS OF 25 OR MORE GUEST ROOMS



PERCENTAGE OF OCCUPANCY.---As indicated in the following chart, 18.6% of all hotels reporting percentage of occupancy information were between 71 and 80% occupied during 1935. These same hotels represent 19.5% of the guest rooms accounted for by the 12,238 hotels for which percentage of occupancy data are presented. 95,889, or 49.5%, of the total number of guest rooms reported by hotels from 71 to 80% occupied were designated as usually occupied by or available for permanent guests.

PERCENTAGE OF OCCUPANCY: 1935

(12,238 Year-round Hotels of 25 or More Guest Rooms)



GRATIS MEALS AND QUARTERS.---Of the 13,639 year-round hotels of 25 or more guest rooms, 10,055, or 73.7%, furnished meals and/or quarters in addition to cash wages to one or more of their employees. 40,506, or 15.9%, of the total number of employees in year-round hotels of this size received quarters, and 115,126, or 45%, received at least one meal daily. 29,018 more employees received three meals daily than received two meals; and, similarly, 15,802 more employees received two meals daily than received one meal per day (see Table 11).

COMPARISONS WITH 1933 AND 1929.---The amount of year-round hotel business for 1935 reported by hotels having 25 or more guest rooms (the minimum guest room requirement for the 1929 Census) shows a substantial gain over 1933 but is considerably less than the amount of business reported for 1929. The following table summarizes for the United States, with the exception of the State of California (see Comparative Tables, Page iii) number of year-round hotels, total number of guest rooms, receipts, average number of employees (based on number of employees for the specific months of April, July, October, and December), and total pay roll, for each of the three hotel Censuses.

APPENDIX

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

HOTEL AND TOURIST CAMP SCHEDULE

CENSUS OF BUSINESS: 1935

A separate report should be prepared for each establishment. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form.

The report should cover, if possible, the full year's operation for 1935, even if ownership has changed during the year. If more convenient, a twelve-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. Name of establishment ______

b. Name of owner ______ Race (*not for corporations*) ______ (White, Negro, Oriental, Other)

c. Location of establishment
State ______ County ______ Township ______
Name of city, town, or village ______
Street and number ______
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or No*) ______

d. Address (home office or business address) of owner ______

e. Legal form of organization (Place check mark in proper square)
☐ Individual proprietorship ☐ Corporation
☐ Partnership ☐ Other (*specify*) ______

f. Was this establishment operating during any part of 1933? (*Yes or No*) ______

g. Number of establishments owned by this organization in the continental United States (*including the establishment covered in this report*) ______

(1) ______
(2) ______
(3) ______
(4) ______
(5) ______
(CODE—Do not use)

2. KIND OF BUSINESS:

a. Kind of business (*indicate by check mark*): ☐ Hotel ☐ Tourist camp

b. List other business activities (*in addition to that listed under 2a*) conducted by the owner from this establishment

EXAMPLES.—Sale of gasoline; automobile storage (for a separate fee); merchandise sales; swimming pool admissions; laundering, cleaning, and pressing; etc.

______

(6) ______
(7) ______
(8) ______
(CODE—Do not use)

c. Indicate nature of business (*check one*): ☐ Year-round ☐ Seasonal

d. If seasonal, indicate period when establishment is open: From ______ to ______

3. TOTAL OPERATING RECEIPTS:

		Key		Key
a. Receipts from room rentals (*cabins or space for tourist camps*)	$	E–1		
b. Receipts from sale of meals	$	E–2		
c. Total for room rentals and sale of meals (*sum of a and b*)			$	E–3
d. Receipts from sale of beverages (*bar and fountain*)			$	E–4
e. Receipts from sale of merchandise (*gasoline and oil, cigars, cigarettes, etc.*)			$	E–5
f. Receipts from laundering, storage, repairs, and other services			$	E–6
g. Receipts from other sources, including rentals for concessions (*specify sources and amounts*): ______ ______ ______			$	A–1
h. Total operating receipts (*sum of c, d, e, f, and g*)			$	E–7

31545

4. OPERATING EXPENSES (not including cost of merchandise or food):

		Key
a. Total pay roll for the year 1935 for full-time and part-time employees (*salaries, wages, bonuses, and commissions*) (Do not include proprietor's or partners' compensation, but include that of officers of corporations)	$	A-2
b. All other operating expenses (*rent, traveling expenses, advertising, overhead, and all other operating expenses except pay roll*)	$	
c. TOTAL OPERATING EXPENSES (*a plus b*)	$	B-1
d. How much of the total pay roll (*a, above*) was paid to part-time employees? $	Key A-3	

5. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

		Key
a. Total number of proprietors and firm members (*including those reported under 5b below*)		B-2
b. Number of proprietors and firm members devoting major portion of their time to the business		A-4 B-3
c. Number of members of families of proprietors or firm members who are regularly working, full-time or part-time, in the business but to whom no stated salary is paid:		
1. 18 years of age or over		B-4
2. Under 18 years of age		B-5

6. PAID EMPLOYEES AND WEEKLY PAY ROLLS:

(Do not include in this inquiry persons reported in Inquiry 5, above)

EMPLOYMENT AND PAY-ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY

(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season)

Week covered: From ____________, 1935, to ____________, 1935

		Full-time		Part-time	
		Number of paid full-time employees during the week	Pay roll for the week for full-time employees (*salaries, wages, bonuses, and commissions*)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (*salaries, wages, bonuses, and commissions*)
	ITEM	Field 1	Field 2	Field 3	Field 4
a. Executives and salaried corporation officers	C-1		$		$
b. Office and clerical employees	C-2		$		$
c. Waiters and waitresses	C-3		$		$
d. All other dining room, lunch room, bar, and kitchen employees	C-4		$		$
e. Housekeeping employees (*maid, houseman, etc.*)	C-5		$		$
f. All other employees	C-6		$		$
g. TOTAL (*sum of a, b, c, d, e, and f*)	C-7		$		$

		Key
h. How many of the total number of employees shown above (*full-time and part-time combined*) are	Males	B-6
	Females	B-7
i. How many of the total number of employees shown above (*full-time and part-time combined*) are Negroes?		B-8

j. Total number of paid employees (*full-time and part-time combined*) working during the pay period ending nearest the 15th of each month of 1935:

MONTH, 1935	NUMBER	Key	MONTH, 1935	NUMBER	Key	MONTH, 1935	NUMBER	Key	MONTH, 1935	NUMBER	Key
		D-1			D-1			D-2			D-2
Jan		1	Apr		4	July		1	Oct		4
Feb		2	May		5	Aug		2	Nov		5
Mar		3	June		6	Sept		3	Dec		6

(Do not use) A-5 D(2)-7

7. QUARTERS AND MEALS SUPPLIED EMPLOYEES GRATIS (for the week ending October 26, 1935, or other pay period used in Inquiry 6*g*):

		Key
a. Number of employees receiving living quarters gratis		E–8
b. Number of employees receiving gratis—		
1. One meal daily		E–9
2. Two meals daily		E–10
3. Three meals daily		E–11

8. NUMBER OF GUEST ROOMS:

		Key
a. Total number of guest rooms		B–9
b. Number of rooms usually available for transient use		B–10
c. Number of rooms usually occupied by or available for residential guests		B–11

(All rooms must be classified under either 8 *b* or 8 *c*, and the total of 8 *b* and 8 *c* should equal 8 *a*)

9. PERCENTAGE OF OCCUPANCY (for hotels only):

		Key
Percentage of occupancy for the year 1935	(9)_____._____ **(CODE—Do not use)**	A–6

CENSUS OF BUSINESS: 1935

Fred A. Gosnell, Chief Statistician
William A. Ruff, Assistant

This is one of a series of reports presenting the findings of the 1935 Census of Business. The statistics were compiled by the Bureau of the Census from information collected in 1936 in a field canvass of tourist camps in every State in the United States. Funds for the Census were provided by the Works Progress Administration.

This report was prepared under the supervision of Ralph C. Janoschka, Chief of the Hotel and Tourist Camp Division. by Harper E. Carrine.

TOURIST CAMPS: 1935

--O--

GENERAL EXPLANATIONS

AREA AND PERIOD COVERED.--This report presents the findings of the Census of Tourist Camps conducted in the first eight months of 1936. In the canvass, which covered the forty-eight States and the District of Columbia, reports were secured for the activities of tourist camps for the calendar year 1935. Seasonal camps and new enterprises reported for that part of the year during which they were in active operation.

COMPLETENESS OF COVERAGE. The canvass was made by enumerators who visited each identifiable place of business for the purpose of securing a report. It is definitely known, however, that there is some incompleteness in the coverage of tourist camps (see definition, page ii), due both to the difficulties experienced by enumerators in securing reports for seasonal camps not in operation at the time of canvass, and to the voluntary basis on which the Census was taken. While several enumerations and estimates of the number of tourist camps in the United States are available, such figures usually include as tourist camps enterprises which, although maintaining one or more tourist cabins, are engaged primarily in conducting a retail business (restaurants, filling stations, etc.). Consequently, the data contained in this report are not comparable with these available figures, since enterprises engaged primarily in conducting a retail business are classified as retail establishments for Census purposes.

SCOPE OF THE REPORT. The tables contained in this report present a complete summary of the data furnished by tourist camps which reported to the Census. It will be found, however, that some of the items on which information was requested (see Form 41, Hotel and Tourist Camp Schedule, appended to report), such as operating expenses, employment and pay roll for a specific week, gratis meals and quarters, and the members of proprietors' families working regularily in the business, were omitted from the tabulations. Data for these items were not tabulated because of numerous irregularities in reporting, which were found to be so serious as to impair the significance of any totals which might have been obtained. (The percentage of occupancy inquiry (Inquiry 9), as indicated on the report form, was intended for hotels only.)

DESCRIPTION OF TABLES. Three separate tables are presented. Table 1 presents statistics covering number of camps, total receipts, number of active proprietors, average number of employees for the year, and total pay roll. Table 2 analyzes the average employment figures presented in Table 1 showing the number of paid employees working

during the pay period ending nearest the 15th of each month of 1935; while Table 3 shows as detailed an analysis of operating receipts as can be presented from the income information reported under Inquiry 3. Each of the three tables presents statistics separately for tourist camps with filling stations, and for tourist camps without filling stations. The data in Table 2 are shown for the United States by geographic divisions, and in Tables 1 and 3, for the United States by geographic divisions and States.

EXPLANATION OF TERMS

TOURIST CAMPS.---Only those places engaged primarily in furnishing temporary lodging accommodations to tourists in cabins or other similar structures, or in furnishing camping space and other camping facilities to tourists for a fee, are included in this report. The Census does not cover tourist homes furnishing temporary accommodations to motorists in private residences, tourist camps operated by communities, or cottage colonies catering to vacationists rather than to tourists. Statistics for Hotels are presented in a separate Business Census report (April, 1937).

RECEIPTS.---Receipts represent total revenue of the camp. In addition to receipts from cabin and space rentals, the revenue of tourist camps may include receipts from the sale of meals, receipts from the sale of beverages, receipts from the sale of merchandise (gasoline and oil, cigarettes, cigars, etc.), and receipts from other sources.

PROPRIETORS.---Only those individual owners and members of partnerships devoting the major portion of their time to the operation of their respective camps are included. Members of a proprietor's family are not included as proprietors unless, in addition to devoting the major portion of their time to the operation of the tourist camp in question, they actually owned an interest therein. Those family members (other than proprietors) receiving a stated wage for their tourist camp services are considered employees.

EMPLOYEES.---Includes all tourist camp employees receiving cash wages in return for their services. The total number of paid employees (full-time and part-time combined) working during the pay period ending nearest the 15th of the month was reported for each of the twelve months of 1935. The average number of employees for the year, both for year-round and seasonal camps, represents the sum of the reported employment for each of the months divided by twelve.

PAY ROLL.---Includes salaries, wages, bonuses, and commissions paid full-time and part-time employees during the year. Tourist camps were requested to report the pay roll figure prior to any deductions for meals, quarters, etc. On the other hand, the pay roll figure is limited to cash compensation only; it does not include the cash value

camps reported only one receipt figure representing income from all sources combined. Receipts from rentals and meals, however, account for 84.5% of the remaining $13,953,000 receipts, income from the sale of merchandise and from other sources accounting for 11.1% and 4.4% of this amount, respectively.

The total receipts of tourists camps with filling stations which failed to provide a break-down of their receipts amount to $293,000, or 3.0% of the total receipts of all tourist camps with filling stations (9.836,000). Income from rentals and meals for this type of camp, however, represents only 35.8% of the remaining $9,543,000 receipts, 58.2% being derived from the sale of merchandise (gasoline and oil, etc.), and 6.0% from other sources.

PART-TIME PAY ROLL.---Part-time employees in tourist camps without filling stations and in tourist camps with filling stations accounted for 17.9% and 16.1% of the total pay rolls of these two types of camps, respectively. The following table represents pay roll data classified according to full-time and part-time, for the United States and for each of the nine geographic divisions.

ANALYSIS OF PAY ROLL

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

BUREAU OF THE CENSUS
WASHINGTON

CENSUS OF BUSINESS: 1935

SUPERVISOR'S DISTRICT
No. ____
State ____
ENUMERATION DISTRICT
No. ____
County ____
CONSECUTIVE NUMBER OF REPORT
No. ____

A separate report should be prepared for each establishment. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form.

The report should cover, if possible, the full year's operation for 1935, even if ownership has changed during the year. If more convenient, a twelve-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. Name of establishment ____

b. Name of owner ____ Race (*not for corporations*) ____
(White, Negro, Oriental, Other)

c. Location of establishment:
State ____ County ____ Township ____
Name of city, town, or village ____
Street and number ____
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or No*) ____

d. Address (home office or business address) of owner ____

e. Legal form of organization (Place check mark in proper square) ☐ Individual proprietorship ☐ Partnership ☐ Corporation ☐ Other (*specify*) ____

f. Was this establishment operating during any part of 1933? (*Yes or No*) ____

g. Number of establishments owned by this organization in the continental United States (*including the establishment covered in this report*) ____

(1) ____
(2) ____
(3) ____
(4) ____
(5) ____
(CODE—Do not use)

2. KIND OF BUSINESS:

a. Kind of business (*indicate by check mark*): ☐ Hotel ☐ Tourist camp

b. List other business activities (*in addition to that listed under 2a*) conducted by the owner from this establishment

EXAMPLES.—Sale of gasoline; automobile storage (for a separate fee); merchandise sales; swimming pool admissions; laundering, cleaning, and pressing; etc.

____

c. Indicate nature of business (*check one*): ☐ Year-round ☐ Seasonal

d. If seasonal, indicate period when establishment is open: From ____ to ____

(6) ____
(7) ____
(8) ____
(CODE—Do not use)

3. TOTAL OPERATING RECEIPTS:

			Key
a. Receipts from room rentals (*cabins or space for tourist camps*)	$____		E–1
b. Receipts from sale of meals	$____		E–2
c. Total for room rentals and sale of meals (*sum of a and b*)		$____	E–3
d. Receipts from sale of beverages (*bar and fountain*)		$____	E–4
e. Receipts from sale of merchandise (*gasoline and oil, cigars, cigarettes, etc.*)		$____	E–5
f. Receipts from laundering, storage, repairs, and other services		$____	E–6
g. Receipts from other sources, including rentals for concessions (*specify sources and amounts*): ____ ____ ____		$____	
h. Total operating receipts (*sum of c, d, e, f, and g*)		$____	A–1 E–7

31545

4. OPERATING EXPENSES (not including cost of merchandise or food):

		Key
a. Total pay roll for the year 1935 for full-time and part-time employees (*salaries, wages, bonuses, and commissions*) (Do not include proprietor's or partners' compensation, but include that of officers of corporations)	$	A–2
b. All other operating expenses (*rent, traveling expenses, advertising, overhead, and all other operating expenses except pay roll*)	$	
c. TOTAL OPERATING EXPENSES (*a plus b*)	$	B–1

		Key
d. How much of the total pay roll (*a, above*) was paid to part-time employees?	$	A–3

5. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

		Key
a. Total number of proprietors and firm members (*including those reported under 5b below*)		B–2
b. Number of proprietors and firm members devoting major portion of their time to the business		A–4 B–3
c. Number of members of families of proprietors or firm members who are regularly working, full-time or part-time, in the business but to whom no stated salary is paid:		
1. 18 years of age or over		B–4
2. Under 18 years of age		B–5

6. PAID EMPLOYEES AND WEEKLY PAY ROLLS:

(Do not include in this inquiry persons reported in Inquiry 5, above)

EMPLOYMENT AND PAY-ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY
(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season)

Week covered: From______________, 1935, to______________, 1935

		Full-time		Part-time	
		Number of paid full-time employees during the week	Pay roll for the week for full-time employees (*salaries, wages, bonuses, and commissions*)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (*salaries, wages, bonuses, and commissions*)
	ITEM	Field 1	Field 2	Field 3	Field 4
a. Executives and salaried corporation officers	C–1		$		$
b. Office and clerical employees	C–2		$		$
c. Waiters and waitresses	C–3		$		$
d. All other dining room, lunch room, bar, and kitchen employees	C–4		$		$
e. Housekeeping employees (*maid, houseman, etc.*)	C–5		$		$
f. All other employees	C–6		$		$
g. TOTAL (*sum of a, b, c, d, e, and f*)	C–7		$		$

			Key
h. How many of the total number of employees shown above (*full-time and part-time combined*) are	Males		B–6
	Females		B–7
i. How many of the total number of employees shown above (*full-time and part-time combined*) are Negroes?			B–8

j. Total number of paid employees (*full-time and part-time combined*) working during the pay period ending nearest the 15th of each month of 1935:

MONTH, 1935	NUMBER	KEY	MONTH, 1935	NUMBER	KEY	MONTH, 1935	NUMBER	KEY	MONTH, 1935	NUMBER	KEY
		D–1			D–1			D–2			D–2
Jan		1	Apr		4	July		1	Oct		4
Feb		2	May		5	Aug		2	Nov		5
Mar		3	June		6	Sept		3	Dec		6
									(Do not use)		A–5 D(2)–7

7. QUARTERS AND MEALS SUPPLIED EMPLOYEES GRATIS (for the week ending October 26, 1935, or other pay period used in Inquiry 6*g*):

		Key
a. Number of employees receiving living quarters gratis		E–8
b. Number of employees receiving gratis—		
1. One meal daily		E–9
2. Two meals daily		E–10
3. Three meals daily		E–11

8. NUMBER OF GUEST ROOMS:

		Key
a. Total number of guest rooms		B–9
b. Number of rooms usually available for transient use		B–10
c. Number of rooms usually occupied by or available for residential guests		B–11

(All rooms must be classified under either 8 *b* or 8 *c*, and the total of 8 *b* and 8 *c* should equal 8 *a*)

9. PERCENTAGE OF OCCUPANCY (for hotels only):

		Key
Percentage of occupancy for the year 1935	(9) (CODE—Do not use)	A–6

CENSUS OF BUSINESS

Fred A. Gosnell, Chief Statistician
William A. Ruff, Assistant

This is one of a series of reports presenting the findings of the 1935 Census of Business. The statistics were compiled by the Bureau of the Census from information collected in 1936 in a field canvass of places of amusement in every State, city and county, in the United States. Funds for the Census were provided by the Works Progress Administration.

Reports on places of amusement are prepared by Ralph C. Janoschka, Chief of the Amusement Division, assisted by John A. Wolff.

Census of Business Form 40 - Service and Amusement Schedule

PLACES OF AMUSEMENT: 1935

GENERAL EXPLANATIONS

This report presents, for places of amusement, basic data on number of establishments, operating receipts, employment, pay roll and number of proprietors. In addition analytical tables are presented, showing monthly employment, employment and pay roll for a specific week, sex of employees, general statistics by city size groups, and analysis of receipts.

SCOPE OF THE CENSUS.---The Census was taken by enumerators who visited each place of business for the purpose of securing a Census report, or information as to where a report for the establishment could be secured. The Census undertook to cover all places of amusement except those operated by educational institutions, municipalities or other governmental agencies, or fraternal or religious organizations. Only those establishments charging admission, or receiving fees for use of recreational facilities were covered.

The kind of business classifications included in the present Census are materially the same as those for which data are presented in the reports issued as a result of the 1933 Census. There are, however, some changes, and for this reason comparisons between the two Censuses are not recommended. Changes in classifications are explained in detail, wherever they occur, in "Definitions of Classifications" (See page vi).

INCOMPLETENESS OF COVERAGE.---It is definitely known that the coverage of places of amusement is seriously incomplete. This incompleteness is due primarily to the absence of legislation which during regular census years makes reporting mandatory. It arises also from the difficulty of securing reports from many seasonal and transient amusement enterprises which were not in operation at the time the canvass was made. Finally, the nature of some amusement enterprises and of the business which they conduct is such that it was difficult for the enumerator to make the contacts necessary to secure reports.

Incompleteness of coverage is particularly pronounced in amusement parks, professional baseball and football clubs, circuses, race tracks, sports promoters, theatrical productions, and orchestras. In certain regions, also, the coverage of motion picture theaters is seriously affected because of failure to receive reports from several sectional motion picture theater chains.

LIMITATIONS OF PRESENTATION.---The results of the amusement phase of the Census are, from the standpoint of the total amount of amusement business conducted, also affected by incompleteness due to method of classification. Night clubs, and a large number of billiard parlors and other establishments providing amusement were classified as retail establishments rather than as amusement enterprises, since the preponderance of their receipts were derived from the sale of meals and/or merchandise.

Data collected were submitted on an especially designed schedule form used for reporting the operations of both service establishments and places of amusement (see appended schedule, Form 40). However, it was not found possible to present data for amusement enterprises in the same geographic and kind of business detail shown for service establishments in the reports which have been published on the Service phase of the Business Census. Inability to present data for counties and cities without disclosing the operations of individual establishments; incompleteness of coverage in certain areas; and the failure of establishments to furnish certain of the information requested, necessitate a restricted presentation of the data collected on places of amusement.

Although, therefore, the data presented in the following tables represent only a substantial portion, rather than the total amount, of amusement business, such data have a definite value from the standpoint of the significant relationships which may be determined, such as average receipts per establishment, average annual compensation per employee, variation in employment from month to month, etc.

AREA AND PERIOD COVERED.---The canvass covering the forty-eight States and the District of Columbia was conducted in the first eight months of 1936. The activities of establishments for the calendar year 1935 were reported. Seasonal establishments and new enterprises reported for that part of the year during which they were in active operation.

EXPLANATION OF TERMS

ESTABLISHMENTS.---Only recognized places of amusement are considered establishments. The Census includes only businesses which could be readily identified by the enumerators and does not include businesses conducted from the residence of the proprietor without a sign or other means of identification. In order to be classified as a place of amusement, an establishment must have been primarily engaged in providing amusement or recreational facilities - that is, fifty percent or more of the revenue of the establishment must have been derived from admissions or from fees for the use of recreational facilities. If more than fifty percent of the revenue of the establishment was received from the sale of meals or merchandise, or from the sale of service, the report was included in the Retail or Service phase of the Census, respectively.

Each unit of a chain is considered a separate establishment. Concessions operated independently in connection with other businesses are classified as separate establishments. A combined report for an amusement enterprise and the buildings or grounds within which the enterprise is located, was accepted only when both were being operated together as a single unit. Otherwise, separate reports were secured on different schedule forms for amusement enterprises and for the buildings or grounds within which the same were being conducted on a lease, rental, or concession basis. Reports for such buildings and grounds are included in another phase of the Business Census. Businesses showing total receipts of less than $100 for the year are not considered establishments for purposes of the Census, and are not, therefore, included in the tabulations for places of amusement.

KIND OF BUSINESS.---Ordinarily, the classification of an establishment was determined by the kind of business designation as reported. If, however, the report for an establishment disclosed that the preponderance of receipts was from an activity other than that designated, the place of business was classified according to the kind of business from which the major portion of the receipts was derived. An example is the establishment, reported as a billiard parlor, but showing receipts from the sale of cigars, cigarettes and tobacco in excess of fees for the use of billiard tables. Such place of business, regardless of the fact that it had designated itself as a place of amusement, was classified as a cigar store and included in the Census of Retail Trade.

RECEIPTS.---Receipts represent total revenue of the establishment less refunds for returned merchandise and allowances. Receipts were reported in answer to the following inquiries:

a. Receipts for services (Such as hair cutting, shoe repairs, storage, mechanical repairs, window cleaning, etc.)

b. Receipts from amusements or for the use of other recreational facilities (admissions, fees, other charges)
c. Receipts from sale of merchandise including receipts from sale of meals and from fountain (deduct returned goods and allowances)
d. Receipts from other sources (Specify sources)
e. Total operating receipts (sum of a, b, c, and d)

In all cases, where receipt figures are given in the following tables, they represent the total of amounts reported under item e, "Total operating receipts (sum of a, b, c, and d)".

PROPRIETORS.---Only those proprietors and firm members devoting the major portion of their time to the business are included. Adult members of the families of proprietors who were actively employed in, and who devoted the major portion of their time to the business, are not included as proprietors unless they actually owned an interest in the business. Those members of a family (not proprietors) receiving a stated wage were considered employees. The inquiry on proprietorship does not, of course, apply to incorporated businesses.

EMPLOYEES.---The number of employees working during the pay period ending nearest the fifteenth of the month was reported for each of the twelve months of 1935. The average number of employees for the year (full-time and part-time combined) represents a total of the reported employment for these twelve months, divided by twelve. However, in all tables, the total of the "average number of employees" column, represents the sum of the detail of that column, rather than the true average number of employees for the table total, which would be obtained by dividing the sum of the monthly employment by twelve. This same method of treatment likewise explains the failure of sub-totals in the "average number of employees" column to agree exactly with the true averages for the respective sub-divisions.

FULL-TIME EMPLOYEES.---Persons regularly engaged for work for four or more hours per day or for more than three full days per week. Employees working on a full-time basis in seasonal establishments are considered as full-time employees.

PART-TIME EMPLOYEES.---Persons employed less than four hours a day or for less than three full days per week.

EXECUTIVES AND SALARIED CORPORATION OFFICERS.---Includes two types of employees: (a) salaried officers of corporation, such as president, vice president, secretary and treasurer of the corporation, the general auditor and other persons appointed by the Board of Directors; (b) other hired executives, such as office managers, sales managers, credit managers, and others who devote the major portion of their time to responsible administrative and supervisory duties. Data for this classification were reported for a "specific week".

SEX OF EMPLOYEES.---Represents a distribution by sex of the combined number of full-time and part-time employees on the pay roll for a "specific week".

TOTAL PAY ROLL.---Total pay roll represents the salaries, wages, bonuses, and commissions paid full-time and part-time employees (including executives and salaried corporation officers). It does not include compensation of proprietors and firm members.

SPECIFIC WEEK.---The data presented on employees by sex, and on employment and pay roll for a specific week, were reported for the week ending October 26, 1935.

DEFINITIONS OF CLASSIFICATIONS

AMUSEMENT DEVICES.---Included in this classification are those amusement devices usually affiliated with fairs, circuses, amusement parks, etc., such as carousels, ferris wheels, games of chance and skill, etc. Amusement devices located in amusement parks at fairs and beaches, operated on a concession basis, were considered individual establishments and a separate report was secured for each. However, when such devices were under the management of the amusement park, fair, beach, etc., they were included in a consolidated report covering operations of the entire enterprise.

AMUSEMENT PARKS.---This classification includes parks operating amusement devices for the use of the general public upon payment of a fee, but does not include government-operated enterprises, or parks whose devices are operated wholly on a concession basis. Because of the seasonal nature of their operations, amusement parks were frequently closed at the time of the enumerator's visit. Deficiencies in coverage, therefore, exist to some extent in this classification.

BANDS AND ORCHESTRAS.---Only bands and orchestras operated on a commercial basis are included in this classification. Bands and orchestras operated by governmental bodies, schools, clubs, institutions, etc., are not included. Many small bands and orchestras operating on a business basis have no identifiable places of business and were not, therefore, included in the canvass. Consequently, the classification is incomplete in coverage to some extent.

BASEBALL AND FOOTBALL CLUBS, SPORTS AND ATHLETIC FIELDS, AND SPORTS PROMOTERS.---Included in this classification are all sports promoters, professional and semi-professional baseball and football clubs, and stadiums and athletic fields that actually sponsor athletic events. It does not, however, include organizations engaged in the conduct of intercollegiate athletic contests. Stadiums and athletic fields, customarily rented to promoters on a fixed fee or rental basis, are considered real estate enterprises and are not, therefore, included in this phase of the Census. Receipts presented for this classification include revenues from the rental of concessions, and in the case of baseball and football clubs, revenues from the sale of players. This classification, as defined for the present Census, has been amplified to include professional and semi-professional baseball clubs, football clubs, and sports promoters, which were included in the classification "Other Amusements" in 1933.

BATHING BEACHES (not including municipal).---Only bathing beaches owned and operated on a commercial basis are included in this classification. Receipts include admissions, bathing suit rentals, and all other income.

BILLIARD AND POOL PARLORS, AND BOWLING ALLEYS.---This classification includes billiard and pool parlors, bowling alleys, and billiard and pool parlors and bowling alleys combined. Frequently, billiard parlors are operated in conjunction with retail establishments, such as cigar stores, drinking establishments, etc.; or service establishments, such as barber shops, shoe shine parlors, etc. Such establishments to be included in this classification must have reported more than fifty per cent of their total receipts from fees or charges for the use of recreational facilities. If more than fifty per cent of their receipts were received from the sale of merchandise, they were included in the Census of Retail Trade. Similarly, if more than fifty per cent of their receipts were derived from the sale of service, they were included in the Census of Service Establishments.

BOAT AND CANOE RENTAL SERVICE.---This classification includes all boat and canoe rental establishments hiring out small boats (principally rowboats) and canoes to the general public, usually without operators. The receipts reported by such establishments frequently include receipts from storage and moorage of small craft. The classification does not include establishments deriving the major portion of their receipts from power boat rides; these establishments were included in the "Other amusements" group. Boat operators who provide power craft for fishing parties are excluded from the Census, since such operators, for the most part, have no identifiable places of business.

CIRCULATING LIBRARIES.---This classification includes only those establishments primarily engaged in the rental of books on a fee basis. Establishments which furnish books to library departments of retail stores and to independent circulating libraries for public rental, are included. The classification does not, however, include library departments of retail stores or service establishments, unless such departments were operated as concessions and were, therefore, canvassed as separate establishments. Libraries conducted by municipalities, schools, and fraternal and religious organizations are not included.

DANCE HALLS, STUDIOS, AND ACADEMIES.---Included in this classification are all commercially operated dance halls, dance studios, and academies, catering to the general public. Halls rented for private dances or for occasional dances sponsored by fraternal, or other organizations, are considered real estate enterprises and are included in another phase of the Census. This classification differs from the 1933 classification "Dance Halls", in that it now includes dancing schools, studios, and academies, which were not included in the 1933 Census.

HORSE AND DOG RACE TRACKS.---Included in this classification are all dog and horse racing tracks for which reports have been received. In view of the seasonal character of the operations of race tracks, some were closed at the time the field canvass was made, and, consequently, enumerators were not always able to contact the operators for the purpose of securing reports. This classification is not, therefore, complete in coverage. It should, also, be noted that receipts from betting (pari-mutuel machines, etc.) are included in Table 3 under receipts from admissions and fees, since most race tracks did not differentiate between these two sources in reporting their revenue.

RIDING ACADEMIES.---This classification includes all public riding academies and riding schools. It does not, however, include livery stables.

SKATING RINKS.---This classification includes all commercially operated ice-skating and roller-skating rinks.

SWIMMING POOLS (not including municipal).---This classification includes all commercially operated swimming pools but does not include pools operated by governmental agencies or by fraternal or educational organizations. Because of the seasonal nature of their operations, a number of swimming pools were closed at the time of the enumerator's visit and the classification is, therefore, incomplete in coverage to some extent.

THEATERS, MOTION PICTURE (including motion picture theaters with vaudeville).---Included in this classification are all motion picture theaters and all combination motion picture and vaudeville theaters. The canvass in the field was confined to active commercially operated theaters and did not cover occasional motion picture exhibitions given in small halls, or exhibitions sponsored by religious, fraternal or educational organizations. Itinerant exhibitors are not included in this classification, but are included in the miscellaneous amusement group.

Theaters were, for the purpose of the 1933 Census of American Business, classified into three groups, (1) "Theaters - Legitimate Stage and Opera", (2) "Theaters - Motion Picture", and (3) "Theaters - Motion Picture and Vaudeville". Whenever necessary, combinations were made of two and frequently all classifications in order to avoid disclosing the operations of individual concerns. As a result of this procedure the statistics presented for such combined classifications lost much of their significance. In no cases in the present Census are combinations of the two theater classifications (Theaters, motion picture; and Theaters, legitimate stage and opera) made, thus obviating the distortion of the statistics for either classification. In view of the similarity of operations of theaters confining their operations to the exhibition of motion pictures and theaters presenting vaudeville as well, no distinction in classification has been made between the two types for the purposes of the present Census.

THEATERS, LEGITIMATE STAGE AND OPERA; AND THEATRICAL PRODUCTIONS (See definition of "Theaters, Motion Picture, including Motion Picture Theaters with Vaudeville").---This classification includes theatrical productions, opera companies, road companies, stock companies, and those legitimate stage theaters that actually present theatrical productions. Legitimate stage theaters that are normally rented to theatrical productions, stock companies or opera companies, are not included. Combined reports for productions and the buildings within which they are located, were accepted only when both were being operated together as a single unit. Otherwise, separate reports were secured on different schedule forms for the productions and for the buildings within which the same were being conducted on a lease or rental basis. Reports for such buildings are included in another phase of the Census.

OTHER AMUSEMENTS.---The kinds of business comprising this classification do not warrant separate presentation because of the relative unimportance of the number of establishments and total receipts represented. The following are some of the more important kinds of business included in this classification:

Amusement Centers
Aquariums
Carnivals
Exhibits and Expositions
Fishing Grounds
Hunting Preserves
Museums
Rodeos
Tennis Courts

In addition, this classification includes unusual combinations of two or more kinds of amusement enterprises, operated as single establishments, such as dancing and bathing; skating and swimming; bowling and skating, etc.

GENERAL ANALYSIS

Of the 37,677 places of amusement reporting in connection with the Census, 12,024, or 31.9% are motion picture theaters. These theaters account for 72.7% of the $699,051,000 total receipts, 59.0% of the 157,789 employees and 64.4% of the $159,641,000 total pay roll for all places of amusement covered by the Census. While billiard and pool parlors, and bowling alleys represent 32.9% of the total number of places of amusement, they account for only 6.2% of the total receipts, 13.3% of the total number of employees, and 6.7% of the total pay roll. Although, as has been previously stated, the coverage of certain kinds of business in the amusement field is definitely known to be incomplete, such deficiencies in coverage are not sufficient to affect perceptibly the relative importance of these two kinds of business as indicated by the results of the Census.

Relationships between such basic items as establishments and receipts, receipts and employees, and employees and pay roll, are shown in the following table. The averages presented, based as they are on United States totals, can be accepted as indicative of the true averages for each of the respective types of enterprise, although the total figures, themselves, are unquestionably somewhat understated.

RELATIONSHIPS BETWEEN NUMBER OF ESTABLISHMENTS, RECEIPTS, NUMBER OF EMPLOYEES, AND ANNUAL PAY ROLL, BY KINDS OF BUSINESS

Kind of Business	Average Receipts Per Establishment	Average Receipts Per Employee*	Average Number of Employees* Per Establishment	Average Annual Wage Per Employee*
United States	$18,554	$4,430	4.2	$1,012
Amusement devices	4,834	3,736	1.3	878
Amusement parks	29,644	2,762	10.7	803
Bands and orchestras	6,513	1,236	5.3	799
Baseball and football clubs, sports and athletic fields, and sports promoters	59,326	4,672	12.7	1,793
Bathing beaches (not including municipal)	6,762	3,482	1.9	857
Billiard and pool parlors, and bowling alleys	3,486	2,068	1.7	507
Boat and canoe rental service	1,575	3,643	.4	798
Circulating libraries (commercial)	3,261	4,129	.8	830
Dance halls, studios, and academies	3,830	1,368	2.8	499
Horse and dog race tracks	507,281	8,651	58.6	1,918
Riding academies	3,795	2,555	1.5	713
Skating rinks	4,046	2,003	2.0	558
Swimming pools (not including municipal)	2,777	2,429	1.1	655
Theaters, legitimate stage and opera; and theatrical productions	124,241	5,390	23.1	2,205
Theaters, motion picture (including motion picture theaters with vaudeville)	42,265	5,461	7.7	1,105
Other amusements	8,529	3,201	2.7	796

* Full-time and part-time employees combined.

MONTHLY EMPLOYMENT.---An examination of the monthly employment data presented in Table 2 of this volume indicates extreme seasonality in the operations of all but a few kinds of business. Pronounced fluctuations in monthly employment vary, however, both in extent and in the period of the year during which they occur, depending upon the characteristics of the individual type of amusement enterprise. Consequently a composite index of monthly employment in places of amusement cannot be regarded as indicative of the trend of employment throughout the year, and any studies of employment trends for the amusement field should, therefore, be confined to indices of employment for individual kinds of business. The following table presents indices of monthly employment based on the average employment for the year, for each of the more important kinds of amusement enterprises.

INDICES OF MONTHLY EMPLOYMENT: 1935

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Amusement devices	28	31	36	55	119	183	201	202	149	70	65	62

Other amusements	57	61	69	96	111	128	143	143	129	107	87	70

CLASSIFICATION OF EMPLOYEES BY OCCUPATIONAL GROUPS.---Inquiry 6 of the questionnaire (see Form 40 in Appendix) calls for a classification of full-time and part-time employees and their pay rolls for the following occupational groups:

a. Executives and salaried corporation officers
b. Office and clerical employees (not including selling employees)
c. Operative employees
d. Other employees

This information was requested for the week ending October 26, 1935 (While highly seasonal businesses were requested to report instead one week of normal employment during the active season, the data compiled were restricted to establishments reporting for the week of October 26).

Examination of the data reported disclosed that the occupational classifications, particularly "office and clerical employees", "operative employees", and "other employees", were frequently misinterpreted. Consequently it was found necessary to restrict the presentation of this information to two groups, i.e. "total employment" and "employees other than executives and salaried corporation officers".

Inasmuch as only 16,729, or 44.4%, of the total number of places of amusement reporting in connection with the Census supplied the breakdown of employment requested, the data are presented on a "number of establishments reporting" basis, rather than on a census basis.

The following table presents weekly employment and pay roll data for full-time employees by kinds of business. With the exception of motion picture theaters, for which data are shown by geographic divisions, the results of the specific week inquiry do not justify the presentation of information of this nature other than in totals for the United States. Attention is invited to the fact that while 44.4% of the total number of amusement places covered are represented, the size of the sample varies for each of the individual kinds of business.

EMPLOYEES AND PAY ROLL FOR A SPECIFIC WEEK, BY KINDS OF BUSINESS

Kind of Business	Number of Establishments Reporting	Full-time and Part-time Employees Combined		Full-time Employees			
				Total		Employees other than Executives	
		Number	Pay Roll	Number	Pay Roll	Number	Pay Roll

SEX OF EMPLOYEES.---Inquiry 6 of the questionnaire also calls for a classification by sex of full-time and part-time employees combined for the week ending October 26, 1935. This information is presented in the following table for the same 16,729 establishments which reported the classification of employees by occupational groups.

SEX OF EMPLOYEES FOR A SPECIFIC WEEK, BY KINDS OF BUSINESS

Kind of Business	Number of Establishments Reporting	Total Number of Employees (Full-time and Part-time Combined)	Number of Men	Number of Women	Per Cent Women
TOTAL FOR UNITED STATES	16,729	96,462	76,999	19,463	20.2
Theaters, motion picture (including motion picture theaters with vaudeville)	7,650	60,703	46,171	14,532	23.9
Middle Atlantic	1,332	17,052	13,494	3,558	20.9
East North Central	1,570	12,943	10,027	2,916	22.5
Pacific	727	5,905	3,757	2,148	36.4
West North Central	1,194	5,700	4,336	1,364	23.9

New England	446	4,928	3,864	1,064	21.6
West South Central	754	4,348	3,295	1,053	24.2
East South Central	436	2,331	1,799	532	22.8
Mountain	378	2,049	1,331	718	35.0
Billiard and pool parlors, and bowling alleys	5,545	17,011	16,707	304	1.8
Dance halls, studios, and academies	1,498	7,614	4,951	2,663	35.0
Theaters, legitimate stage and opera; and theatrical productions	66	2,133	1,263	870	40.8
Bands and orchestras	280	1,682	1,612	70	4.2
Baseball and football clubs, sports and athletic fields, and sports promoters	79	1,200	1,127	73	6.1
Riding academies	258	645	621	24	3.7
Skating rinks	118	487	394	93	19.1
Circulating libraries (commercial)	245	469	184	285	60.8
Horse and dog race tracks	3	406	396	10	2.5
Amusement devices	96	402	336	66	16.4
Amusement parks	29	277	256	21	7.6
Boat and canoe rental service	72	183	173	10	5.5
Swimming pools (not including municipal)	33	123	94	29	23.6
Bathing beaches (not including municipal)	20	57	39	18	31.6
Other amusements	737	3,070	2,675	395	12.9

STATISTICS FOR CITY SIZE GROUPS.---Although the coverage of places of amusement is admittedly incomplete, the data presented in the following table may reasonably be regarded as being indicative of the concentration of activity in amusement enterprises.

Of the 12,024 motion picture theaters reporting in connection with the Census, 3,221, or 26.8%, are located in cities of 100,000 or more inhabitants. These theaters account for $282,415,000, or 55.6%, of the total receipts, 45,760, or 49.2%, of the total number of employees, and $61,396,000, or 59.7%, of the total pay roll. While more than half (53.2%) of the motion picture theaters are in places of less than 10,000 inhabitants, they account for only 18.9% of the total receipts, 24.5% of the total employment, and 15.5% of the total pay roll.

Billiard and pool parlors, and bowling alleys in cities of 100,000 or more inhabitants number 4,094, or 33.0%, of the total for the United States. This number of establishments accounts for $19,090,000, or 44.1%, of the total receipts, 9,927, or 47.4%, of the number of employees, and $5,678,000, or 53.5%, of the total pay roll. The 5,747 establishments in places of less than 10,000 inhabitants account for 30.9% of the total receipts, 24.8% of the total employment, and 19.9% of the total pay roll.

In this connection, it is interesting to note that while cities of 100,000 or more inhabitants account for only 29.6% of the total population, places of less than 10,000 inhabitants account for 52.4%.

STATISTICS FOR MOTION PICTURE THEATERS, AND BILLIARD AND POOL PARLORS AND BOWLING ALLEYS, BY CITY-SIZE GROUPS

Kind of Business and City-size Group	Per Cent of Total Population 1930	Number of Establishments	Receipts		Active Proprietors and Firm Members	Employees (Full-time and Part-time). Avg. for Year	Total Pay Roll (add 000)

Places of 30,000 to 49,999	3.9	518	2,124	4.9	510	1,200	569
Places of 20,000 to 29,999	3.2	430	1,773	4.1	436	1,010	437
Places of 10,000 to 19,999	5.6	952	3,616	8.4	949	1,849	829
All other areas	52.4	5,747	13,374	30.9	5,615	5,195	2,118

ANALYSIS OF RECEIPTS.---An examination of the data presented in Table 3, on page 42, discloses that receipts from the sale of merchandise, which for all places of amusement amount to $11,402,000, represent only 1.6% of the total receipts ($699,051,000) of places of amusement covered by the Census. In only three classifications do receipts from the sale of merchandise represent substantial portions of the total amount of receipts from all sources combined: in amusement parks, merchandise sales represent 13.4% of total receipts; in bathing beaches, 12.7%; and in billiard and pool parlors and bowling alleys, 11.1%. These three kinds of business account for 55.0% of receipts from the sale of merchandise for all places of amusement reporting.

Receipts from "other sources", which represent receipts other than those derived from admissions, fees and charges for the use of recreational facilities, and from merchandise sales, constitute an important part of the total receipts of only three classifications. These three classifications are boat and canoe rental service, where receipts from other sources amount to 16.0% of total receipts; riding academies (9.0% of total receipts); and baseball and football clubs, sports and athletic fields, and sports promoters (7.9% of total receipts). The high percentages of receipts from other sources to total receipts in these three instances are largely due to storage and moorage fees in the case of boat and canoe rental service; fees for boarding and care of horses in the case of riding academies; and receipts from the sale of players, and rentals of fields and stadiums, in the case of baseball and football clubs, sports and athletic fields, and sports promoters.

CENSUS OF
BUSINESS

PLACES OF AMUSEMENT: 1935
UNITED STATES SUMMARY
TABLE 1 – ESTABLISHMENTS, RECEIPTS, PERSONNEL, AND PAY ROLL, BY GEOGRAPHIC DIVISIONS AND STATES

CONFIDENTIAL GOVERNMENT REPORT

Section 8 of the Act creating the Department of Commerce and Labor, approved February 14, 1903, provides that: "The Secretary of Commerce shall from time to time make such special investigations and reports * * * which he himself may deem necessary and urgent." Acting upon this authority, I have authorized and instructed the Director of the Census to take a Census of Business covering the calendar year 1935. We ask for the cooperation and assistance of the business men of the United States in this undertaking and assure them that their individual reports will be held *absolutely confidential.* Only sworn employees of the Bureau of the Census will be permitted to examine your report, and no information will be given to any person, whether in Government service or private life, which would disclose, exactly or approximately, any of the facts or figures in your report. The information will be used for *statistical purposes only.*

DANIEL C. ROPER, *Secretary of Commerce.*

Form 40
CENSUS OF BUSINESS
Federal Works Project

SERVICE AND AMUSEMENT SCHEDULE

DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS
WASHINGTON

CENSUS OF BUSINESS: 1935

SUPERVISOR'S DISTRICT
No. ....
State ....
ENUMERATION DISTRICT
No. ....
County ....
CONSECUTIVE NUMBER OF REPORT
No. ....

A separate report should be prepared for each service establishment (including personal service, business service, and mechanical repair service) or place of amusement. Combined reports for two or more establishments, even though under the same management or ownership, cannot be accepted on this form.

The report should cover, if possible, the full year's operation for the calendar year 1935, even if ownership has changed during the year. If more convenient, a twelve-month period ending within a month before or after December 31, 1935, may be covered.

1. DESCRIPTION OF ESTABLISHMENT:

a. NAME OF ESTABLISHMENT ....

b. NAME OF OWNER .... RACE (*not for corporations*) ....
(White, Negro, Oriental, other)

c. LOCATION OF ESTABLISHMENT
State .... County .... Township ....
Name of city, town, or village ....
Street and number ....
Is this street and number located within the corporate limits of the city, town, or village named above? (*Yes or No*) ....

d. ADDRESS (HOME OFFICE OR BUSINESS ADDRESS) OF OWNER ....

e. LEGAL FORM OF ORGANIZATION (Place check mark in proper square)
☐ Individual proprietorship ☐ Corporation
☐ Partnership ☐ Other (*specify*) ....

f. WAS THIS ESTABLISHMENT OPERATING DURING ANY PART OF 1933? (*Yes or No*) ....

g. NUMBER OF SERVICE OR AMUSEMENT ESTABLISHMENTS OWNED BY THIS ORGANIZATION ANYWHERE IN THE CONTINENTAL UNITED STATES (*including the establishment covered in this report*) ....

1. ....
2. ....
3. ....
4. ....
5. ....

(CODE—Do not use)

2. KIND OF BUSINESS:

a. KIND OF BUSINESS ....
(Give the usual name or designation for the kind of business from which the major part of the operating receipts is derived)

EXAMPLES.—Barber shop; beauty parlor; photographic studio; shoe repair shop; employment agency; radio repair shop; watch, clock, and jewelry repair shop; automobile rental service; storage garage; motion-picture theater; motion-picture and vaudeville theater; legitimate theater; billiard parlor; bowling alley; swimming pool; etc.

6. ....
7. ....

(CODE—Do not use)

b. List other business activities (*in addition to that specified under 2a*) conducted by the owner from this establishment.

....

3. TOTAL OPERATING RECEIPTS:

		Key
a. Receipts for services .... (Such as hair cutting, shoe repairs, storage, mechanical repairs, window cleaning, etc.)	$..............................	E–1
b. Receipts from amusements or for the use of other recreational facilities (*admissions, fees, other charges*)	$..............................	E–2
c. Receipts from sale of merchandise including receipts from sale of meals and from fountain (*deduct returned goods and allowances*)	$..............................	E–3
d. Receipts from other sources (*specify sources*):	$..............................	E–4
e. TOTAL OPERATING RECEIPTS (*sum of a, b, c, and d*)	$..............................	A–1 E–5

31495

4. OPERATING EXPENSES (not including cost of merchandise):

		Key
a. Total pay roll for the year 1935 for full-time and part-time employees (*salaries, wages, bonuses, and commissions*) (Do not include proprietor's or partners' compensation, but include that of officers of corporations)	$	A-2
b. All other operating expenses (*rent, interest, traveling expenses, advertising, overhead, and all other operating expenses except pay roll*)	$	
c. TOTAL OPERATING EXPENSES (*a plus b*)	$	B-1 E-6

		Key
d. How much of the total pay roll (*a, above*) was paid to part-time employees?	$	A-3
e. Total rent for 1935 (Answer question *e* only if establishment is located in rented premises)	$	E-7

1. Was any part of the premises subleased, used for living quarters, or for other purposes not connected with the business reported on this form? (*Yes or No*) ____________

5. PROPRIETORS AND FIRM MEMBERS (does not apply to corporations):

		Key
a. Total number of proprietors and firm members (*including those reported under 5b below*)		B-2
b. Number of proprietors and firm members devoting major portion of their time to the business		A-4 B-3
c. Number of members of families of proprietors or firm members who are regularly working, full-time or part-time, in the business but to whom no stated salary is paid:		
1. 18 years of age or over		B-4
2. Under 18 years of age		B-5

6. PAID EMPLOYEES AND PAY ROLLS:
(Do not include in this inquiry persons reported in inquiry 5, above)

EMPLOYMENT AND PAY ROLL DATA FOR FULL-TIME AND PART-TIME EMPLOYEES FOR ONE WEEK ONLY
(Give figures for week ending Oct. 26, 1935. For highly seasonal businesses, report instead one week of normal employment during active season)

Week covered: From ____________, 1935, to ____________, 1935

		Full-time		Part-time	
		Number of paid full-time employees during the week	Pay roll for the week for full-time employees (*salaries, wages, bonuses, and commissions*)	Number of paid part-time employees during the week	Pay roll for the week for part-time employees (*salaries, wages bonuses, and commissions*)
	ITEM	Field 1	Field 2	Field 3	Field 4
a. Executives and salaried corporation officers	C-1		$		$
b. Office and clerical employees (*not including selling employees*)	C-2		$		$
c. Operative employees	C-3		$		$
d. Other employees	C-4		$		$
e. TOTAL (*sum of a, b, c, and d*)	C-5		$		$

			Key
f. How many of the total number of employees shown above (*full-time and part-time combined*) are	Males		B-6
	Females		B-7
g. How many of the total number of employees shown above (*full-time and part-time combined*) are Negroes?			B-8

h. Total number of paid employees (*full-time and part-time combined*) working during the pay period ending nearest the 15th of each month of 1935:

MONTH, 1935	NUMBER	Key	MONTH, 1935	NUMBER	Key	MONTH, 1935	NUMBER	Key
		D-1			D-1			D-2

Research Geographer

The Census of Business was made possible through an allocation of funds to the Bureau of the Census by the Works Progress Administration.

INTRA-CITY BUSINESS CENSUS STATISTICS

FOR

PHILADELPHIA, PENNSYLVANIA

Introduction

Since the inception of periodic Censuses of Business there has been a growing realization that, for the larger cities of the United States, intra-city statistics are needed as a refinement for city-wide publications. In recognition of this need, with the cost of tabulations borne by local city agencies, a few Business Census publications have been made using city wards and census tracts. Although statistics by these areas only partially fulfill the most general need for intra-city business data, such tabulations continue to be requested.

Experimental work conducted during the past year has thrown much light on the problem of providing intra-city business statistics. Experiments have revealed that the retail structures of cities of less than 250,000 inhabitants, for the most part, are centralized to such a degree that, aside from a few scattered outlying business streets and isolated stores, there is little business done outside the central business district. Therefore, the focus of this experimentation was on the thirty-seven principal cities of the United States, cities the retail structure of which are characterized by a high degree of decentralization.

In attempting to evolve a tenable method for establishing intra-city business areas for the principal cities, experiments were based on the Business Census schedules of Chicago, Philadelphia, Cleveland, and Atlanta. These cities, it was assumed, possessed a suitable gradation in population and therefore should represent an adequate sample of the business conditions of principal cities. The intra-city statistics herein presented are for the City of Philadelphia. Since the central headquarters for the 1935 Census of Business was in Philadelphia, it was logical to choose this city for experimental work. This decision facilitated a field check of all statistical and cartographic conclusions.

City Retail Structure

During the past decade a number of research investigations have revealed many valuable facts concerning the localization of individual retail stores and the composite retail structure of cities. The preeminent fact evident to all is the extremely heterogeneous character of store location, which fact casts doubt on all but the most general classifications of city retail structure. Research conducted by the Census, and substantiated by other investigators in the field, has indicated: (1) that city retail structure, for the most part, may be classified into five principal types; and (2) that volume of sales provides the single best index for classifying city retail structure. This latter hypothesis has result from a study of variables affecting the localization of retail outlets. This study has cast doubt on the single or combined use of the criteria of store-size, store street-frontage occupance, and store appearance; pedestrian, mass, and vehicular traffic counts; rental and land value data; and the proximity of resident population of a high or low income class.

The five major types of retail structure which experimentation and field study have shown to be possessed in common by the principal cities: are (1) the central business district; (2) the outlying business center; (3) the principal business thoroughfare; (4) the neighborhood business street; and (5) the isolated store cluster. These structural types are distinguished by the volume of sales of their business establishments; by the kinds of commodities sold; by the spacial concentration or scatter of their outlets; and by the extent and character of their customer tributary areas. A typical distribution of each of these five structural types is illustrated by Philadelphia, Pennsylvania (Fig. 1).

The central business district is the retail heart of each city. Here, individually and collectively, retail stores do a greater volume of business per unit area than elsewhere within the city. This areal concentration is manifested by the use of multi-storied buildings of which retail stores, for the most part, occupy choice street level frontage, service establishments are concentrated into upper story offices, and residential occupance is restricted to scattered hotels. Retail occupance is characterized by large department stores, numerous women's and men's clothing stores, furniture stores, shoe stores, jewelry stores and similar outlets selling shopping goods. Likewise, though of subordinate importance, there are numerous drug stores, tobacco stores, restaurants, and other stores selling convenience goods. This district draws customers from all parts of the city proper and from outlying suburbs and nearby incorporated towns. Many people, besides being customers, are likewise employed in the various commercial and service occupations which constitute the complex of human activity within this district. To serve this movement of purchasing and working population to and from residential areas, all modes of intra-city transportation are focused here. This district, therefore, experiences extreme traffic congestion during the workday and more particularly during the morning and late afternoon "rush hours". The personal inconvenience of this congestion, and the commutation-cost of time and money have all favored the development of the outlying business center, catering to the shopping goods wants of outlying population.

The outlying business center represents, in miniature, the same type of retail structure characterizing the central business district. The center possesses a marked areal concentration where closely spaced retail stores do a volume of business exceeded only by those of the central district. Here, for the most part, are found shopping goods outlets such as women's and men's clothing stores, furniture stores, shoe stores, jewelry stores, one or more large department stores and an admixture of convenience goods stores. Although individual outlying business centers do not draw customers from all parts of the city, they frequently attract them from long distances. Since these centers depend on customers drawn from wide areas, they all have developed at focal points of intra-city transportation where pedestrian traffic is increased by passengers of mass and vehicular conveyance.

The principal business thoroughfare is characterized by the co-existence of two related attributes. It is both a business street and a traffic artery. As a business street it possesses large, widely-spaced shopping and convenience goods stores. As a traffic artery it carries a heavy density of mass and vehicular traffic. This dense traffic primarily results from attractive forces exerted on residential population by the central business district or by some outlying business center. Although stores of this structural type cater to, and are primarily dependent on customers derived from this dense traffic, their presence has little counter effect on the density of this traffic. Offering the special inducement of ample curb-side parking space, these stores manage to thrive by attracting customers from a small fraction of the passengers of this intercommunity traffic.

The neighborhood business street is primarily of neighborhood significance. It draws customers, almost without exception, from within easy walking distances. This structural type consists of more or less continuous rows of grocery stores, meat markets, fruit and vegetable stores, drug stores, and·other convenience goods outlets, interrupted by a minor admixture of shopping goods stores. These streets extend throughout the residential portions of the city. They either take the form of a more or less regular network following the principal mass transportation and trucking routes which are undesirable for residential purposes, are extensions to outlying business centers, or are isolated from other retail structures.

The isolated store cluster is the final and individually the least significant type of retail structure. These clusters usually comprise two or more complementary rather than competitive convenience goods stores. Thus there may be a drug store, a grocery store, a meat market, a fruit and vegetable store, a delicatessen and possibly a small lunch room grouped together at a minor street intersection. These stores usually supply a large portion of the immediate convenience goods wants of residential families located within a easy walking distance. Frequently these store clusters develop in sparsely settled fringes of the urban area, but in many instances they are found within densely populated residential areas, restricted, by the chance of occupance or by zoning regulations, to a scant block or even a city lot.

Finally, although they do not constitute a distinct structural type, it should be mentioned that within any of the principal cities there are numerous instances of single isolated retail stores. Of these the corner drug store,the grocery store, and the delicatessen are the most numerous, although individually,they do a small volume of business. Other less numerous outlets, such as milk distributors, coal and lumber yards, mail order houses and the retail stores of mail order houses, as a rule, do a large volume of business. It is the hetrogeneous character of these stores, their relative unimportance when taken in aggregate, and in many instances, their unusual function (such as a milk distributor serving a wide area with house to house wagon delivery), which supports the conclusion that they should not be classified as a distinct structural type.

Intra-City Business Areas

The general problem of intra-city analysis is time honored. In the field of population much has been done to provide a solution. To date,in the United States, some fifty principal cities have been divided into Census Tracts. These tracts form permanent statistical units for intra-city analysis of present population conditions and of population trends. These tracts,for the most part,are relatively homogeneous residential areas possessing from 3,000 to 8,000 inhabitants, which were established by local city groups, and which were checked by the Bureau of the Census, both as to their boundaries and their total population.

In spite of continued requests for Business Census statistics by wards and census tracts,investigation has shown that such intra-city data are ill-adapted for any but the most general analyses. Wards, as business areas, were eliminated by the impermanence of their boundaries, rendering their use impractical for business trend studies. Business statistics by individual census tracts have been requested so frequently that,as a preliminary to any investigation,their utility needed to be determined. In evaluating this and other methods whereby permanent intra-city business areas might be established, it was necessary to ascertain if they could be satisfactorily employed in delimiting the five principal types of city retail structure.

The use of individual census tracts as intra-city business areas produced unsatisfactory results. By plotting the volume of sales and number of outlets for each block on the tract maps of Chicago, Philadelphia, Cleveland, and Atlanta, it was possible to observe their retail structures in relation to tract boundaries. This revealed a number of census tracts containing no retail stores and many more containing so few outlets that the danger of disclosure would have made publication impossible. Furthermore, census tracts, in a majority of cases, had business street boundaries. Business streets, though logical boundaries between residential areas, were considered illogical boundaries for areas to be used for intra-city business analysis. For such analysis, business streets represent the most important statistical unit and, by using individual census tracts, such business streets would become haphazardly severed. The data of one severed portion would be lumped with possibly two or three additional portions severed from other business streets. Tabulations for such areas would result in a statistical hodgepodge. Finally, it was necessary to consider the illogical result, had business data for the central business district of an outlying business center been divided among as many as twenty, or even five, census tracts. Such findings forced the conclusion that, used individually, census tracts are entirely unsuited for intra-city business analysis.

A second method, that of establishing business areas by combining cenus tracts, was investigated. Obviously, this method overcame the objection of illegal disclosure. It had been assumed by many that, in this way, tenable correlations could be drawn between population and retail trade. Even a cursory examination of the facts threw doubt on any blanket acceptance of this assumption. The daytime habits of city population were known to be characterized by extreme mobility. Transportation by auto, street car, motor coach, elevated, subway, and suburban railroad had made possible stupendous mobility of population. A distinction needed to be drawn between static city population at overnight rest in dwelling places, and population in motion engaged in the daily activities of city life. This population in motion had been found to indulge in selective buying. Major purchases, such as clothing, automobiles, furniture, and a host of other shopping goods, it was found were obtained where selection was greatest. People travelled long distances to make such purchases in the central business district or in the outlying business centers. These conditions seemed to force the conclusion that there is little correlation between outlying community purchasing power and the number of shopping goods stores found in these communities; and that such correlations as probably exist would be between local resident purchasing power and local convenience goods stores. Therefore, any general assertion of the feasibility of comdined census tracts as a basis for correlating population and retail trade needed to be carefully qualified and at best should be applied only to specific commodities.

Besides the probable limited utility of census tract combinations for intra-city business areas in this respect, there were several other objections to this method. Many objections to using individual census tracts also applied here. It was found that the business street boundaries of census tracts rendered impracticable the use of tract combinations to set off the shopping goods stores of the central business district or the outlying business centers. This procedure combined convenience goods store data from one side of separated neighborhood business streets with the desired shopping goods data, and thereby final tabulations were distorted by the inclusion of data incomparable both in kind and in the sales volume of individual outlets. Furthermore, census tracts, for the most part, were found to be rectangles oriented either north-south or east-west. This shape and orientation proved particularly ill-adapted for the sharp delimitation of outlying business centers that followed diagonal streets. Finally, the long axes of census tracts were frequently at right angles to the principal business streets of either the central business districts or the outlying business centers. Combining these tracts had the effect of including extensive residential sections in an area which should conform closely to a specific concentration of shopping goods outlets.

Based on these negative findings, several positive conclusions were crystallized concerning the requirements of satisfactory intra-city business areas. It was concluded that intra-city business areas should make possible the isolation of each kind of retail structure; that their use should facilitate a large number of desirable statistical combinations of retail data; and that it should be possible to make necessary boundary adjustments to fit important changes in the retail structure of any given city. The method devised appears to fulfill these requirements to a fortuitous degree. This method establishes business areas of three types (herewith likewise illustrated by Philadelphia, Pennsylvania, Fig. 2.). First, closely confined areas for the central business district and outlying business centers were delimited by applying a field tested lower limit of block-frontage-volume-of-sales. For the outer zone of the central business district, and the outlying business centers, a block-frontage lower limit of $75,000 was used with the requirement of a central nucleus of at least four contiguous blocks of frontage with a volume of sales of over $100,000 each. For the inner zone of the central business district, a block-frontage lower limit of $500,000 was used. Second: neighborhood business streets and isolated store clusters, characterized for the most part by average annual store sales of less than $15,000, were set off into large residentially homogeneous community business areas of combined census tracts. The residential homogeneity of these areas was determined from median rental and house value census statistics, and from other data indicative of community living standards. Finally segments of principal business thoroughfares were set off for separate tabulation so that they did not overlap other areas. These segments were characterized by establishments with an average annual volume of sales of over $15,000; discontinuous occupance of street frontage; and by their position facing main traffic thoroughfares.

It was recognized, though not illustrated by this study, that to completely provide for intra-city business analysis, area data should be given for all suburbs and towns contiguous to each principal city. This conclusion is in harmony with the fact that city population and the retail stores serving that population are practically unaffected by municipal, township, county, or state boundaries. The successful consummation of this objective is handicapped by the absence, or inadequacy, of street-grid base maps for many of the suburbs and towns comprising the greater urban areas of the principal cities. In the case of contiguous municipalities, it probably will be practicable to designate them as separate community business areas and give separate tabulations for their business centers or business thoroughfares, if justified by an analysis of block-frontage-volume-of-sales. As for contiguous unincorporated suburbs, probably the limit of statistical refinement that could be expected would be breakdowns by townships or other minor civil divisions.

A Brief Summary of the Intra-City Retail Trade of Philadelphia, Pennsylvania

General Conditions

The city of Philadelphia, the third most populous city of the United States, had an aggregate of over 29,000 retail stores operating during 1935. These stores enjoyed a sales volume of more than $655,000,000 or approximately $22,000 per establishment. A general concept of the condition of this business is gained by allocating the sales volume of these stores to some nine kinds of business and one miscellaneous group (Table 1). From this tabulation it is to be noted that the food group comprises roughly one-fourth and the general merchandise group another fourth of the total sales volume of the city. When combined, the chief shopping goods groups---automotive, filling stations, general merchandise, apparel, furniture, and lumber-building-hardware---account for over 50 per cent of the sales; whereas, the convenience goods groups---food, restaurants, and drug stores---total only 38 per cent. Finally, it may be noted that the average sales per store of the general merchandise group totals nearly 5 times that of the next largest outlet, namely, those of the automotive group, and over 14 times that of the food stores and filling stations.

The condition of the retail trade of Philadelphia is further revealed when subdivided into the 4 business area types (Table 2). Centralization is here manifested by the sales volume of the central business district, totalling 37 per cent of the city. The commodity needs of the decentralized resident population and the traffic congestion of the central district have favored retail decentralization. This condition is manifested by the presence of outlying business centers, aggregating over 19 per cent of the total sales and by the community business areas totalling over 40 per cent.

The condition of each of the 4 business area types is shown by Table 3. For the central business district, the following facts are noteworthy: the concentration of large stores with an average annual sales volume of over $90,000 and the large size of stores in the general merchandise group, averaging over $2,800,000; the apparent inconsistency of enterprise represented by 18 filling stations with an average annual sales of less than $17,000, or roughly one-fifth of the average for all establishments; and the dominance of shopping goods stores with sales comprising nearly 74 per cent of the total. As for the outlying business centers, average sales per store have dropped to the $23,000 level and the largest single outlets are found in the automotive group; the food group has increased its importance to 28 per cent; and shopping goods stores dominate the centers, but with a decreased aggregate of 48 per cent of the total sales. Consistent with the definition of principal business thoroughfares, they are dominated by large automotive establishments averaging over $118,000 per outlet, and by a general dominance of shopping goods groups with a combined total of 60 per cent. Finally, the community business areas, excluding all other areas, reveal a condition consistent with the definition of neighborhood business streets and isolated store clusters, which they were to enclose. Here convenience goods stores are distinctly in the majority with a numerical total of 66 per cent and a sales total of 55 per cent. The stores of the general merchandise group represent an exception to the prevailing small store-size of these areas, having a high average annual sales volume of over $65,000.

Finally, the condition of each kind of business as revealed by its distribution among the 4 business area types is shown by Table 4. Briefly, some of the more striking facts may be summarized. Food stores show a primary concentration in the community business areas, where over 81 per cent of their number and 69 per cent of their sales were reported; and a secondary concentration in the outlying business centers, where larger food stores account for 22 per cent of the combined sales. Stores of the automotive group show a more even distribution, are characterized by their large size and importance in the outlying business centers and principal business thoroughfares, and by their small size but large numerical aggregate in the community business areas. Filling stations show a wide dispersion, chiefly located in the community business areas, where 85 per cent of the outlets and 78 per cent of the annual sales were recorded. General merchandise and apparel stores are predominately centralized in the central business district, whereas lumber-building-hardware, restaurants, and drug stores are primarily decentralized throughout the community business areas, with secondary concentrations of their larger outlets in the central business district and the outlying business centers.

The Central Business District

The marked concentration of shopping goods business in the central business district and the large size of its individual outlets has been revealed. An examination of Table 5 shows further that this condition of centralization is even more markedly manifested in the inner zone of the central district. Here, 1,572 stores enjoyed a sales volume of over $218,000,000; an average of over $138,000 per outlet, in contrast to an average of $23,000 in the outer zone. So great is this concentration, really restricted to several dozen blocks, that these stores of the inner zone accounted for one-third of the combined retail sales of the city.

The condition of the inner and outer zones of the central business district, as these are subdivided by kinds of business, is shown by Table 6. In harmony with large store-size and concentration of business, the inner zone is dominated by shopping goods stores with a combined sales volume of approximately 78 per cent of the total. This group is almost wholly composed of very large general merchandise and apparel stores, accounting for nearly 74 per cent of the sales total. As for the outer zone, its peripheral character is manifested by the distinctly subordinate position of the general merchandise group and the apparel group. Here the proportion of shopping goods stores sales, in spite of an increase to 13 per cent in the automotive group, has fallen to the insignificant total of 40 per cent.

Finally, the special character of the central business district is strikingly shown by the distribution of each kind of business among its inner and outer zones (Table 7). In this case, with rather an even numerical distribution of stores between the two zones (the inner with 1,572 and the outer with 1,143), the concentration of sales volume in the inner zone is from nearly 100 per cent in the case of the general merchandise group to well over 70 per cent for each of the food, apparel, furniture, restaurants, and drug store groups. In only one case is this condition reversed, namely, by the automotive group, of which over 78 per cent of the sales were recorded in the outer zone .

The Outlying Business Centers

The outlying business centers, in comparison to the central business district, possess a secondary character, both in combined concentration of retail sales and in average annual sales per store. By examining Table 8, it is evident that, with two minor exceptions (Centers 21 and 23), this secondary character of average annual sales per store applies individually to each outlying business center. Besides this outstanding characteristic, it is notable that these centers deviate from a total of 23 stores to 968 stores, with an average of 181 outlets; and deviate proportionally less in volume of sales from $1,133,000 to $15,051,000 with an average of $4,200,000.

The condition of the individual outlying business centers, as revealed by their subdivision into 9 kinds of business, is one of extreme diversity (Table 9). Although it is not the purpose of this presentation to give a detailed consideration of each center, a few of outstanding individuality may be noted. For example, there are: four centers with over 50 per cent of their individual business derived from sales in the food group (Centers 5, 15, 16, and 29); three other centers have from 50 to 70 per cent of their sales volume accounted for by the automotive group (Centers 6, 21, and 23); three centers derived a substantial proportion of their business from sales in the general merchandise group (Centers 4, 10, and 11) or in the apparel group (Centers 9, 10, 27, and 32); several other centers are as well represented in the furniture group (Centers 13, 17, 20, and 31); and restaurants are outstandingly represented in five centers (Centers 5, 20, 23, 24, and 30). In contrast, there is little concentration in the case of any individual center in such enterprise as filling stations and drug stores; and one-third of the centers, those not listed above, show little deviation from the average condition.

The Principal Business Thoroughfares

The general condition of the principal business thoroughfares is shown by Table 10. This tabulation reveals a ten-fold fluctuation from 13 to 121 stores, with a low average of 50 outlets per thoroughfare; whereas, there is a fifteen-fold deviation in volume of sales from $287,000 to $4,310,000 with an average of $1,333,000 per thoroughfare. In addition, the large size of the individual outlets of these thoroughfares is manifest by an average of well over $26,000; the widely spaced character of these stores is evidenced by their small number in relation to the length of these thoroughfares (Fig. 2); and the average store sales of two thoroughfares (H. and O.), over $100,000 per outlet, is comparable to that of the central business district.

The individual condition of each principal business thoroughfare is shown by their allocation into 9 kinds of business (Table 11). Business thoroughfares of two types are indicated: six thoroughfares are outstandingly dominated by stores of the food group (Thoroughfares A, B, C, L, N, and Q); and four are dominated by automotive establishments (Thoroughfares E, H, J, and K). The dominance of these two kinds of business, as shown by the sales volume of these thoroughfares, amounts to from 50 to 80 per cent of their totals. Finally, in this connection, it is to be recalled that 67 per cent of the total sales recorded for all of these thoroughfares is derived from these two business groups. These conditions are the apparent outgrowth of heavy automobile traffic passing these establishments, which, with their wide spacing, offer ample parking space for vehicles, the passengers of which either make convenience goods food purchases or buy automobiles and auto accessories.

The Community Business Areas

The retail trade of the community business areas, as shown by Table 13, possesses a marked degree of diversity. This condition is particularly pronounced for the number of stores per area, where a fifty-fold fluctuation is shown from a minimum of 73 (Area I) to a maximum of 3,905 (Area XIII). Likewise a forty-fold fluctuation is to be noted in volume of sales from a minimum of $927,000 to a maximum of $37,427,000 in the case of the same two areas. Finally, a somewhat similar, though less pronounced, condition is revealed by a nine-fold fluctuation in average sales per store. In this case there is a minimum of $7,500 (Area XI) and a maximum of $72,000 (Area X).

The condition of each community business area, when subdivided into 9 kinds of business, is shown by Table 13. The most striking fact revealed by this tabulation is the rather uniformly high proportion of business conducted by stores of the food group. From a high average of over 42 per cent of the combined volume of sales recorded for food stores, it is notable that for fifteen areas over 40 per cent of their business is of this kind. In only two cases does this proportion fall below 25 per cent (Areas VI and X), and in two other cases nearly 60 per cent of the volume of sales is of this kind (Areas IV and XIV). Outside of this primary dominance of food stores in most community business areas, there is a secondary concentration in three areas of sales in the automotive group (Areas I, VI, and VII), and one area in which the general merchandise group accounts for over 83 per cent of the combined volume of sales (Area X). Therefore, the retail trade of these community business areas, with minor exceptions, seems to fit the general description given for neighborhood business streets and isolated store clusters.

General Utility

With no attempt to forecast the use which may be made of intra-city business statistics, it is desirable to show that they apparently possess a broad foundation of usefulness. Only if a broad scope of usefulness ultimately can be established, it is likely that publication of intra-city business statistics will become a regular census feature.

Correlation studies of demographic and business data, rendered possible by intra-city tabulations, as shown here, should represent one basic form of usefulness. Such studies should indicate to retail merchants, wholesalers, and manufacturers the likelihood of intra-city business expansion or contraction, and in either case condition their programs. Tabulations probably will be made available in composite form (as illustrated by Table 14), to the end that all or any portion of the business recorded for any community business area may be correlated with population data by the same census tract combination . In this way, individuals or business groups should be able to determine what portion or portions of the city, whether for convenience goods or for shopping goods, offers the best opportunity for the establishment of new retail stores.

Another form of usefulness should develop from analyses of business trends from Census to Census. By means of such investigations, retail merchants should be able to gauge the condition of individual stores in any specific portion of the city. General city-wide sales increases could be checked against local decreases, thereby indicating critical retail conditions either requiring remedial measures or withdrawal to more favored locations. Conversely, such deductions might indicate bright retail trade prospects, warranting increased sales effort.

Finally, in brief, the following additional uses might be made of intra-city business statistics: (1) to serve as a guide to both local and national advertisers in conducting sales promotion campaign; (2) to be of use to publishers of trade journals as the basis for promotional material and general market analysis articles; (3) to guide realtor activity, with particular reference to retail store location, sales, and rentals; (4) to aid public utilities in their programs of service expansion in relation to retail store demands; (5) to aid banks, insurance companies, and individual investors in evaluating real estate bonds; and (6) to aid in the evaluation of estates in legal settlement.

Conclusion

It is hoped that this publication may serve to supplement the present demand for intra-city business statistics and, at the same time, crystallize this demand into a practicable form. Just as during the past several decades there has been a growing demand for census tract population statistics, which statistics, to a limited extent, may become a regular, decennial census publication, so it seems reasonable to expect that eventually the present demand for intra-city business statistics may have a similar result. During this inital period, and until adequate demand may develop for statistics of this kind, any such tabulations undertaken by the Census, with the exception of these experimental examples, must be at local expense.

X--Withheld to avoid disclosure of individual operations. NOTE: The distribution of these intra-city areas is shown by Figure 2. Community business areas, comprising combinations of Census Tracts, are designated by roman numerals; the Central Business District (#25 and #26), and the outlying business centers by Arabic numbers; and the principal business thoroughfares by capital letters. Refer to the accompanying boundary description list for the limits of each area.

NON-PROFIT ORGANIZATIONS, OFFICE BUILDINGS, AND MISCELLANEOUS

Presented in this report are summary statistics on non-profit organizations, office buildings, and miscellaneous enterprises in the United States for the year 1935. The data were collected in 1936 as a part of the Census of Business with funds provided by the Works Progress Administration. Information is shown on number of establishments, employment and pay roll.

NON-PROFIT ORGANIZATIONS, OFFICE BUILDINGS, AND MISCELLANEOUS

Summary statistics are presented in this report for non-profit organizations, office buildings, and other types of establishments having a paid personnel and coming within the scope of the census, but which can not be classified in any other group or division. The following types of establishments, among others, are included: Trade associations, trade unions, chambers of commerce, boards of trade, fraternal organizations, golf and country and other recreational and social clubs, civic and patriotic organizations, professional associations, research organizations, social service agencies; office buildings; cemeteries (not including church cemeteries or those controlled by a municipality or other governmental unit); non-municipally--operated gas plants distributing purchased gas, heating plants, and water works; and professional service businesses (accountants, architects, commercial artists, engineers, etc., but not including professional businesses such as lawyers, physicians, dentists, etc.). No governmental agencies, and no activities of governmental bodies, are included in this report.

SCOPE OF THE REPORT.---Because of the wide variance of kinds of establishments represented in this group, many of which are non-profit organizations, the data collected were limited to employment and pay roll. Reporting was limited to those establishments having paid employees. Each branch of a national organization is treated as a separate establishment.

A considerable number of the returns, particularly those for fraternal and other non-profit organizations, indicated that employment was probably only part-time. Such establishments with an annual pay roll less than $300 were considered as not coming within the scope as an establishment for census purposes and, therefore, were omitted from the tabulations.

INCOMPLETENESS OF CANVASS.---Due to the absence of legislation making the filing of reports mandatory and because of the difficulty encountered by the enumerators in identifying and locating many of the establishments coming within the scope of the canvass there is an undercoverage in all of the classifications shown in this report. Particularly is this true in the latter case as many non-profit organizations occupy a small office or only desk space in another office and, therefore, for this and other causes were easily overlooked by the enumerators. To what extent there was an undercoverage cannot be determined as there are no previous census statistics for comparisons and the type of establishments covered is so varied that there are no data available with which a comprehensive check can be made. Although the figures shown in this report do not represent a complete census and should be used as representing only those establishments reporting, the totals are of statistical value in that they are indicative of the amount of employment in the various types of establishments covered.

DEFINITIONS OF CLASSIFICATIONS.---Establishments covered in this group are of such types that in many instances it is difficult to determine the proper classification from the limited description of the kind of business given on the reports. Because of this difficulty the classifications have been limited to 15 kinds of business or groups. The titles of a number of the classifications are not fully self-explanatory and below there is listed under each of such classifications some of the representative organizations that comprise the group.

Trade and Professional Associations:
- Wholesale dealers and retail merchants associations
- Manufacturers associations
- Real estate dealers and builders associations
- Medical and dental associations
- Bar associations

Civic Organizations:
- Citizens associations
- Parent-teacher associations
- Rotary clubs
- City planning associations
- Civic clubs and associations

War Veterans' Organizations:
- American Legion
- Veterans of Foreign Wars
- Disabled American Veterans
- Jewish War Veterans
- Organizations of war veterans of British, Italian, and other nationalities

Fraternal Organizations:
- Lodges of all branches of Masons, Knights of Columbus, Elks, Odd Fellows, and other secret orders, including State and other regional lodges or headquarters. Greek letter fraternities, etc.

Trade Unions:
- Labor unions of all kinds

Golf and Country Clubs:
- Includes both public and private clubs but does not include municipally-operated golf courses.

Other Clubs:
- Business men's and business women's clubs
- Music clubs
- Political clubs
- Literary and other social clubs

Welfare and Relief Organizations:
(Does not include governmental agencies.)

- Red Cross
- Salvation Army
- Volunteers of America
- Community Chests
- Travelers Aid Society
- Humane Societies

Office Buildings:

Scope is limited to buildings in cities of 10,000 population or more having an operating personnel and not occupied exclusively by owner. Includes loft buildings, located principally in New York City.

Water Works:

Does not include plants operated by a municipality or other governmental unit.

All Other:

- State and county fair associations
- Holding companies
- Heating plants and gas plants distributing purchased gas (non-municipally-operated)
- Foundations and research societies
- Historical societies
